# MORAL.

NO MOTHER.

She has no mother! What a volume of sorrowful truth is comprised in that single sentence -no mother! We must go far down the hard, rough paths of life, and become inured to care and sorrow in their sternest forms before we can tak home to our own experience the dread reality -no mother - without a struggle and a tear. But when it is said of a frail young girl, just passing from childhood towards the life of woman, how sad is the sto ry summed up in that one shirt sintence -Who now shall administer the needed counsel -who now shall check the wayward fancies -who now shall bear with the errors and fail-

ings of the motherless girl? Deal gently with the child. Let not the cup of her sarrow be overfilled by the harshness of your bearing, or your unsympathising coldness. Is she heedless of her doing? Is she forgetful of her duty? Is she careless in her movements? Remember, oh, remember, "she has no mother!" When her young companions are gay and joyous, does she sit sorrowing? Does she pass with a downcast eye and a languid step, when you would fain witness the gushing and overflowing gladness of youth? Unide her not, for she is motherless; and the great sorrow comes down upon her soul like an incubus. Can you gain her con-fidence, can you win her love? Come then to the motherless with the boon of your tenderest care, and by the memory of your own mother, already perhaps passed away - by the fulness of your own remembered sorrow-by the possibility that your own child may yet be motherless-contribute, as far as you may, to relieve the sorrow and repair the loss of that fair, frail child, who is written Mother-

# AN HONEST BOY.

"That is right, my boy," said the merchant, smiling approvingly upon the bright face of his little shop-boy. He had brought him a dollar that lay amongst the dust and paper

of the sweepings.
"That is right," he said again; "always be honest; it is the best policy."
"Should you say that?" asked the lad,

"Should I say what? that honesty is the hest policy? Why it's a time-honored old saying. I don't know about the elevating tendency of the thing; the spirit is rather narrow,

"So grandmother taught me," replied the boy, "she said we should do right, because God approved it, without thinking what man

would say."
The merchant turned abruptly toward the desk, and the thoughtful-faced little lad re-

sumed his duties.

In the course of the morning a rich and influential citizen called at the store. While conversing, he said, "I have no children of my own, and I fear to adopt one. My experience is that a boy of twelve (the age I should prefer) is fixed in his habits, and if they are

### AGRICULTURE.

Frem the Ohio Cultivator. Double Profits vs. Acres!

Many farmers at the present time are laying their plans for putting in an organal num-ber of acres of corn and other crops, the pre-sent season, in the expectation that high prices of a farm products will continue for a year to come. Now, as the object desired is an increase of profit, we would advise farmers to consider that this may often be better secured in some other way than by increasing the number of acres devoted to any sort of

crops. Let us look at an illustration. Farmer A resolves to plant a field of fifty acres of corn, but having but little capital or help, he must do it with the commonest cultivation. The land is of good average quality, and will yield 40 bushels per acre with ordinary tillage, but owing to some bad weather at planting, he gets behind hand, as is quite common, and only realizes 30 bushels

per acre. The account will stand about thus: lost of plowing, per acre, Harrowing and marking, Planting and seed, Cultivation and tending, Cutting and shocking, Interest and taxes. Total expenses, Cr. 30 bushels corn, worth 35 cts.

This will give a profit of \$100 on his field of 50 acres. Now, let us look at the other ide of the question.

10 50

Farmer B. determines to plant only 25 eres of corn—the land of the same character, but the culture different. He first applies all the manure that has accumulated about his barn yard, or that he can obtain from the nearest village or tavern, and then with a double team and large plow, or by two teams and plows following in the same furrow, he turns up the soil to the depth of 8 or 10 inches, which is 3 or 4 inches decper than it was ever plowed before. This, together with the manure, causes his corn to grow and flourish during the latter part of summer, while farmer A.'s crop was stopped by the drouth. Besides having only half as many acres to plant and cultivate, he is able to do all the work in good time, and when the ground is in the best order. The consequence is that he obtains a yield of 60 bushels per nere-or as much corn from 25 acres, as A got from 50. Now let us see how the account of profit will stand:-Manuring, 12 loads per acre, 35 cents

per load, Plowing with double team, Harrowing and marking, Planting and seed, Cultivating and tending thoroughly, Cutting and shocking, Interest and taxes, or rent of land.

Total expenses, Cr. 60 bushels of corn, at 35 cts.

[The fodder in each will pay for husk-

This gives a profit of \$162,50 on the field of 25 acres, besides leaving the field worth \$40 more for the next year's crop, in consequence of the manuring and deep plowing; so that B has gained twice as much from 25 acres as did A from 50 acres.

Should corn happen to be only 30 cents per bushel, it will be seen that Farmer A's crop will barely cover expenses, and leave him 50 cents an acre profit! while Farmer B will still realize \$3.50 per acre, or seven times as much as A, besides the benefit to his land. Any person who has fairly tried the experiment of manuring and extra deep plowing for corn, especially on strong soils, will testify that our estimate of the yield obtained thereby is rather below than above the truth. and the true way to double our crops and our profits is to double the DEPTH, instead of the

Thus tolacco and alcohol are placed and condemned together. Ben Jonson was particularly hard upon tobacco and upon smokers, although at his club it is supposed the choice young fellows did not disdain to blow a puff, and we find the 'Young England' of that day 'quaffed tunnel of tobacco smoke.'

#### From the New York Organ. A GLORIOUS FIELD.

When we look at the crowds of hungry, homeless, prospectiess men and women wi throng the large cities of this land, and who prefer the certain want, misery, and degrada tion which are sure to be their portion there. we cannot help thinking how few seem to appreciate or understand the wonderful advantages which Providence offer to honest industry in the vast fields which await the hand of culture in the West.

pressly designed the vast uncultivated tracts of this country for the great purpose of giv-ing to all an opportunity to make themselves men of a figmer build and loftier, freer aspira-tions than any others. Just think of a man cutting loose from the pauperism, corruption and oppression of Europe, and finding a place which he can soon call his own in the great West, and consider what a chance he has for building himself up into a man there, compared with that of his former condition. Or suppose any anxious, ill-paid, half-fed toiler of this city, could in half a dozen years work himself into possession of a small farm out West, a thing easily done, and what a glarious opportunity he would have of becoming a free, happy man with the means of living sure, and then compare the life he would then live, with that which he is living now, in some garret or basement, or in some filthy lane or alley in New York. Why, when we reflect on this subject, we are forced to conclude that mon certainly are not aware, or will not con-sider how easily and vastly they might improve their condition. For if they did, they would certainly turn their faces to the interior and work their way, mile after mile, till they found a spot which they could call home.— What is it that keeps hearty, strong wen moping about the streets here, when they might easily become masters of a farm? Are they ignorant or are they too lasy? Do they say we have no means to travel with? Then let them work their way. There is employment

It was no disgrace for Israel to have a longing desire, when enslaved in Babylon to go back to their native land; and even Jesus Christ when he

came near his native city, wept over it. To love our neighbor as ourselves is not an evidence of the want of affection for a brother, a companion or a beloved child; and that person who is not faithful as a son, a father, or a brother, is not faithful as a common citizen and therefore is not a Philanthropist. #### The School Exhibition at Shileh.

The Exhibition at the close of the Winter day last, was an interesting occasion. The Students in the delivery of Select Orations.

The afternoon exercises were commenced with prayer by the Rev. WM. E. CORNWELL of Bridgeton, after which, the Original Orations and Essays were preceded with. "Foreign Influence," by L. R. Swinney, was de- German family, caught fire on Sunday and livered with much emotion on the part of the Speaker, so much so, that he was scarcely furniture was saved. The fire originated in able to proceed. The Oration was quite lengthy. In his remarks he quoted from Lafayetto and Jackson, and might have added the following from the farewell address of the immortal Washington to his countrymen. delivered in 1796: "Against the jusidious wiles of Foreign Influence, (I conjure you to believe me fellow citizens,) the Jealousy of a free people ought to be constantly awake; since experience and history prove that foreign influence is one of the most baneful foes of a Republican Government." As the speaker advanced he became quite eloquent, and as appeal after appeal fell from the lips of the youthful Orator, a tear might have been seen coursing its way down the furrowed cheek of the aged Sire, as he was reminded perhaps, of the struggles of '76; when Liberty was so dearly purchased. A number of pieces displaying ability and taste in the writers, were read from the "ACADEMIC STAR," Edited by C. H. Sheppard and Charlotte E. Davis. "Our Native Land," an Essay by Miss Cornelia Gillette, was well written and delivered in a style that would have been creditable to a Professor of Elecution.

An appropriate and instructive Lecture on the History of the Reformation of the 16.h century, by Rev. Wm. E. Cornwell, was listened to with much attention. A "Description of Satan," by Cornelia G. West, was portraved with a skillful pen. "Christ's agony in the Garden," read by Margaret J. Clawson, was a very creditable piece of comthe Ladies most certainly, would all be emvoices could not be distinctly heard by us.

At the close of the exercises, the Principal Mr. C. N. prosperity of all who had been under their in- Stratton of the House of representatives for struction were not forgotten. The seizure and confictication of the Black Warrior at Havanna by the Cubat authorities. s at present attracting the attention of the outrage. The facts of the case as we glean them from our exchanges are these. As is usual for our sea coast-steamers, the Black Warrior took on board some cotton at New Orleans for ballast. As it was not to be discharged at Havanna or more taken on board, she was reported in ballast. This has been the uniform custom of the New Orleans steamers stopping at Havanna with the knowledge of the authorities. In this instance on pretence that the manifest was fraudulent the stcomboat was seized by the Cuban anthorities and her cargo confiscated.

It would seem from the conduct of Spain as if she meant to force this country to take the island, for the protection of our own commerce whether we want it annexed or not. Rumors are now affoat that the large equipments of England and France ostensibly for the assistance of Turkey, are in reality partly meant to protect the island of Cuba from the Americans. We should certainly very much regret that a rupture should occur at this time between this country and France and England when their whole energies are needed to proteet the democratic principle now spreading in Europe, from the despotic power now seeking to crush them in hopeless oblivion. At the same time it seems probable that we shall' authorized to state, that Professor SNYDER have no security to our commerce till Cuba has signified his acceptance of the office of passes out of the hands of Spain. > THE LATE GALE. - We were visited on Friday night and Saturday of last week with a tremendous gale of wind that blew and rections. We learn from our exchanges that places and caused a great deal of damage.

In New York city "Sirocco, as intolerable as any that ever scourged the Libyan deserts, swept over the town Friday night and Saturday morning, with a fury resistless at times.' "In Albany the ferry boats abandoned crossing the river, for nearly the whole day it being dangerous to venture out. Fragments of slate, toru from the roofs were flying through the air with the lightness of feathers. Out door business was suspended." From nearly all the eastern towns we hear of chimneys being blown down, roofs torn off, buildings destroyed and railroad trains delayed. In Albany alone, fifty buildings are reported to have been unroofed. Upon the Lakes and along the Seaboard many vessels broke from their moorings, and it is feared many vessels and Term of Union Academy at Shiloh, on Tues- lives have been lost. In many places the gale was accompanied with a severe enow storm. morning was principally consumed by the This will probably account for the change in our atmosphere and the cold chilling winds we have had for a few days past.

> House Burnt.-We learn that a small frame house near Pittstown, occupied by was burned to the ground. A part of the a barrel used to put ashes in, adding another to the many warnings of the danger of using wooden vessels as a deposit for ashes. It is a great fault with nearly all our houses: that they have no fire proof receptacle in which to store ashes. For the want of such conveniences, property enough has been destroyed by fire, to build a half dozen fire proof ash closets to every house in this county. It would be a good move in those insuring propcrty to make such a difference in the rates of insurance, as to cause every person owning property to have these indispensible places in dwelling houses of all sizes. Fire is a very dangerous element and every piccaution should be taken to guard against its ravages. If one should break out in Bridgeton on the windward side of the town, during such high winds as we have had for some days past. there would be but little hope of saving any considerable portion of the town from total destruction. And yet we are living in daily danger of such a result from somebody's ash barrel. Considering that nearly all the town is composed of frame houses, and that nearly all the people use barrels to keep their ashes in, it is somewhat remarkable that the town has not been destroyed before this time. The matter is deserving of a candid con-

Assuming as heretofore, that a cash payment equal to the five per et. up a premium note, had been annually paid by the members, the amount saved by this Company, would now reach the sum of \$86,400, and as the five per ct. paid is less than of 350,400, and as the are per co. part is testimal usual charges made for insurance upon similar property, by any responsible Stock Company, it may be fairly stated at the round sum of \$100,000, which is increasing at the rate of nearly \$18,000 a year, so long as no assessment has to be made. As an evidence of strength existing in the Company, they would call attention to the fact that, if an assessment were made of but five per ct. upon the premium notes, an amount which would scarce the premium notes, an amount which would scarce-ly be noticed by any one paying it, the Tunds of the Company would at once be raised to \$24,000, and if ten per ct. were made, which would not be oppressive to any members, a fund of \$42,000 would be at their disposal to meet any losses for which it were needed.

The subject of renewal of Policies, which now ire about to expire, was taken up, and it was d. emed not advisable that any part of the present fund should be divided in such renewals. It was resolved, that inasmuch as those who were first insured, had incurred greater hazard than was found after the second or third year, and as a rate of premium was charged upon the first issued poli-cies, less than was found expedient afterward, that such now applications that might be made at d new policies issued upon property heretofore in-sured, the risk to the property being the same, should be charged at the rates originally taken. and as almost ever, policy would at the end of the ten years, be found to have changed its form, or applicant might desire to make additions to or al-terations in his insurance, it was thought best for ll parties, that each policy should at its expiration be entirely closed. And as each new one issued ould be free from assessment for one year from ts date, and a fund already on hand would probably prevent resort to assessment for years. they beleive such a course best calculated strengthen the Company and equitably dispose of the funds to all concerned.

roads was ordered to a third reading. Agreed He then moved to reconsider the vote.

Mr. Parry opposed the motion and it was

withdrawn.

He then moved that the bill be indefinitely postponed.

Mr. Parry opposed it because the bill would

prove beneficial to the people of the whole state-this general law. Mr. Rafferty said the motion would not have been made if the bill had not been

amended,-the amendment made here made it a general law. Mr. Parry further opposed the motion. -It was indefinitely postponed, 35 to 23.

Mr. Rafferty offered a resolution that the committee to receive proposals for stationary shall give at least 20 days time, between their first notice of readiness to receive proposals and the final day of receiving them - the bids to be for the entire contract and to be invaribly given to the lowest bidder - the committee to furnish samples and the bids to be published in the Trenton papers.

Mr. F. S. Mills moved to add a proviso that the amount furnished to each member and officer of the House shall not exceed 10 dollars-agreed to and the resolution, as

amended, agreed to. Passed.—To appropriate 80,000 dollars in addition to 40,000 dollars received from the school fund for the support of schools, 52 to 0. Passed. - Supplement to act relative to the business of banking, 23 only for it; to enable banks to wind up their business at the expi-

> Saturday Morning, March 18. SENATE.

The Conference Committee on the Incidenal bill, afterwards reported that the House ommittee agreed to the Senate amendment. Messrs. Bramhall and Swain were appointd a Joint Committee to wait on the Governor, to ascertain if he had any communications to make. They reported that he had no farther communications.

Mr. Congar offered a resolution of thanks to the President, prefacing it with some complimentary remarks. Mr. Alexander responded appropriately.

The Senate having informed the House of its readiness to adjourn, at  $\frac{2}{3}$  o'clock, A. M. relate exclusively to the seizure of the Black of Sa'urday, March 18th. Mr. Hardenburg moved that a committee of conference be appointed on the part of the House to meet the Senate committee.

Mr. Rafferty moved that neither of the persons named in the list handed in by Mr. Perrine be appointed on that committee. He asserted that a paper containing certain names to be appointed on that committee had been handed by Mr. Perrine to Mr. Sitgreaves, Eugrossing Clerk, and by him handed to the in reply to representations of misconduct. Speaker. This conduct on the part of persons ot members of the House he considered ungentlemanly, and the House should not submit to it. He asked the Speaker if that paper

had not been handed him.

Mr. F. S. Mills replied that no paper telling him whom to appoint had been handed to him.

At this time the attention of the members were directed to Mr. Perrine, who moved from the north side of the room to the centre aisle near which Mr. Rafferty sat. It is said by some that the remarks of Mr.

Rafferty were well calculate I to provoke Mr. Perrine, and seemed to justify his resentment on the spot. We do not pretend to justify either party. In a minute's time there was great confu-

sion in the House just behind the seat of Mr. Rafferty, members rushed to that spot, and all was confusion for several minutes. He observed Mr. S. Marshal Nelden, Col. J. C. Rafferty and Col. Rabbitt, with Messrs. Corlies and M. Mills keeping apart Mr. Lewis Perrine and Mr. Rafferty. Every member was on his feet and the greatest excitement prevailed among them, while the Speaker pro tem was rapping constantly for the House to come to order.

Order to some extent, was at length restored, when . Mr. Rafferty said he had been struck in

this House, by Mr. Perrine, a person not a member of the House. Mr. Allen moved that that person be com-

mitted to prison. Mr. Hutchinson moved that the Sergeant at Arms be directed to arrest Lewis Perrine and bring him forthwith to the bar of the House—which was unanimously agreed to.

Mr. Ripley moved that he be excused from further attendance at this session, he did not want to be where there was such a rabble as

hung around this House-not excused. Mr. Rafferty stated that while in his seat Mr. Perriue had beckoned him to come out in the lobby, and he had gone out when Mr. Perrine immediately struck him, without a word being said.

The Doorkeeper walked in with Mr. Lowis Perrine, and reported to the Speaker that he was before the House. Mr. P. took a seat near the clerk's table.

Mr. Beatty moved to suspend the rules to offer a resolution. The rules were suspended, and Mr. Beatty

offered the following:

Resolved, That the Governor be requested to dismiss Lewis Perrine as one of his aids. The resolution was adopted with but one

dissenting voice. The Speaker then presented to the House

Mr. Roberts hoped Mr. Cake's motion would be unanimously adopted. If we, members of this House, were to come from different parts of the State to attend this legislature and to be knocked about by these blackguards, we want to know it, another time we'll come prepared for them.

Mr. Diverty had seen the assault on Mr. Rafferty and it was stated by Mr. M. Mills. He thought that the indignity offered by Mr. Rafferty was the indignity offered to this House, and no apology of this kind could be pect for themselves. Mr. Cake's motion was unanimously adopt-

themselves with all sorts of fun. The incidental bill was passed, 24 to 6. Mr. Hardenburg was appointed on the part of the House to wait on the Governor and inform him that the House was ready to adjourn, if he had no further communication to

make to them. Mr. Hardendurg said the Governor had no further communications to make to the house but he had desired the committee to express the satisfaction he felt, and to congratulate them upon passing so many acts which would add to the public welfare; among them he might mention the acts for a Geological survey; for Legal reform; to promote Teachers' Institutes, and for the legal extinction of the exclusive privileges of the joint companies. tatives, by the Speaker, on Wednesday. To the House of Representatives: - In compliance with the resolution of the House of Representatives of the 10th instant, I herewith transmit a report of the Secretary of State, containing all the information received at the Department in relation to the seizure of the Black Warrior at Havanna, on the 28th ultimo. There have been in the course of a few years past, many other instances of aggression upon our commerce, and violations of the rights of American citizens, and insults to the National Flag by the Spanish authorities in Cuba, and all attempts to obtain rebe sent to Congress. Those now transmitted Warrior, and present so clear a case of wrong, demnity therefor, as soon as this unjustifiable and offensive conduct shall be made known to her Catholic Majesty's government; but similar expectations in other cases have not been realized. The offending party is at our doors with large powers for aggression, but none, it is alleged, for reparation. The source of redress, in another hemisphere, and the answers to our just complaints made to the home government, are but the repetition of excuses rendered by inferior officials to their superiors The peculiar situation of the parties has undoubtedly much aggravated the annoyance and injuries which our citizens have suffered from the Cuban authorities, and Spain docs not seem to appreciate, to its full extent, her responsibility for the conduct of these authorities. In giving very extraordinary powers to them she owes it to justice, and to her friendly relations with this Government, to guard with great vigilance against the exorbi laut exercise of these powers, and in ease of injuries, to provide for prompt redress. I have already taken measures to present to the Government of Spain the wauton outrages of the Cuban authorities, in the detention and seizure of the Black Warrior, and to demand immediate indemnity for the injury which has thereby resulted to our citizens. In view of the position of the Island of Cuba, its proximity to our coast, the relations which it must ever bear to our commercial and other interests, it is vain to expect that a series of unfriendly acts, infringing our commercial rights, and the adoption of a policy threatening the honor and security of these States,

can long consist with peaceful relations. In case the measures take for amicable adjustment of our difficulties with Spain should unfortunately fail, I shall not hesitate to use the authority and means which Congress may grant to insure the observance of our just rights, to obtain redress for injuries received, and to vindicate the honor of our flag. In anticipation of that contingency, which I carnestly hope may not arise, I suggest to Congress the propriety of adopting such provis-ional measures as the exigency may seem to

The experience of twelve years, in conducting Boarding Schools, both in this country and in Asia; gives the Principals no small advantage, in their present undertaking.

Bridgeton is delightfully situated, 'on the Co

nansey Creek, a few miles from its junction with the Delaware, and is easy of access by Steamer of Stage, from Philadelphia, by different lines, daily The town is pleasant and healthful and the society iemarkable for its morality-intelligence an

piety.

The large and commodious building, known as the residence of the late Judge Elmer, has been secured for the purpose, with ample-grounds be-longing to it, and the School Rooms, at the North East corner of Pearl and Commerce streets are engaged temporarily for the School, until a suitable building may be erected.

A limited number of young ladies can be accommodated with boarding, in the family of the Principal, where they will enjoy the advantages of home and the society of their teachers. This limitation will be found to be a great advantage to the boarders, as they will enjoy more personal attention and Parental influence from the Principals than could be expected, in a large and crowded establishment.

for the ladies.

I NFLUENCED by the prevailing law of Fashion, the subscriber continues as heretofore, to pre-Seasons. Taste demands that these fashions shall possess new combinations and exhibit aspirations after new forms and embodiments of the useful and beautiful. The increase of his business affords the most gratifying evidence of the kind appreciation in which his previous efforts have been held. His present offering is a DRESS GAITER, for Spring or Sammer, in the first style of elegance and dis-tinction—being composed of rich and durable ma-terials. While his principal fashion will undoubtedly be acceptable to the general taste, yet in or-der to gratify all, the subscriber has prepared a variety of styles, so that every one, old and young, plain or gay, can select that most becoming for themselves. The Paris style of Gaiter will commend itself for its dress appearance, it being de-

cidedly the Gaiter for the promonade. The subscriber therefore can confidently invite the attention of his friends and the public, to his establishment, giving them the assurance that he dress have led to protracted, and, as yet fruit- is fully enabled to offer articles of his own manuless negotiations. The documents in these facture, at lower prices and of better quality, than cases are voluminous, and when prepared will maintain for his goods the distinguished mark of superiority and relative Cheapness, which alone render them worthy of commendation and appro-

WHOLESALE Book and Stationery House in New York. ON THE CASH PLAN! EXTENSIVE SALES AND NO LOSSES Make it Profitable to Sell at Very Low Prices.

MASON BROTHERS. 23 Park Row, opposite the Astor House, NEW YORK, Offer one of the most extensive Stocks and complete asssortments in the country of BOOKS & STATIONERY

FOR CASH ONLY. The amount of goods in our line purchased by country merchants is usually quite small compare with their dry goods, hardware, and other bils; and this very circumstance absolutely compels jobbers in the book Susiness, who sell on time, to get larger profits in order to make up for the losscs and extra expenses necessarily involved in a credit business of small amounts. It is also easy for the merchant to make arrangements to buy his book bill for eash; though it might not be so con-venient for him to purchase his larger bills in this

way.
Those considerations have led us to adopt in our business, from this date, January, 1854, the following principles, viz: SMALL PROFITS, UNVARYING PRICES, AND TERMS ALWAYS CASH.

Being ourselves the sole publishers of of a number of the leading and most extensively-selling School Books in this country, as well as works in other departments, our facilities are unsurpassed. Call upon us, or send an order, and judge for yourselves, if the saving you can make by buying of us for each is worth while.

Our location is very central, and easily found, Stand on the Astor House steps, and look straight forward across the corner of the Park, and you cannot avoid seeing our signs. Remember, the name is MASON BROTHERS.

THE subscribers would respectfully announce to the public that they have just opened a new SUPERIOR MARL, In Stoe Creek township, near Davis's Mill and or the North side of the road near Reuten J-Ayres dwelling, where they will be prepared to supply marl of a very superior quality in any quantity, and at prices as low as any other bed on Stoe Creek. As the deposit of marl is more than twenty feet n thickness and we only take fourteen feet from the top, we shall sell none of the bottom mark so much dreaded by the farmers. The first ten feet of this marl, contains in great abundance the Perna Maxillata so highly spoken of by Professor Rodg-

ers the state Geologist in his report published some years since. Farmers are carnestly requested to give us call and test for themselves the superior quality of this mart.
