PROHIBITION IN ILLINOIS.—It is now pretty clearly ascertained, that the Prohibi tory Law submitted to the people of Illinois, has been defeated. But while the friends of Prohibition have reason to deplore this result, it is attended in some measure with grounds of encouragement and comfort. Is it not a remarkable fact, that as it was in guns having fallen into hands of French. TALL CORN PLANTING.—From a western paper, we learn, that a new machine has repently been invented to facilitate the planting of corn. It has been tried with astonishing success. The following is the statement: o'clock by Rev. W. Kenney, of Philadelphia, On the 25th of May, Ira Cummings of Rockford Ill, planted twenty acres in corn with Jones & Randall's Hand Planter. The anity. machine was worked by one man, fifty-one years of age. The last acre of the 20 was accomplished in just 27 minutes, or at the rate of 100 hills per minute. The seed was well, it was thought by the best judges, as it could have been done with the hoe. New Jersey farmers, what say you to that?

THE AMERICAN FLAG.

It may be interesting to our readers, just low, to learn something respecting the origin of the American Flag. In March 1775, "a union flag with a red field" was hoisted at New York upon the liberty pole, bearing the inscription-"George Rex and the liberties impression, that its Circulation is larger than of America," and upon the reverse—"No that of the Pioneer. A Teachers Institute in Cumberland Co.

We have been favored with a visit from Dr. C. C. Hoagland Agent of the New Jersey State Teachers Association, who is now making the tour of the counties of this State, for the purpose of organizing Teachers Institutes to be held in some central and equally convenient place to all the Districts during the current year. An informal meeting of Teachers, Superintendents, and Citizens of Bridgeton and Cohansey was held on Tuesday evening June 19th, at which James G. P. L. F. Reynolds appointed Secretary.

The last paper that proceeded from the pen of the late A. J. Downing-to whom this country is indebted more than to any one else for that improved taste which of late has been brought about and fostered among us, and to whose influence we owe much of that high cultivation which is seen in the beautiful grounds that skirt our riversides and dot our rural scenery-was one encouraging the disuse of the Ailanthus, and urging the Tulip Poplar as a substitute.

It is the rapid growing qualities of the Ailanthus that have recommended it to some portion of the public and given it so fast a hold in the soil of our streets. A few years and expense upon the planting of a tree which | forefathers. were required and to save us such expenditure of effert and money we put this rank plant before our houses; and now it stretches its oriental branches triumphantly over our side walks and loads the whole atmosphere with its sickening odor. Population of Woodbury. - We learn from those who have been engaged in taking the census, that borough contains a population slightly rising 1200 souls. This is a very fair increare upon 1850, at which time we had scarcely 1000 within about the same

The New York Express notices a new and singular disease which has appeared in that city, and is puzzleing the physicians. It was at first classed under the head Erysipelas, but bears some resemblance to the Plague, except that it is not contagious. It appears at first in some discolored spot, say on the face, and extending without suppuration, soon destroys life, as if by a general mortification. If suppuration takes place, it passes off, but if not, death is sure to follow. One or two physicians have resorted to the knife, and cut out the plauge spot on its first appearance, and so have saved life. Fever and delirium attend the progress of the disease, if "the spot" is left to spread.

Foreigners Arming to Resist Law. - The Herald says in one of the French papers of that city, there is a call for a meeting at the Red Republican rendezvous in Leonard St. which is part of a movement gotten up by various foreign Societies, to resist by an armed force-a "Foreign Brigade"-any attempt to execute the Prohibitory Liquor Law, which goes into effect on next Tuesday evening week. We have already stated that the Germans are organized and drilled for the same purpose, but hope they will take the advice of the Herald; -" Let the Prohibitory Law alone. You will only hurt your own cause by being too hasty in its defence. A foreign armed mob in the streets of New York would be shot down like dogs in a very short space and at exceedingly short notice. TAVING purchased the right of making, using and selling, Cyrus Buler's patent pair t re: would hereby offer it for sale to the citizeus of Bridgeton and vicinity, having used and experimented with the mixture, I feel perfectly safe in saying, that it is decidedly to the advantage of any person having painting done to use it. The mixture being a new article to the Public, I do not expect or ask them to use it at their own risk; but am willing in every instance (where it is used according to direction) to warrant it; and if at the end of two years after the paint is put on, the person using it is not satisfied, I will repaint at my own expense, with either Pure Lead or the best Zine, at their own option. Now the ilvantages, to a person using it are as follows, riz:-First, they save 33 per cent on the first Second, the paint mixture gives the paint very beautiful gloss, consequently, they he much handsomer job of work done by using it .-Third, it will last from two to three years longer than painting done in the old way of mixing. Fourthly and last they run very little or no risk.

MILE success of the subscriber in the treatment of Diseases of the Bowels, on botanic principles, during the last twenty years, and especially in that of Cholera at Millville in 1849, where more than thirty cases were cured under his direction without a failure, has induced him to prepare a set of medicines from innocent vegetable substances; for the cure of this class of diseases.

been introduced. Within the last two years they have been placed in the hands of hundreds of families for the purpose of having them thoroughly tested: and the result has been most satisfactory. I have called personally on hundreds of those families to ascertain the success of my medicines, and have found that wherever they have been fairly tried they have given entire satisfaction. They seem to act as a apecific in Dysentory as well as in all the family of Bowel Complaints. In my travels during the last two Summers, for the purpose of introducing and testing my medicines,

RECOMMENDATIONS:

E the undersigned, having used Dr. Mon-ortoge's "Family Modification" orthoge's "Family Medicines" more or less in our families within the last few years, have found them exceedingly efficacious in the cure of the different forms of disease for which they are recommended, and decidedly the best we have ever used. And believing as we do, that they are the best medicines now in use, and that their general use would prove a great blessing to the com-munity, we cordially gio the above testimonial for the benefit of our friends and the public. BARBER'S New Jersey Combined Mowing and Reaping MACHINE!

THIS Machine is simple, of light draught and not liable to get out of order and will cut all kinds of Grain and Grass equally as well as any other Combined machine ever in this region. It is so constructed, that all side draught, (which is so great in most Machines as to require three, and some machines four horses to do the work of two) is entirely overcome and seldom, if ever requiring but two horses in any kind of grain or grass.

An Extra Platform is so constructed, that the gavels can be laid at the side, eatirely clear, when the Machine comes around and obviates the ne-

cessity of binding after it. This Machine has been tested the last harvest, by a number of practical Farmers and quite sufficient to prove its complete adaptation to Mowing as well as Reaping. It is so constructed, that it can be changed in twenty minutes into a Mowing Machine, and then again altered back for Reaping, in the same time. It leaves the stubble from twelve to fourteen inches high.

With this Machine you can mow an acre per hour, the whole day, though with but two horses, and with the same ease for the team, as ploughing; is warranted to cut Salt Grass equally as well as Fresh, and work as well in the Salt Marsh as These Machines are Manufactured at Brige

done at Short Notice. An extra knife, with each machine. negative.

Persons wishing to purchase, can apply to the subscriber, at Bridgeton, personally or by mail.

Manufacturer and Inventor of Safety Patent Squar Upright Wood Box Matches, No. 106 North Fourth St. (above Race), Philada. ATCHES having become an indispensable article in housekeeping, the subscriber, after a great sacrifice of time and money, is enabled to offer to the public an article at once combining Utility and Cheapness. The inventor knowing the danger apprehended on account of the flimsy manner in which Matches are generally packed in paper, has by the aid of new steam machinery of his own invention, succeeded in getting up a Safety Patent Square Upright Wood Box; this box is far preferrable, inasmuch that it occupies no more room than the old round wood box, and contains at least Two Hundred per cent more matches, which, to Shippers, is considerable advantage. It is en tirely new, and secure against moisture and spontancous combustion, and dispels all danger on transportation by means of railroad, steamboat of

any other mode of conveyance. These matches are packed so that one gress of more may be shipped to any part of the world with perfect safety. They are the most desirable ar-ticle for home consumption, and the Southern and Western markets, that have ever been invented. Dealers and Shippers will do well to call and examine for themselves. These Matches are WARRANTED to be superior to anything heretofore offered to the public.
