

The West-Jersey Pioneer.

BRIDGETON: Saturday Morning, March 26.

LARGEST CIRCULATION In West Jersey!

Only \$1 00 per Year!

FRANKLIN FERGUSON, Editor.

JOSEPH A. MILLER, Editor.

With the present number we take our seat as assistant editor of the Pioneer.

Believing the press exerts a very powerful influence upon the actions and opinions of men, we cannot but feel sensible of the importance and responsibility of the position we have commenced occupying.

Amid the multitude of subjects we shall be called upon to notice, it cannot be expected, that we can agree with all, or present views that all of our readers will readily adopt.

It is difference of opinion that leads frequently to the development of truth and the discovery of error. "The spark will not rekindle till brought in collision with steel," neither will the mental powers be known or appreciated till something opposing calls out their dormant capacities.

With our brethren of the press we would wish to interchange and reciprocate friendly feelings; still whilst speaking to them courteously we shall not hesitate to speak freely.

The claims and interests of Southern Jersey will find in us a ready advocate, and whether oppressed by "monopoly," or cursed with bad legislation, we shall not be silent, when such silence, would imply acquiescence with wrong or fear of defending right.

Acting upon the principle that man is progressive in his destiny, blessed with endowments susceptible of such improvement, as to fit him for a higher sphere, we shall endeavor to direct our efforts as to aid in the full development of his powers.

The interests of agriculture are now successfully claiming that attention, so long demanded in vain.

The interests of agriculture are now successfully claiming that attention, so long demanded in vain. Courses of Lectures, analysis of soils and experiments with different fertilizing agents; are now changing the results and profits of farming industry.

To mechanics and laboring men we shall recommend our paper by the steady advocacy of principles, in which they possess interests as deep as ours, and by the diffusion of intelligence and news useful and interesting to them.

To professional men we have little to say. Prospecting from the nature of their respective callings, that they are fully alive to the importance of contributing to the progress around them, we shall anticipate their cordial co-operation in the arduous labors we have undertaken.

In conclusion we shall endeavor so to blend the amusing and instructive with passing events as to induce all our subscribers old and new, smilingly and unhesitatingly to hand us our "dollar."

JOSEPH A. MILLER.

ALMOST A FIRE.—About noon on Monday last, smoke was discovered issuing from the windows of a room in the rear of Dore's building on Commerce St., occupied by Dr. G. W. WHITECAR as a laboratory.

Several gentlemen of Philadelphia are taking measures for constructing a large and very extensive Rolling Mill at Gloucester.

We have received the March numbers of the "Water Cure Journal," and the "American Phrenological Journal," published by Fowlers and Wells, No. 131 Nassau St., N. Y.

The former particularly recommends itself to that numerous class of invalids, the dyspeptics; and the latter to the attention of the literary and scientific.

The following are the Official proceedings in Town Meetings held March 8, 1858.

THE TAX LAW. The following synopsis of the amended Tax Law, from the Newark Mercury, will probably give a clear idea of its provisions. We have not yet seen the law in print.

Escaped.—The man named Wakely arrested on Friday, on suspicion of having stolen a horse, and committed to the City Prison, made good his escape, some time during the night. The cell door was fastened by a padlock. The prisoner took a chair leg and reaching through the grated door, pried open the lock, and made good his escape to parts unknown.

Pomona Garden and Nursery. 1000 Dwarf Pears.—Also, other Fruit and Ornamental Trees, Strawberries, Raspberries, Rhubarb Plants and Asparagus Roots, cultivated and for sale, by WILLIAM PARRY.

CHEAP CASH STORE! Next door to Mr. James Riley's Cooper Shop, Commerce Street. Groceries and Provisions. THE subscriber, thankful for the patronage bestowed on him since he commenced in the above business, begs respectfully to assure his friends and the public, that he will continue to sell at prices as low as an honest dealer can afford to give.

**State Improvements in New Jersey**  
Our trans-irrigation neighbors are progressing rapidly in a liberal spirit of improvement. The Camden and Cape May Railroad meets no opposition, and the State will soon be linked from the southern extremity to the Water Gap at the north. The Mount Vernon Hotel Company, originally organized under the general building law of the State, has unanimously received a special charter, and thus secured additional privileges of great value to the city of Camden.

**More Cuban Outrages.**—The causeless detention of the mail steamer Ohio by the Cuban authorities of Havana, with the government mails, two millions and a half in gold and sixty passengers, is another provocation which cannot be hastened to the "marvelous destiny" of the Ohio arrested at Havana from the Aspraval and proceeded to the harbor, when she was boarded by a health officer, and, although exhibiting a clean bill of health, and having had no deaths or any infectious disease on board was ordered first out in the harbor, and then to quarantine. She was of course unable to coal. They refused to allow Captain Hartstone to communicate with the American Consul. His protest and the representations of the Consul were disregarded and treated with the utmost contempt. The vessel was detained for two days, without the slightest change of circumstances, the ship was allowed to come to her wharf and commence coaling. By these proceedings, the ship with her mails, passengers and treasure, was detained three days in port, while all concerned were subjected to the greatest inconvenience.

**The American Exploring Expedition on the River Amazon.**—The Patent Echo learns from Captain Thomas, who arrived in the Nueva Granada, that the day before the steamer sailed an express arrived, overland, from the American exploring expedition on the Amazon, that the explorers had reached a point on the river, in nearly by the circuitous route which the express was compelled to take, about three hundred and seventy-five miles distant. They had found a magnificent and most productive country, with resources beyond previous conception. Cotton sheathing was worth 20 cents per yard; coffee and indigo at 2 cents, and all other products at proportionate prices—outlets especially, being very high. The imports are fully equal in their rates to the exports. It seems, by the statements of Captain H. and others, that the Yankee steamer will secure the bonds of \$10,000 offered by the government for the first steamer vessel navigating the waters of the Amazon into Bolivia, and also the entry of her entire cargo duty free.

**Human Bodies Found in Guano.**—From the ship Bradenport, unloading Peruvian Guano at Leith, there were exhumed the remains of three persons, evidently Peruvians, buried in the guano, and which had apparently not been disturbed in the process of loading the ship. The remains illustrate a curious property in the guano in preserving bones, hair and clothes, while completely decomposing flesh. It is not known when the bodies were originally interred, but the bones were all found as entire as if they had been preserved in a museum; the hair remained upon the skull, and the clothes were very little decayed.—*North British Mail.*

**Central America.**—A despatch from Washington states that a projected meeting of the cabinet was held on Thursday morning which resulted in directing the Secretary of State to demand an explanation from the Government of Great Britain on the subject of the recent intelligence from Honduras and the English intervention in behalf of the Mosquito King. The Secretary of the Navy was instructed to report forthwith to the Executive the effective force at his disposal for active operations. If this be true there may be something in the war rumors after all.

**An agent for a company of English Mormons,** has contracted with a firm in Cincinnati, for one hundred and fifty wagons, to be used as conveyances in traversing the plains, en route to the Great Salt Lake.

**No Licenses in Mercer County.**—The people of Mercer presented remonstrances to the Court at the late term, against the granting of licenses for the sale of intoxicating liquors in that county. The Judges in the exercise of the discretion vested in them by law, rejected all the applications for license the Court not believing run houses "necessary" to accommodate "strangers and travelers."

**A fatal accident occurred on the New Jersey Central Railroad, on Friday.** As the train from New York was approaching the depot at Phillipsburg, in the afternoon a German (name unknown) who was walking on the track, was run over by the locomotive, and both legs were completely severed from his body. He will probably survive but a short time.

**Donation to the Lunatic Asylum.**—We are informed, says the State Gazette, that Stuart B. Landon, Esq., a native of New Jersey, now residing in the city of New York, has given \$2,000, with the offer of \$500 in addition, if it should be necessary, to erect and finish at our Lunatic Asylum, a building for a museum and reading-room for the benefit of the patients.

**Accident.**—James W. Stewart, aged 40 years, a seaman on board the ship India, lying in the Delaware, at Race street wharf, fell down the hold of said vessel, yesterday and broke his collar bone. He was also badly bruised about his body. The sufferer was taken to the Hospital.

**A Job at Albany.**—We ventured a few days ago to say in reference to the re-opening of the question of banking, that the attempt to fight upon the department the stocks of certain states South, was probably "a job," though the fact might not be known to the Assembly. An evening paper now states that the statutes named in the Basis Bill, "take much interest in the Albany Legislative movement," and the following letter, in proof, is quoted from Richmond, Va.

"The treasurer of the State of Virginia, in the event of its passage, eight millions of dollars worth of our bonds will at once be purchased by a New York broker, at a higher premium than they have yet reached."

Very much this, as we suspected—as, indeed, we had certain reasons to know. Virginia is a liberal borrower of late years, through New York and London, and her bonds have already derived no small credit, in a reflected way, from the General Banking Law of other states. And here are eight millions more ready for Albany. The New York broker has his pegs already set for the whole amount at a higher premium than they have yet reached, provided the scheme at Albany can be carried through.

We fear the chances are it will be done; not to the exclusion, as first designed, of Pennsylvania State Loans, and the City Loans of this state, but by a compromise among all interests. It is but just, however, that the Assembly and Senate should act knowingly, and not put on the public calendar, by mistake, a bill to ratify a private job.

Here is another manifestation of what threatens to be the special evil and danger of the free banking system. The stocks and bonds received as a basis of the circulating notes, will be determined not by cautious, severe, and impartial judges, but by legislative bodies, ignorant of their value, and misled by the misrepresentations and artifices, or overborne by the collective influence of brokers interested in inflating particular kinds of stocks or bonds.—*Gazette.*

**Employment.**—We learn, through the Springfield (Mass.) Republican, that Joel Price of Athol, eloped from that town, on Wednesday last week, with a seventeen year old Mrs. Harwood, a daughter of his wife, by her first husband. The precious pair left at Athol, respectively, a wife and husband and announced that they were going to Palmer, where they are reported to have stopped, as they have not been heard from since. Bruce is described as about forty-five years of age, tall, athletic, and black-eyed, and his paragon as rather tall, slender and handsome. The Republican suggests that editors who may be opposed to such an unholily commingling of decayed vice and tender immortality, are requested to do "the girls they left behind them," and the public go rally, an especial favor by noticing the above.

**Marrying in Pan.**—At Hawkinsville N. Y., at a social party; a young gentleman said he would get married if any one would have him. A young lady accepted, and a justice united them. The next day the lady was "brought to" by receiving from the justice a certificate of marriage, duly executed. The young gentleman, on learning how "things were working," in a many way, that though he had not thought such a ceremony would be if she was willing he would abide by the bargain made in sport and make her as good a husband as possible. At last accounts this was the position of the matter.

**A New York Paper.**—As a specimen of this genre we would state that Patrick Somebody was taken to the New York Almshouse on Tuesday last week, in the greatest distress, being ragged, dirty, and nearly dead from want of food. On overhauling his tattered bank bills to the amount of \$185 were found snugly sewed up therein. No wonder our almshouse costs three quarters of a million a year. Many of these dirty misers live a life of misery and dying, leave their money to strangers.—*Brother Jonathan.*

**Thrift.**—In Cincinnati, as is well known, the hog dealers' new make use of almost any part of the animal—its flesh, blood, bones, &c. But it has been left to an ingenious Yankee to invent a machine to bottle up the only part that the Cincinnati has not put to some use, viz: the squeal, and this the inventor deposits of to the railroad companies, to take the place of the steam whistle.—Verily a Yankee is hard to beat. It has been said if he were left in the middle of the Atlantic with a jack knife and shingle, he would whittle his way ashore." We have not a doubt of it.—*Boston Chronicle.*

**A Victim of Disappointed Love.**—A girl named Celestina Oberly of Cincinnati, Ohio, was sent to the hospital on the 21st ult., as lunatic. One of the papers says: "She was sent by her parents, about eight months since to a nunnery, near New Orleans, to prevent her being married, and a few days ago she returned a raving maniac." This is a terrible judgement on her parents, who have exhibited a very doubtful affection for their child, to say the least, by sending her to a nunnery. No safer prison, however, could have been devised than the existing cause of blighted affection, would have been sufficient to produce insanity.

**High Handed Outrage.**—On Sunday night three fellows unknown, went into a small shop kept by Mrs. Griffiths, in the vicinity of Front street and the Southwark Canal, and demanded something to drink. She refused, whereupon one of the party struck her on the side of the head with a blunt stick or a similar deadly weapon, which fractured the skull. The aggressors then took a hasty leave. Several of the Marshal's Police, of Southwark, hastened to the spot as soon as they heard of the outrage; but the party had escaped. Mrs. Griffiths was placed immediately under medical treatment. She says the young men were entire strangers to her.

**Case of Maiming.**—Two colored fellows, named Jackson and Owens, got into a fight on Sunday, in Bedford street, near Seventh. During the conflict, the former bit off an entire eye-brow from Owens. The injured man offered to settle the matter on the payment of \$10, but the prisoner refused to give the sum, saying that "his eye-brow was not worth more than two dollars and a half." Jackson was committed in default of \$500 bail for a further hearing.

**Advance of Wages.**—The Masons' Laborers' Society of Jersey City have publicly notified boss-masons and other parties with whom they are interested in matters of labor, that after the first of May next, they shall demand 10s. per day. The reasons given for the course they have taken are the increasing prices of necessary food and home rents.

**The Wheeling Times** states that Lewis a colored man belonging to H. M. Jamison, Esq., of that city, who had run away a short time ago, voluntarily returned, recently, perfectly disgusted with the condition of his "free niggers" in Pittsburg, Pa., where he had been stopping.

There is a gentleman in Boston who gives twenty-five cents to some charitable purpose whenever he uses a profane word. The Secretary and General Agent of the Boston Provident Association acknowledged the receipt of seventy-five cents from this individual.

The latest application of India rubber in its various uses, is in the manufacture of a new kind of paper, possessing the property of being impervious to water, and of being able to stand a long time in water, without being injured. It is a much better article than any kind of wood paper.

**FOR RENT.**  
THE Tavern and Boarding House together with the Stable, situated on Porteus Island, on the Delaware Bay, near New York, N. J., known as Fortunate Island, and formerly kept by Samuel Kelly.

**HENRY HENFE, SURGEON DENTIST.**  
Office continued at the Old Established Stand on Commerce street, opposite the Post Office.

**A Card to the Ladies.**  
The subscriber, grateful for the patronage bestowed by the Ladies for the past year—and is particularly obliged to the Ladies of Bridgeton, Philadelphia and New York, of whom I have had the pleasure of working for the past year, and who have been pleased to give me their orders and other work they have bought of him, and would solicit the continuance of their favors for the ensuing year, hoping by strict attention to business to merit their approbation. And he would further state that all the work he sells is made under his own immediate inspection, and no mistake.

**New Rope, Twine & Brush Store.**  
Three doors West of the Bridge.

**Geo. W. H. Whitaker, DENTAL SURGEON.**  
DENTALLY informs the inhabitants of Bridgeton and vicinity, that he has succeeded J. C. Harris in the Dental profession, in the office occupied by him, in Commerce street, Bridgeton, N. J.

**CARD.**  
The Dental services of Dr. Geo. W. H. Whitaker, with whom the subscriber leaves the business, are respectfully recommended to his former patrons and the public generally.

**Largest, Cheapest and Best Assorted Stock of Tin and Japanned Ware.**  
EVERY useful and many elegant articles, Toys, &c. may now be found at the old established stand of the subscribers in Commerce street, next door to the Fireman's Hall, all of which will be sold at the lowest prices, on reasonable terms, and warranted as recommended, or no sale.

**ROOFING AND SPOUTING.**  
Done at short notice, in the best manner, and of the best material, by experienced Workmen, and at Moderate prices.

**Patent Pumps, Chain Pumps, and Hydraulic Rams,** put up to order and warranted to work. One of the rams, which has given entire satisfaction, may be seen in operation on the farm of Mr. B. P. Stone, near Fairton.

**STOVES**  
NEW PATENTERS—Verdon, Anneton, & Independent, Albany, Astor, Girard, & Co. Builders of Improved Albany, Thatcher's Hot Blast and Ethna Air-tight stoves, and also of their Wood or Coal. New and Splendid Patterns of Parlor Stoves—such as the Star, Ethna, Stanley, Esling, Cottage, and other Air-tight and Radiators, together with all other suitable Stoves, Churches, Offices, &c. ALSO Brass Kettles, Iron Pots of all sizes, Tea Kettles, Iron and Gas Furnaces, all of which the public are respectfully invited to call and examine.

THE Public Good Demands

That Citizens of the same community partake each other. THE Great and increasing demand for our Goods, the cheapness of our Ware, and the extensive sale of our Goods, has induced us to open a branch at one of the best locations for the purpose of convenience to our customers, and to the benefit of our country.

Handsome and superior made VENETIAN INSIDE BLINDS. ALSO—French Chip Blinds, Shade Trimmings and Fixtures which he is in daily receipt of.

THE citizens of this place and the surrounding country are already acquainted with the quality and style of the article furnished by him, having been engaged in the sale of the same for the past three years, upon such principle as will enable him to sell from ten to twenty per cent below the market price.

EVERETT'S PATENT COUPLING. H. Everett is the inventor of this improved mode of coupling, which he is prepared to construct in any quantity.

READY MADE CLOTHING. BARGAINS! BARGAINS! It is not funny, that Henry Rar, in Prosperity Row, can sell his goods cheaper than any other establishment in West Jersey.

NOTICE. PARTICULAR attention is invited by the subscriber to the balance of his Stock of goods, which are now being sold at very low prices.

BOOTS AND SHOES. A FRESH and large stock cheaper than ever, at the following greatly reduced prices—Men's Fine Calf Boots from 2.50 to 3.50.

LADIES SHOES. Ladies Gaiter Boots, from 1.25 to 1.75. Slippers 75c to 1.00.

FRENCH CORK SOLES. FOR Ladies and Gentlemen, at C. CAMPBELL'S. SHOES FINDINGS, such as Knives, Rubbers, Raps, nails, awls, tacks, thread, wax, brushes, combs, galleons, &c.

BEef, Veal, Mutton, Pork. THE Public can be accommodated with Meats of all kinds, at all hours, in the most long and convenient quantities, fresh-killed every day.

LOOK HERE!
