

BRIDGETON: Saturday Morning, Nov. 11

CIRCULATION 1300

Only \$1 00 per Year!

FRANKLIN FERGUSON, Editor.

Notice to Agents and Advertisers.

WE ARE PREPARED TO SHOW THAT

The West Jersey Pioneer

Has a Circulation of at least 800 more than any other paper printed in Cumberland County.

Its Circulation, (in the County,) is nearly double that of any other paper.

This notice is called for in self-defence. The "Baltimore Chronicle" lately conveying the impression, that its Circulation is larger than that of the Pioneer.

Our readers will hardly look for much in our editorial columns this week, — the excitement incident to a warmly contested election, the time necessarily taken up in collecting and preparing the returns from different places, and the interruption caused by the concourse of anxious enquirers after the news during the week, they will at once admit is sufficient excuse for the barrenness of our paper of editorial matter. To set down under such circumstances and write an article upon any subject other than politics is out of the question and ought not to be expected.

Of the election we may say that all parties are to some extent disappointed, yet all we suppose something of to boast, and as we suppose our country is safe we may all rest tolerably well satisfied until another opportunity is afforded to renew the contest. Strange things have occurred in our County during the contest, and strange combinations of different characters and if it was consistent with the character of our paper, an amusing and curious history might be written of the doings of politicians; we are not, however, disposed to enter into such an undertaking, but advise our fellow citizens to settle down in quietness, recruit their strength, and be prepared when the time comes for the next campaign.

FIVE PER CENT SAVING FUND.—We have before directed and now again direct the attention of our readers to the notice of the Saving Fund in Walnut Street, South-west corner of Third St. Philadelphia. This in an old and well established Institution which has more than half a million of dollars securely invested for the benefit of depositors and is worthy of entire confidence. People who have large sums put their money in it on account of the superior security it affords.

Our readers will observe, that McCowan & Harding, are prepared to furnish neat, cheap, and substantial fashionable clothing, and are always happy to supply the wants of their customers; Shop, in Commerce Street, opposite J. B. Potter & Co's. Store.

The NATIONAL MAGAZINE, for November, is on our table. It is fully equal to any of its predecessors in the beauty and variety of its illustrations, the interest of its articles and the neatness of its mechanical execution.

For sale by S. PARKER. Price 19 cts.

Within a few years, marble has been applied to innumerable uses, from handsome grave-yard monuments to simple work-stand tops. Mr. Claypoole does a large amount of marble work. He uses none but the nicest stone, is a good workman, and in the matter of prices, gives general satisfaction.

We have received the fourth number of the "Illustrated Hydropathic Review," from Messrs. FOWLER & WELLS, of New York, this number completes the first volume, and closes the career of the REVIEW. It is not, however, dead, but changed. Though its form is discontinued, its matter and spirit will appear in another—probably a better—shape. A new weekly paper, entitled "Life Illustrated," has already made its appearance, its typographical execution is of a superior order; it is about the size of the Pioneer, and contains twenty-eight columns of original and selected matter of the most interesting character, published at two-dollars per annum by FOWLER & WELLS, No. 308 Broadway, N. Y. Persons wishing to subscribe need not fear this new enterprise will not succeed. These enterprising publishers have both the ability and means to succeed and they never fail in their undertakings. The November No. of the "Water Cure," and the "Physiological Journal," by the same publishers, have been received, they still continue to increase in interest.

Bank Panic in Ohio.—Cincinnati, Nov. 8.—The banking house of Ellis & Sturges was closed this morning. A statement of their affairs states their liabilities to be \$1,000,000 and the assets \$400,000. A heavy run is going on at the banking house of T. S. Goodman & Co., and on the Citizens' Bank. An immense excitement has been caused, and the holders of notes are endeavoring to have them cashed.

1 o'clock. The Citizens' Bank has been closed and the excitement is increasing. The excitement in Third street continued all the afternoon. Messrs. J. S. Goodman & Co., and John B. Morton & Co. were compelled to close. Their doors shortly after 2 o'clock; in consequence of the run made upon excess of liabilities. These were a run upon the house of Hays & Landon, but they continued to meet all demands up to 2 o'clock; however, there was no transacting business.

Table with columns for various categories and numerical data.

CAPE MAY COUNTY.

Table with columns for various categories and numerical data.

By Telegraph—Thursday, Nov. 6.

The result for members of Congress in the whole State—

Table with columns for District, Name, and Party.

It is believed the Whigs will have a heavy majority in the Legislature.

New York, Nov. 10.—8 o'clock.—The returns received up to this hour show a vote for Seymour for Governor of N. Y., 90,000, Ulman, " " 91,000, Clarke, " " 42,000.

Returns from Chatham County show a majority of 3,400 for Ulman.

Raymond has been curiously chosen. East. Gov. unless Seymour's majority reaches 49,000.

Congressional delegation will consist of 30 or 32 Anti-Negro members, of whom 28 are Whigs.

The Legislature will be largely Federal Whig.

We shall correct, if there are errors, when we receive the official vote.

We have before us the first Number of the "Herald of Freedom," published at Council City Kansas Territory by G. W. Brown & Co. The Herald is a large and finely printed sheet, and the number before us contains a vast amount of useful information in relation to the new territory. The creed of the Herald is advocacy of the greatest amount of Human Freedom, and opposition to wrong in all its forms. The Editor speaks in this view in his leading articles.

Our great object is to make Kansas a free State; and to that end we shall labor by encouraging emigration. It is not our purpose to engage in a crusade against our southern brethren, nor upon their legitimate sphere.—Our field is Kansas, and here we shall labor, and here shall we erect upon the altar of Liberty.

With the Declaration of American Independence in one hand and the Constitution of the Republic in the other we engage in a defensive warfare for the Right. We firmly believe that victory will crown the effort of the Sons of Freedom; but the struggle will be long and arduous. We may be stricken down at first but not defeated.

With this simple declaration we launch our humble barque upon the wide sea of public opinion, and trust that propitious winds and favorable currents may guide us swiftly to our destined port.

With the prayers of freemen everywhere fanning the sails of this gallant barque, who can doubt that victory's own sunlight will glow upon the flag fluttering at its mast-head?

Tunneling the Ohio.—The contemplated tunnel under the Ohio river at Louisville, Kentucky, and Jeffersonville, Indiana, will be exclusively for railway purposes, with a double track, adapted to the use of all the roads of the different ganges. It will be 28 feet wide in the clear, and seventeen feet high perpendicularly from the centre of each track. The working will be sixty feet less than two miles in length. The ascending grades into the tunnel, at either end, will be only eighty feet per mile on a straight line. From the head of the grade on one side to the head of the grade on the opposite side of the river will be two miles and a half. The tunnel will be constructed in the river by excavating a channel or pit in the rock, and working over with the materials excavated—limestone rock of the best quality. The work has been surveyed, and the cost estimated at one million two hundred thousand dollars. It is proposed to raise this sum by a subscription, no part of which is made payable until the whole sum is subscribed.

Accidental Homicide.—A party of young men started from Cincinnati on a hunting excursion. In the afternoon three of the party named Buchan, Brown, and Gowden, agreed to shoot at a mark for the proceeds of the day's hunt, and Mr. Thompson was umpire. After they had shot, Mr. T. went to examine the mark, where Buchan missed his gun and said, "I think I would shoot him right through the head." With the words he pulled the trigger, thinking that his piece was not cocked, but to his consternation the gun went off and Thompson fell dead, the whole charge entering the back part of his head.

Bank Broken Banks.—The Bank of Hallock, Maine; the Ship Builders' Bank, Maine; the Brunswick Bank, Maine; Leonard's Bank Note List, outside its subscribers to holders of the new notes of issue all the Maine, Vermont, Rhode Island, N. Y. State Bank notes, and Western Bank notes, as well as those which notes are sent by Virginia, Louisiana, Pennsylvania, and southern banks generally, as that species is completely rejected, and they cannot, in the face of the general prejudice, continue to be used. It is now ascertained that there is a conspiracy of the general press, against the issue of the new notes of the State of Georgia, which have been issued from Atlanta.

Continued from page 1.

to which he had generally been treated with little respect. A perpetual war seems always to prevail between the government and the dissenters. The papers are filled with intelligence of robberies and murders, with a few exceptions which are the result of the vigilance of the police. In many instances they do not make their arrests in open day, and in some numbers as to set all authority at defiance. On the 28th of September, a band of between forty and fifty attacked a hacienda within three leagues of the town of Tepic, and after plundering the house and murdering the overseer and six others, set fire to and burnt down the dwelling and all the outbuildings. The diligences between the city of Mexico and Guajuato were robbed twice, the last time a month ago; that between Tepic and Mexico was also lately robbed. These more of the assassinations of the Count Cassato have been sentenced, though the punishment is not yet known. With regard to Mexican politics, the safest plan is to believe nothing which appears on either side.—Ledger.

The Affair at Greytown.—The difficulties which led to the bombardment of that unfortunate city, are, says the Philadelphia Ledger, probably now in the course of settlement. They will not again occur, if the negro population in that place is kept in check, by the residence of white men known to be favorably disposed toward the United States, or citizens of our country. Such a preventive measure would seem a timely step, and we learn that the idea is about to be realized by an American settlement of the mosquito coast on a large scale. A distinguished Senator of the United States, who earned a wide-spread military renown during the Mexican war, is to be the author of the enterprise, and a few weeks will suffice to make all the necessary arrangements for his immediate departure for the scene of action. As Americans burned the city of Greytown, there seems to be an eminent propriety in the resolution to rebuild it by the hands of Americans, and by permanently improving it, to impress upon it the American character. What if the main street of the town were to extend west to the Pacific Ocean!

The most extraordinary collection in this country to be seen in the copyright bureau of the Department of State. This collection is made up of a single specimen of each musical composition which has been issued in the United States for the past third of a century, for which a copyright has been secured—being required by law that a single copy of each work thus copyrighted shall be deposited in the Department of State. The immense mass of music which has thus accumulated, has recently been arranged, and neatly and substantially bound. The result is beheld in one bound, and twenty thick volumes—sixty volumes of music—each volume containing at least three times the quantity of music usually comprehended in volumes of the kind averaging some two hundred and fifty pages in each volume, or thirty thousand pages in the whole; averaging also, more than sixty pieces in each volume, or nearly one thousand in all; thus making an aggregate of more than three hundred volumes of vocal and instrumental music of the size usually seen on piano fortes.

Emperor Santa Anna.—His serene Highness, it seems, is about to be proclaimed Emperor of Mexico. We shall then have three Emperors in the New World, Don Pedro, of Brazil, who inherits his crown, and Maximilian, of Hayti, who created his own; and the Empire of Mexico—that is to be—and its resources, we apprehend the monarch that is to be, will have but a short time in which to enjoy his new made honors: He may be able to strut like a peacock for a twelvemonth or so. The last mail from Mexico informs us, on account of the ten million dollars treaty, is nearly all expended. Mexico's total balance of \$1,500,000 has just been appropriated with a Mexican banker. The revolution is not yet stayed, and the army and the people are discontented. The army amounts to about fifty thousand men, including officers, which gives, at the lowest calculation, an annual expense of \$18,000,000; taking the remaining disbursements to be \$10,000,000, will make an expenditure of \$28,000,000, and the revenues cannot amount to over \$10,000,000. So unpopular is the military service; that nearly all the farms of the interior are already without laborers, because they take to the mountains and live upon roots, rather than become soldiers.

A Point of Law.—A nice question of law has arisen on the will of Mr. Gale, of Worcester, Mass, who with his wife and only child was lost by the sinking of the Arctic. Mr. Gale, before starting for Europe left a will with a friend. After certain legacies to friends and relatives, he bequeathed the residue of his property to his wife and child, or children; if his wife should survive him, but no child or children, then all his property to her. The question is now raised by the lawyers, who perished first, Mrs. Gale or the child? The Worcester Transcript says: The Roman law always entertained this conclusive presumption, that of several persons, the youngest, if a child perished first; if an adult, that he survived the old and feeble. The presumption of our law is rather that, where no special circumstances are proved, all are supposed to have perished together.

Rev. Henry Ward Beecher delivered a sermon on the recent disaster to the Arctic, and in the course of his remarks he stated upon the authority of individuals deeply interested in the subject, that about twelve thousand of those on the less and rivers, have been lost. During the same length of time, the number lost all over the world, was ten thousand. The loss to the year 1850, the average number paid by the Marine Insurance Companies in New York last year amounted to twelve millions; the loss on land by railroad, and otherwise, amounted to eighteen millions, making the total loss by sea and land to be thirty millions of dollars.

Another Terrible Catastrophe.—Following close upon the frightful disaster upon the Great Western railroad in Canada, whereby nearly one hundred persons were either killed outright, or shockingly wounded, we have to record another, equally disastrous. On Wednesday, at midnight, a train on the Rock Island railroad, when near Minnoka, ran over a trestle, breaking the ribs of the engine, and killing and wounding several of the forty first-class passengers. Many of the first were so dreadfully scalded that no hope was entertained of their recovery.

The Canadian and Pennsylvania Railroad Company have surveyed a line from Camden to Freehold, and have announced the right of way to the land holders, which is to be opened by the end of the year. The road is to be built, sometimes along the shore, and sometimes inland.

It is now ascertained that there is a conspiracy of the general press, against the issue of the new notes of the State of Georgia, which have been issued from Atlanta.

The loss to the year 1850, the average number paid by the Marine Insurance Companies in New York last year amounted to twelve millions; the loss on land by railroad, and otherwise, amounted to eighteen millions, making the total loss by sea and land to be thirty millions of dollars.

Another Terrible Catastrophe.—Following close upon the frightful disaster upon the Great Western railroad in Canada, whereby nearly one hundred persons were either killed outright, or shockingly wounded, we have to record another, equally disastrous. On Wednesday, at midnight, a train on the Rock Island railroad, when near Minnoka, ran over a trestle, breaking the ribs of the engine, and killing and wounding several of the forty first-class passengers. Many of the first were so dreadfully scalded that no hope was entertained of their recovery.

The Canadian and Pennsylvania Railroad Company have surveyed a line from Camden to Freehold, and have announced the right of way to the land holders, which is to be opened by the end of the year. The road is to be built, sometimes along the shore, and sometimes inland.

It is now ascertained that there is a conspiracy of the general press, against the issue of the new notes of the State of Georgia, which have been issued from Atlanta.

Continued from page 1.

to which he had generally been treated with little respect. A perpetual war seems always to prevail between the government and the dissenters. The papers are filled with intelligence of robberies and murders, with a few exceptions which are the result of the vigilance of the police. In many instances they do not make their arrests in open day, and in some numbers as to set all authority at defiance. On the 28th of September, a band of between forty and fifty attacked a hacienda within three leagues of the town of Tepic, and after plundering the house and murdering the overseer and six others, set fire to and burnt down the dwelling and all the outbuildings. The diligences between the city of Mexico and Guajuato were robbed twice, the last time a month ago; that between Tepic and Mexico was also lately robbed. These more of the assassinations of the Count Cassato have been sentenced, though the punishment is not yet known. With regard to Mexican politics, the safest plan is to believe nothing which appears on either side.—Ledger.

The Affair at Greytown.—The difficulties which led to the bombardment of that unfortunate city, are, says the Philadelphia Ledger, probably now in the course of settlement. They will not again occur, if the negro population in that place is kept in check, by the residence of white men known to be favorably disposed toward the United States, or citizens of our country. Such a preventive measure would seem a timely step, and we learn that the idea is about to be realized by an American settlement of the mosquito coast on a large scale. A distinguished Senator of the United States, who earned a wide-spread military renown during the Mexican war, is to be the author of the enterprise, and a few weeks will suffice to make all the necessary arrangements for his immediate departure for the scene of action. As Americans burned the city of Greytown, there seems to be an eminent propriety in the resolution to rebuild it by the hands of Americans, and by permanently improving it, to impress upon it the American character. What if the main street of the town were to extend west to the Pacific Ocean!

The most extraordinary collection in this country to be seen in the copyright bureau of the Department of State. This collection is made up of a single specimen of each musical composition which has been issued in the United States for the past third of a century, for which a copyright has been secured—being required by law that a single copy of each work thus copyrighted shall be deposited in the Department of State. The immense mass of music which has thus accumulated, has recently been arranged, and neatly and substantially bound. The result is beheld in one bound, and twenty thick volumes—sixty volumes of music—each volume containing at least three times the quantity of music usually comprehended in volumes of the kind averaging some two hundred and fifty pages in each volume, or thirty thousand pages in the whole; averaging also, more than sixty pieces in each volume, or nearly one thousand in all; thus making an aggregate of more than three hundred volumes of vocal and instrumental music of the size usually seen on piano fortes.

Emperor Santa Anna.—His serene Highness, it seems, is about to be proclaimed Emperor of Mexico. We shall then have three Emperors in the New World, Don Pedro, of Brazil, who inherits his crown, and Maximilian, of Hayti, who created his own; and the Empire of Mexico—that is to be—and its resources, we apprehend the monarch that is to be, will have but a short time in which to enjoy his new made honors: He may be able to strut like a peacock for a twelvemonth or so. The last mail from Mexico informs us, on account of the ten million dollars treaty, is nearly all expended. Mexico's total balance of \$1,500,000 has just been appropriated with a Mexican banker. The revolution is not yet stayed, and the army and the people are discontented. The army amounts to about fifty thousand men, including officers, which gives, at the lowest calculation, an annual expense of \$18,000,000; taking the remaining disbursements to be \$10,000,000, will make an expenditure of \$28,000,000, and the revenues cannot amount to over \$10,000,000. So unpopular is the military service; that nearly all the farms of the interior are already without laborers, because they take to the mountains and live upon roots, rather than become soldiers.

A Point of Law.—A nice question of law has arisen on the will of Mr. Gale, of Worcester, Mass, who with his wife and only child was lost by the sinking of the Arctic. Mr. Gale, before starting for Europe left a will with a friend. After certain legacies to friends and relatives, he bequeathed the residue of his property to his wife and child, or children; if his wife should survive him, but no child or children, then all his property to her. The question is now raised by the lawyers, who perished first, Mrs. Gale or the child? The Worcester Transcript says: The Roman law always entertained this conclusive presumption, that of several persons, the youngest, if a child perished first; if an adult, that he survived the old and feeble. The presumption of our law is rather that, where no special circumstances are proved, all are supposed to have perished together.

Rev. Henry Ward Beecher delivered a sermon on the recent disaster to the Arctic, and in the course of his remarks he stated upon the authority of individuals deeply interested in the subject, that about twelve thousand of those on the less and rivers, have been lost. During the same length of time, the number lost all over the world, was ten thousand. The loss to the year 1850, the average number paid by the Marine Insurance Companies in New York last year amounted to twelve millions; the loss on land by railroad, and otherwise, amounted to eighteen millions, making the total loss by sea and land to be thirty millions of dollars.

Another Terrible Catastrophe.—Following close upon the frightful disaster upon the Great Western railroad in Canada, whereby nearly one hundred persons were either killed outright, or shockingly wounded, we have to record another, equally disastrous. On Wednesday, at midnight, a train on the Rock Island railroad, when near Minnoka, ran over

Bridgeton Female College.
ROBERTSON, N. J.
THIS Institution, chartered with Collegiate powers and privileges, is pleasantly situated on the bank of the Delaware River, near the grounds of the late John H. Brakley. It is located immediately on the Railroad between New York and Philadelphia, about thirty miles from the former place. The course of instruction is thorough, and the young ladies who complete the course of study according to the provisions of the charter, are prepared to enter any of the leading universities in this country.

Pennington Female Institute.
The 21st Session of this Institution will commence August 31st, 1854. C. Wesley Bonn, D. C. Pennington, Proprietor.

PENN MEDICAL UNIVERSITY OF PHILADELPHIA.
THIS University has abolished the annual recitation, and substituted a more liberal and comprehensive system of instruction, embracing all the branches of the medical profession, and much more extensive studies, as demanded by our age. Medicine is taught in 24 branches, and distributed according to the natural order of dissection, over a Course of Lectures, and Practical Exercises, held during 2 years, by 12 Professors and 3 Demonstrators. Studies are more than ever made agreeable, every branch fully acquired, serving to illustrate, and furnish branches. Lectures commence Oct. 9th, 1854, and continue four months.

STOVES, STOVES!
WE the undersigned, would respectfully call the attention of the public to our superior assortment of Stoves, Cast Iron, and Sheet Iron, the superiority of our Stoves, above all others is so well known, that we deem it unnecessary to enter into details of them.
