From Graham's Magazine. The Fate of the Blighted Flower.

BY THOMAS BUCHANAN READ. Why, gentle lady, why complain At Scandal's ever-flying breath? 'Gainst Virtue's cheek it blows in vain, And thereon breathsitself to death.

The flower beneath the passing rain, Untouched of canker or of blight. Bows patiently to rise again, With sweeter breath and fresher light.

But if the worm be hid beneath, Or, haply, if the hot simoom. Like some unlawful lover's breath, Hath wooed that blossom to its doom-

Then, wo is me, how poor and frail Is Beauty in her fairest form,-Her brightness cannot stay the gale, Her perfume cannot charm the storm! But when the searching wind comes by, And shakes each blossom by the stalk,

The tainted leaves assunder fly, To wither down the garden-walk;-And ere one heated noon has sped,

They crisp and curl and pass from sight; As if they never had been bright!

THE OLD MAN AND THE ACORN.

A STORY WITH A MORAL.

A foreign beggar sat one bleak day in autum, beneath the boughs of a venerable cak; he sat upon a rude bench, and mused bitterly upon his destitution, in regard to friends, home, and the comforts of life. 'Who cares or extinguished by the paralyzing influence for the poor old beggar?' he said. 'These of bad exaple or bad moral training! Just at that moment, an acorn, which had grown upon the topmast bough of the tree, came rattling down, and hitting the uncovered head of the beggar, wounded it until the blood gushed out. The old man arose in wrath.

'Has everything conspired to wound and injure me?' he cried. 'Cannot I sit down peaceably-must I be pelted and tortured by such a paltry thing as THIS?' and with his heel he ground the poor acorn into the soft. moist soil, and when it was entirely hidden beneath the surface of the earth, he exulted proudly, as men exult over a fallen or extir-

in form and flavor, of the kind. Well conducted experiments establish the fact that corn is peculiarly susceptible of improvement by care in selecting seed. The eading principle in effecting improvement in the variety is to select for seed, such samples as possess the greatest number of desirable points. With corn the most prominent of these is, to secure two or three or more ears to the stalk; to produce the longest and largest possible, with a small cob; and to obtain an ear of uniform size through its whole length. Mr. Dir of Vernon, Oneida Co. N. Y., has been very cuccessful in this. He commenced his experiment with a common variety of Northern yellow corn, at first selecting only the longest, uniform, and most perfect ears from such stalks as produced two, passing with a basket through his corn for this purpose, as soon as it had ripened. At length by good cultivation three ears began to appear on many stalks from which his seed was selected, till after a few years a large majority

THE HOUSE OF COMMONS

He rose in a house prepared to laugh at him, in the face of Mr. Pitt and Mr. Canning, both of whom had treated him with scorn, and with a manner and voice much exposed curiosity was excited, and one might have heard a pin drop in that crowded house. It required, indeed, intense attention to catch the strange and long deep-fetched whisper in which he began; and I could see the incipient, smile curling on Mr. Pitt's lips, at the brevi ty and anthesis of his sentences, his grotesque. speculations, peculiar and almost foreign accent, and archarticulation and countenance, As he proceeded, however, the success of his opponents were softened into courtesy and attention, and at length settled in delight and admiration. Mr. Pitt beat time to the artificial but harmonious cadence of his periods, and Mr. Canning's countenance kindled at the brightness of fancy which in glitter fully equalled, in real warmth and power, far ex-

JOHN ERICSSON.—The name of Ericsson, says the Albany Register, now takes rank with Franklin, Fulton, Watt Morse, and othor great benefactors of mankind. He is a man of 50 years of age, of a muscular, well developed and strongly knit frame; he is of middle size, has a firm tread, a person who gives assurance of reserved strength, and the head with all the proper intellectual developements, the high forchead and prominent brow, marking the man of thought and the philosopher; he has a dark complexion of hair somewhat whitened by time, black eyes, introspective and reflective rather than observing, a decisive mouth and the mixed temperament, combining the nervous and billious, which distinguishes the powerful in action and steady in endurance, His head rises in a phrenological summit of benevolence; he was heard to remark, the only sign of self gratulation on his triumph, that he was proud to be the means through his invention, of saving life.

He was born in Sweden in 1803. He early showed a taste for mochanics, and at the age of cleven attracted the notice of Count Platen, who obtained for him a cadetship in au engineer corps. He afterwards entered for the prize offered by the Liverpool and derful speed at that time of fifty miles an

THE PAPER HAVING THE LARGESTCIRCULATION F In West Jersey! A

Only \$1 00 per Year! FRANKLIN FERGUSON, EDITOR.

We have made arrangements with Joseph A. MILLER, well known to most of our patrons, to assist us in the Editorial department of the Pioneer. His services will commence about the middle of March next .-We cannot blow and strike at the same time.

BARNUM had a Wooly Horse, and if he wishes a "DOUBLE CIRCULATION" to his Illustrated News-should n't wonder if our cotemporary would suit him. Apply soon, this kind o'stock is scarce in the art. .

DAVID LODER, of Millville township, cemmitted suicide, by hanging, on Saturday night last. That destroyer, rum, is charged with the crime.

For the West Jersey Pioneer.

Religious Services have been held during the past five weeks in the Trinity M. E. Church (Bridgeton,) S. M. Hudson, Paster. Some 75 have professed to have received the " washing of regeneration and renewing of the Holy Ghost," the greater part of whom have united with the church. Several heads of families are among the number who give to Executors and sales of personal estate. promise of much usefulness to the cause of the Saviour. Our place of worship (basement) has been densely thronged-scores came and unable to obtain seats went away.

The congregation during the year has been constantly increasing, and the Trustees impelled by a sense of duty design to complete the "upper room." They will at an early day make an appeal to the lovers of our common christianity to aid them in the consummation of this important object. Μ.

Assignments of Mortgages .- Mr. Zabris kie has introduced to the Senate, a supple ment to the act to register mortgages, which provides, that the Clerks of counties shall record assignments of mortgages on lands within their counties, the same having acknowledgement or proof of execution, as required for recording deeds, which shall also be re corded; and that such record shall be notice to all concerned from the time it is left to be recorded.

The assignce of any mortgage by assignment not recorded shall be bound by the proceedings and sale in any foreclosure suit against any previous holder. The records and certified copies shall be evidence, and Pleas. the Clerk shall receive the same fees as in case of deeds.

When any assignment is not recorded as provided, and payment is made to the assignee in good faith and without notice of such assignment, and any release of the mortgaged premises or any part thereof to a person not privy, actual notice of such assignment shall be as valid as if said mortgage had not been assigned.

The New Chain Pump. - Our readers will remember the announcement a short time since of an improved Bucket, invented by the Rev. Clark Polly, formerly of this place, and now of May's Landing. A working model can now be seen at Willis's Hotel, in this place. The improvement is applied to the endless chain pump, now in common use. It is called the Globular, Elastic, Adjustable The water is kept at the surface, or down at the pleasure of the pumper. The capacity of the pump to discharge water is increased, and with double gearing can be applied to wells of the greatest depth. The pump men admit that it will supersede the old chain pump. Liberal offers we understand have been made to the ingenious inventor for his patent. We are pleased to hear of his good fortune, and hope it will yield him a substantial reward. Josiah S. Franklin, Esq., formerly of Woodbury, has become interested in the patent, and arrangements are being made for the sale of State, County and Township rights. Woodbury Constitution.

The Exemption Law .- A bill has been reported to the Senate of this state making the following alterations in this law:

1. The appraisers required under the may be appointed by the sheriff having the execution, who may administer the oath and endorse it on the appointment.

2. The property reserved to a debtor by the first section of the act, (\$200 in value,) shall only be allowed upon executions issued in the county where his residence may be; provided, that if the debtor has not in such county so much property as the amount re served to him by law, then so much as therewith will amount to such sum shall be allowed on an execution in any other county, upon said debtor making affidavit before the sheriff or other officer, that such additional allowance has not been made on any other execution in any other county than that in which

he resides. A bill was introduced last year to the Assembly, authorizing justices of the peace also to appraisers in cases where the execution was issued out of justices, courts, but was postponed. That alteration, with the one now sought, may save a great deal of trouble to parties and officers .- State Gazette.

The steamer Cohansey is now lying at Wilmington undergoing repairs. We understand it is the intention of Captain Robeson to have such alterations made as will add to the comfort of his passengers. The Ladies Saloon is to be entirely rebuilt and enlarged-a desirable improvement, and one that will meet the wants of this too long neglected portion of the travelling public.—She will take her place on the line in about ten days.

tice that he would to-morrow move to rescind Reports of Committees-Mr Rafferty called for the reading of that part of the Gover-

nor's message which relates to Banks, and it was read. Mr. Rafferty moved that this bill be post

poned for the present. Mr. Haines opposed it. Mr. Haywood asked what was the object of the postponement.

Mr. Rafferty understood there were five or ix similar bills before the House. He thought it best to get through the other business first, and then take these bills together. Mr. Hutchinson also opposed the motion. It was

not agreed to. The bill was read, when Mr. Hillyer moved to strike out the first section. Mr. Haywood said this was rather a harsh

measure at this stage of the bill. This bank was well tried, and of good standing-probably the House could not recharter a better institution in the state. The general banking law was still defective, and it was best to exted this charter for ten years, and that law by that time might be perfected.

Mr. Hutchinson opposed the motion. Mr. Hillyer made his motion to test the sense of the House, to ascertain whether any of these special banks were to be rechartered

Mr. Hutckinson opposed the principle of making individual stockholders liable for all issues. In Burlington county bank stocks were not allowned by moneyed men, but by

unfavorably. Mr. Littell said the position taken, was novel one. He thought it would not be disouted that the great security there was for the bill holders, the better it was for the bank a great security. The position of Mr. Hutchbe sought after. By making stockholders liable, each holder would be more likely to interest himself in the affairs of the Bank to see

if they were properly conducted. Mr. Kanouse offered a substitute for Mr. Littell's amendment, making stockholders liable to the amount of their stock. This was accepted by the friends of the bill.

The bill was agreed to 37 to 21. The Speaker presented a note from the Governor, saying that some of the deaf and dumb pupils would give an exhibition in the Assembly room this evening.

The Private Warehouse Bill .- The Senate, on Thursday, had before them the Private Warehouse bill. Mr. Miller strongly opposed it, as opening a way for new frauds upon the customs, and working injuriously to the interests of our own manufactures. For instance, under the proposed law extending the warehouse privileges to three years, Eng-land could fill our markets with iron and wait for a rise, while our producers having a basis of less capital, are ferced into the market, and so of other products, coal and the like. The stockholders responsible for all issues and bill was postponed, and that for the re-organizing of the Navy came up, to which Com. National Agricultural Society.

Washington Feb. 8. The Agricultural Society met at 9 e'clock, this morning. Ninetcen States were represented, and about 100 members were present. Various committees reported. An amendment to the Constitution, changing the time of the annual meeting, to the last Wednesday of February, was adopted.

Mr. Wheeler, of Mass., submitted a pro position to reduce the terms of admission, and annual subscription of members. This was debated and rejected.

The special order, a resolution to memorialize Congress to establish a department of Agriculture, was taken up.

Mr. Calvert supported it. It was due, he said, that this great interest, embracing four fifths of our population, should be represented

Messrs. Fronch and Mapes briefly advocated the resolution, when it was adopted unanimously. President Fillmore and Secretary Stewart

now entered the Hall and were received with marked attention, the members rising. The Treasurer reported that the funds of the Society had been augmented nearly \$2000 since his arrival yesterday.

Dr. Elwin presented a paper written by Prof. Booth, of Philadelphia, and arguing that the analysis of soils in the present state of Chemistry is of no immediate practical value to the farmer. Prof. Mapes said he stood ready to refute

every position assumed in the paper, and stated many interesting facts against the theory After and animated discussion the paper was withdrawn. On motion of Mr. Poore, circulars were di rected to be addressed to the Home and For-

eign Agricultural Societies, proposing an interchange of publications. Major Wheeler suggested the propriety of memorializing Congress to establish a National Agricultural School. The subject was deferred until the next annual meeting.

Evening Session.—The Society re-assembled at 7 o'clock this ovening. Professor Mapes delivered an interesting lecture on fertilizers, after which resolutions complimentatle opposed this in a speech); the Cumberland ry to the officers and the reporters were pass-Bank (by a vote of 38 to 17), were postponed ed. Catholic War on the Common Schools. The bill introduced in the Legislature of Michigan, to modify or destroy the present common school system, is similar to the modification proposed by Bishop O'Connor to Gov. Bigler. It provides "that any qualified teacher may establish a private school, within any district, and on presenting a certificate of the number of children taught by him, may "draw his proportion of the public moneys." The plan has evidently been pre concerted, and it is the most dangerous effort ever made by Catholicism to enter a wedge into our social system, hy which they hope to rend it are the prime causes. asunder! WANTED 1000 Bushels Clover Seed To get out with Hibb's Patent Clover Huller and Cleaner.

THE Subscribers having purchased Hinn's Pat-tent Clover Huller and Cleaner, are now prepared to get out Clover Seed any where in the County of Cumberland. The Machine is superior to any ever introduced into this County. It does not break or injure the seed, taking it out and cleaning it by one operation, and owing to the peculiar combination and arrangement of parts the Huller is not liable to be injured by nails, etc., which/prove so fatal to other Machines

of the kind. The Dust so annoying to those operating with other Machines, is carried off in one direction by the wind from the fan, causing but little more in convenience than cleaning common grain.

From the repeated and thorough trials to which this Machine has been subjected, and the satisfaction given where it has been used, the subscribers feel warranted in thus calling the attention of Clover Raisers to their Machine, fully convinced, that when seen in operation, they will be satisfied of its superiority over all other Hullers.

The Machine will be in readiness at any

time after the 28th inst., and the subscribers hope to give entire satisfaction to all who favor the with a call.

Haddonfield, March 26th, 1852. Dr. Steelling-Dear Sir-Some time since I was attacked with a severe Inflammatory Rheumatism, was entirely bedridden, and could get no relief, until I made trial of your Rheumatic Liniment, which entirely cured me, after I used two bottles of it. I would observe that before using your Einiment, I had a physician, but derived no benefit from his medicines. I have also been cured of a severe attack of Lumbago by the same Liniment. My wife had a severe attack of Rheumatism. which entirely deprived her of the use of one of her hip joints; she used two bottles of your Lini-

ment and was entirely cured.

I could also relate several other cases of Rheumatism, where I have recommended it, which were also cured by Steelling's Liniment.

Bridgeton, June 16, 1852-y. DP. STRELING'S PULMOWARY SYRUP. THE GREATEST REMEDY

For the Cure of Coughs, Colds, Asthma, Croup, Whooping Cough, Measles, Pleurisy, Incipient Consumption, Spitting of Blood, and all Diseases of the Lungs, Throat, and Breast.

Large bottles 371 cts. Small bottles 25 cts. Philadelphia, Nov. 2, 1851. DR .STEELING-Dear Sir:-In compliance with your request, that I should express my opinion of of your Pulmonary Syrup, I am happy to say that ne very free past, and particularly for croup amongst our children, to which they have been more or less subject, we have always found the most beneficial results from its use. Upon the appearance of this dis-cases we apply at once to your Pulmonary Syrup; and when the symptoms are severe, we double, and sometimes treble the dose recommended in your printed directions, which speedily produces sickess and vomiting, after which the system becomes relaxed, perspiration ensues, the alarming symptoms are removed, and, through the blessing Providence upon the means used, the sufferer is soon restored to health. Knowing you to be an old and experienced physician, your Pulmonary Syrup is, doubtless, the result of much labor and experience; and as it has been a kind friend in my family, I do most cordially recommend it to the notice of all, but most particularly to mothers, who might save their children many a severe pang, by always keeping a supply of your Syrup on hand, and giving it immediately upon the first appearance of any of those diseases for which it is recommended.
