BY KOG WELE, JR.

I'm weeping, brother, weeping By the mound where thou wert laid, Where the willow tree is keeping From the moon his solemn shade. By moonlight oft I wander Mong the protty graves alone, Our death-chilled love to ponder-

Leaning gainst thy silver'd stone. My brother-lowly sleeping, There are flowers o'er thy tomb; And dewy tears I'm weeping In their cups that they may bloom.

Here, o'er thee weeps the willow-My own weeping willow dear,-Whose bright green leaves turned yellow Soon as thou wert buried here.

He lays upon me, brother, Like a friendly hand, his bough; And we dearly love each other-Yea, he is my brother now.

Yon night-bird's mournful twitter, As he swings upon the tree, Is his lamentation bitter That thou art hidden here from me.

I'm lonely, brother, lonely, · For thy voice no more is heard; But I have two friends-two only-They're the willow and the bird.

### DIOIRAID.

From the New York Recorder. A PEEP AT THE FIVE POINTS.

There are many strange sights in this mor

tal world, looking up n which awakens within the heart stranger emotions. A summer landscape, smiling beneath an evening sun, is beautiful exceedingly; gazing into the stormy sky, from a ship's deck, upon the broad ocean fills the soul with emotions unutterably grand and peoping into wretched hovels, crowded in and leading forth their sinful inmates to a angelic, making the heart thrill with love .-Such spectacles are worth seeing, and the last most of all. Nowhere is the exhibition more perfect and glorious than at the Five Points. A week or two ago we had the pleasure of spending Sunday with Mr. Pease. There, in the very nest of destitution and vice, this devoted minister having established himself reformation is progressing which we pray may sweep away entirely the plague spot. Never sembled multitude of children—some pale pressed by loving hands, and little mementoes and sickly, and many bright-eyed and joyous -sang hymns with sweet voices, all in uni-sesses the power to stir up the deep feelings son surely with angels' songs around the of my heart as does this little lock of hair. great throne in heaven. We believe that Mr. Pease, by his untiring energy and earnest piety, is accomplishing as much good in the very heart of New York as any one missi mary in any foreign field; and we think, too, that he has struck out the true idea of reform, which Christ himself exemplified, in dispensing physical as well as spiritual blessings.

Several houses are now occupied by Mr.

Pease's establishment, containing, we suppose some three or four hundred inmatas. The school with its different classes, is exceeding, ly interesting; and we were struck by the attachment and obedience which the children manifested towards Mrs. Pease, though indeed they could not fail to love her gentle manner and amiable disposition. Every thing seemed in order and neatness, as much as the arrangement of the buildings would permit.

We trust this noble enterprise may receive the hearty sympathy and support of the publie as it deserves; and, above all, that it may be blessed to the salvation of many souls.

From the British Banner. A Million Testaments for China.

It may be interesting to our readers to

know what steps are being taken to accom-I lish this noble unertaking. The work is al-ready in progress. The printing presses in China are busily employed. Letters have been received by the Bible Society from their tured for printing 250,000 copies in China in eighteen months, dating from the 1st of January, 1854. The Bishop of Victoria guarantees to furnish from his stations, 85,-000; Dr. Mcdhurst, 115,000; Dr. Legge, 50,000. It is proposed that another quart r of a million should be printed in London in the same period, for which wooden blocks will be sent from China. Thus half a million will be ready in eighteen months, and if a similar expedition be employed on the remaining portion of the work, the whole will be completed in three years, a much shorter time than had been anticipated. All English missionaries are working most heartily and lovingly, in carrying out this gigantic scheme of Christian liberality. It will no doubt give great satisfaction to the public, when they are informed that the Committee of the Bible Society have passed a resolution for the lyrical authority for stating that printing of 50,000 copies of the entire Bible in Chinese at as early a period as practicable. The funds for the New Testament have been readily supplied, nor can it be doubted that the Bible Society will receive prompt and gencrous aid to carry out this new feature of their plan for supplying China with a large instalment of the word of God.

## Where are your Children Educated.

This is a question which, we fear, many parents are not sufficiently concerned about We have often thought that if parents in this city could follow their children and take note of all the objects that attract their eye, and learn these things, they would soon come to the conclusion that the school to which they send their children performs but a small part of the task of educating them.

Some citizens' children are taking lesson every day at the rum grocery, to which they are sent to purchase articles of consumption for the family. There they see the mysteries of the bar in the dark corner, and witness the drinking, and hear the coarse and vulgar jest and witticism, and the profane swearing and blasphemy. There, also, they are sometimes taught by the barkeeper to take a little sweetened liquor, as a reward for their custom, or to attract them to continue their visits; and then they are taught to conceal from their parents the fact that they were tempted with drink. And thus in a little while the child crave a regular supply. Here too, he learns to smoke, chew, swear, &c., and all this while the unsuspecting parents imagine that their child is merely performing a useful service for

the family in purchasing groceries, &c. And then in other cases how largely the groups of bad, corrupt and profane boys in he streets contribute to form the manner and principles of children on their way to their rictory.

Be not discouraged. To the advocates of tainted mind, with vicious ideas, which may great place.

Father, mother, pause a moment, and consider the question with which we began this article, "Who is Educating your Children?" It should be your great business, but are you attending to it, or have you relinquished the formation of their character and destiny to the external evil influences which surround them continually?

Rev. W.B. Gillett's Lecture on New Jersey . (CONCLUDED.)

I well recollect an anecdote often related by my grandfather who was a Patriot in the revolution, he lived in Middlesex County, and the British army were encamped during the Winter near his house, and the officers were intimate with himself and family. A captain calling the next morning after the memorable battle at Princeton, -my grandfather enquired "what news captain." "O, bad news, had news." I was one of that number; during the night I observed a number collected together listening to an old Revolutioner, who was telling his old war stories, such as always interest children, I soon became one of the listening company. A man just at that time passing by and hearing the conversation, stopped and said, "Old Dad, who are you? who are you? Are you an American? was you born in the United States? The old man immediately turned around with clentched fists and said. "No Sir-ee. I am not an American. I was not born in the United States I will have you know; I am a Jerseyman, I sir. I will let you know that I was not born in the United States. I am a true Jarsevman." I concluded that that man gloried in the place that gave him birth.

#### From the Scientific American. The Darien Ship Canal Expeditions.

Reports from both the Atlantic and Pacific expeditions across the Isthmus of Darien, to explore the country for a ship canal, have been received. The result of these observations is, that the proposed route is a continuous chain of mountains, with summits of four thousand feet. One portion of the Atlantic party is still on the way to the Pacific. The construction of the canal, according to these reports, is utterly in practicable; but whether the explorations were as thorough as they might have been, does not yet appear. Mr. Kennish, one of the canal engineers on the Pacific side of the expedition, says:

"I refrain from expressing my opinion as to the practicability of this route for a canal, because I'do not consider our data sufficient to allow me to arrive at any conclusion worthy of public confidence, even though I believe that the expedition I had the honor to accompany explored further and with more detail than any other individual or party before the present time."

The expedition was composed of a detachment of engineers sent out by the govern-ments, of the United States, France, and England. The construction of a ship canal, through the Isthmus, seems to be imprectica-ble; the expedition has been successful in settling this point—a very important one.

#### To the Patrons of the Pioneer.

With the restless and ever changing population of this country, the discontinuance of business or social relations, is of so frequent occurrence as to occasion but little attention or interest to the community. Still, when that business has been of a public nature, it has become the proper and time honored custom to announce publicly its termination .-With such a purpose, declaring the dissolution of the connection between the patrons of VAN MULLER; revised and brought down to the Pioneer and myself is this article written. Something more than a year ago I became

in its editorial management. In entering upon the duties of the office, it was but natural that a feeling of distrust and want of experience should be felt. At the same time a determination to express opinions frankly and freely upon all questions of public interest, was publicly expressed. Whether that pledge has been fulfilled as under all the circumstances it should be, is for you to judge. It is sufficient for me to know that I feel no consoiousness of having neglected any important question of general local interest, or of having omitted to advocate whatever I believed most conducive to the public good, unbiassed by personal political views. The duties of an independent journalist frequently require the declaration of unwelcome truths; hence occasional differences of sentiment arise, leading to a discontinuance of support.

That the editors of the Pioneer have had no cause of complaint from this source, the important and gratifying fact, that during the past year the names of two hundred paying subscribers have been added to the list, notably canvassed, is the best kind of an illustraproprietor of the Pioneer, that his subscriprank of country weeklies in the state, and at which resolutions were passed declaring Emu at Kingston, near Dublin, and also in to his patrons, that they are receiving one of that as the Senate had repealed all compromthe largest papers in the state furnishing week- ises heretofore adopted by the Congress of ly fourteen columns of selected and original the United States, they were justified in dematter besides an equal amount of local im- claring the slave catching law of 1850 dis- the regiments which accompanied the thirtyportant advertising, for the very small amount of one dollar per year. That such a paper, free as it is from immoral taint, should be and is so extensively patronized by the entire community, is creditable alike to both publisher and citizens. In expressing opinions, it has ever been an aim to avoid giving just cause of offence, even when called upon to rebuke falsehood and hypocrisy. If however in the nnavoidable haste of preparing matter for the press, any language justly offensive has been used, I ask that it may be buried in the oblivion of forgetfulness.

To the press sincere and heartfelt thanks are due for many acts of editorial courtesy. From those in the office, I part with regret and the kindliest feelings.

Patrons of the Pioneer! Deeply grateful for the many acts of personal kindness extended to me editorially and socially-proudly cherishing the many pleasant acquaintances formed during the past year-highly prizing the amicable and friendly relations sustained with each through an extensive and frequent intercourse as forming an important and never to be forgotten epoch in my personal history, always my sincere wishes for your future prosperity, Farewell!! JOSEPH A. MILLER.

New Use for Guano. - One of our exchanges states that remarkable cures of cutaneous diseases have followed the use of Guano.-One drachm of guano, with one ounce of lard is recommended as a good ointment. This remedy has the advantage of being easily applied. The patient has but to sow guano on see it recommended to try stable manure when guano cannot be readily obtained. From the large amount of ammonia contained in these articles we should suppose that their tendency would be more to irritate and excite such diseases than to effect a cure. Some diseases however may require such a treatment, in this day of progress it don't do to undervalue new discoveries. If the ladies approve these

Farmers are cautioned against being deceived by the boasts made of the London Exhibition Medal. With regard to the premature award of that Medal the facts are these: The Medal was awarded to McCormick without fair competition his machine was managed by an experienced hand, sent from America, while mine was without any one to manage it except common laborers, picked up in Loudon in my absence; laborers who knew nothing of its operation. My machine was wrongly adjusted for the work, and used in a most blundering manner, every man in the field were total strangers to it. It was on such a one-sided and partial trial that the Medal was disposed of. It must be clear to every reflecting mind, that no fair trial could be made under such gircumstance On my arrival in England both machines were put into the hands of the Cleveland Agricultura Society, in consequence of a challenge given by McCormick's party and accepted by me, that the two machines might be deliberately proved by the Farmers of England, instead of an Exhibition Ju-ry, who had too much on their hands to allow them o make such an important trial in a proper man

The Cleveland Agricultural Society, of which the Earl of Zeiland is President appointed a jury of twelve of the first farmers of the country, whose award was most decidedly in favor of my Machine and no decision was ever more heartily concured in by the whole community. This is well known all over England and the Continent, and is coninformed by all Americans returning to this country, informed of the facts.

My great victory in England is fully sustained by the testimonials of practical farmers in this country, who have had long experience with both Machines.

Cumberland Mutual Fire Insurance Company. THE annual meeting of the members of the Cumberland Mutual Fire Insurance Company s held at the Hotel of E. Davis & Son, i Bridgeton, on Monday the 13th day of March 1854

LEONARD LAWRENCE, Esq., Chairman. Directors Reported as follows:
A continued accession of members and strength the Company during the past year, which is the tenth since organization, and very favorable success, with but one loss paid, and they have now a better cash fund than at either of the two previous annual meetings.

The increase of the Company during the year has been 246 Policies. Insuring amt. \$267.587 Premium notes They have now outstanding 2,728 Policies. Insur-

\$2,845,981 ing the amount of Premium notes deposited Cash funds. Invested on bond and mortgage Endorsed note

714 35 \$5,904 85 and sec. The expenses of the year past have been \$348 .-71, of which a considerable part had been for blanks &c., enough to last for several years. The Interest money received has been \$325 11

The only loss paid during the year was \$1,692 and one small claim not yet adjusted. Since commencement of issuing of policies, there \$19,301 71 has been received Premiums There has been paid for losses 15,150 80

1.576 11 Expenses The interest money having paid all expenses Assuming as heretofore, that a cash payment equal to the five per ct. upon premium note, had been annually paid by the members, the amount saved by this Company, would now reach the sum of \$86,400, and as the five per ct. paid is less than repul charges made for incurrence upon similar

usual charges made for insurance upon similar property, by any responsible Stock Company, it may be fairly stated at the round sum of \$100,000, which is increasing at the rate of nearly \$18,000 year, so long as no assessment has to be made As an evidence of strength existing in the Com pany, they would call attention to the fact that, if n assessment were made of but five per ct. upon the premium notes, an amount which would scarce ly be noticed by any one paying it, the funds of he Company would at once be raised to \$24,000,

and if ten per ct. were made, which would not be oppressive to any members, a fund of \$42,000 uld be at their disposal to meet any losses for which it were needed. They cannot but feel a just pride, that an Institution so successful in its operations and of so es-sential benefit to the community, has thus far been under their direction, and would offer to extend

ts protection on terms as heretofore. Proceeded to Election of Directors, when the ollowing named persons were chosen:— Benjamin Sheppard, Greenwich; Jacob Harris, toadstown; Dr. Jacob W. Ludlam, Deerfield; Daniel L. Burt, Esq., Fairton; Dr. Leonard Lawrence, Cedarville; Dr. Wm. S. Bowen, Bridgeton; David P. Elmer, do.; Isaac A. Sheppard, do.; Nathan L. Stratton, do.; Francis G. Brewster, do.; D. A. F. ph, do.; Jonathan Elmer, do.; Isaac West,

James Stiles, Esq., do.

At a meeting of Directors, held after election the following officers were chose BENJAMIN SHEPPARD, President.

HENRY B. LUPTON, Secretary.

Executive Committee David P. Elmer, Isaac heppard, Jonathan Elmer, Lewis McBride. The subject of renewal of Policies, which nov The subject of renewal of Policies, which now are about to expire, was taken up, and it was deemed not advicable that any part of the present fund should be divided in such renewals. It was resolved, that inasmuch as those with were first insured, had inquired greater hand than was found after the account or third year, and as a rate of premium was charged upon the first issued policies, less than was found expedient afterward, that such new applications that might be made and new policies issued upon property heretofore interations in his insurance, it was thought best for all parties, that each policy should at its expiration be entirely closed. And as each new one issued would be free from assessment for one year from ts date, and a fund already on hand would probably prevent resort to assessment for years. They beleive such a course best calculated to strengthen the Company and equitably dispose of the funds to all concerned.

The Insurance to the first members has not but about five cents per annum on the \$100 insured on all common kinds of property. AGENTS AND SURVEYORS: Doct. James Loper, Millville.

FOR THE LADIES.

NFLUENCED by the prevailing law of Fashion, the subscriber continues as heretofore, to preent new fashious at the opening of the various Seasons. Taste demands that these fashions shall possess new combinations and exhibit aspirations a ter new forms and embodiments of the useful and beautiful. The increase of his business affords the most gratifying evidence of the kind apprecia-tion in which his previous efforts have been held. His present offering is a Dress Gaiter, for Spring or Sammer, in the first style of elegance and dig-tination—being composed of rich and durable mater.als. While his principal fashion will undoubtedly be acceptable to the general taste, yet in or der to gratify all, the subscriber has prepared a variety of styles, so that every one, old and young, plain or gay, can select that most becoming for the asslve. The Paris style of Gaiter will commend itself for its cress appearance, it being decidedly the Gaiter for the promenade

The subscriber therefore can confidently invite the attention of his friends and the public, to his establishment, giving them the assurance that he is fully enabled to offer articles of his own manufacture, at lower prices and of better quality, that are usually met with. It will ever be his aim to maintain for his goods the distinguished mark of superiority and relative Cheapness, which alone render them worthy of commendation and appro-

The amount of goods in our line purchased by country merchants is usually quite small compared with their dry goods, hardware, and other hills: and this very circumstance absolutely compel jobbers in the book Susiness, who sell on time, to get larger profits in order to make up for the losses and extra expenses necessarily involved in a credit business of small amounts. It is also easy for the merchant to make arrangements to buy his book bill for cash; though it might not be so convenient for him to purchase his larger bills in this
