For the West Jersey Pioneer. THE WASTED FOUNTAIN

And is the fountain wasted? do its waters No more gush up to greet the sunny day; Doth it no more flash out in the clear sunlight, Making sweet music with its merry play?

Doth'it no more go singing through the wildwood Or stealing softly 'mong the grass and flowers; Doth it no more gleam out in the pale moonlight Or fling its coolness through the forest howers? O! never, in our hearts, may the pure fountains Of love, and hope, and innocence, be dry; But may their waters ever be replenished,

From the great fount of life and truth on high; May we drink deeply of those living waters Which cleanse our souls from sin's unholy stain There shall we find the boon of life immortal, There may we drink and never thirst again. Shilsh, N. J., Aug. 1855.

DIORAL.

For the West Jersey Pioneer. CIVILITY AND GOOD BREEDING.

Civility and good breeding are often thought they are by no means so. The latter implies the former, but civility does not always reciprocally comprise good-breeding. When combined, the fermer adorns, and doubles the value of the latter. To sacrifice self-love in order to gratify a fellow being is civility in the literal sense, but to do it with ease, propriety and grace is the part of good breeding. The one is the result of good nature; the other the effect of good sense, observation and experience. Ceremony although not actually necessary to either, should still in a measure be adhered to.

is only to be acquired by knowledge of the world, and by means of the best of company. It is no object of speculation, but consists in a fitness and propriety of words, looks and actions adapted to the infinite variety and combination of persons, places and things -A mode but not a substance. Like charity, it "covers a multitude of sins, and to a certain degree supplies the want of some virtues." It is much to be regretted that good-breeding is not-generally speaking-thought to be an essential part of youthful education. It might well be substituted for some of our Academical studies which occupy much time with vedisdainfully styled ceremony, or formality, and ridiculed, while in its place an offensive carelessness is adopted. Love and friendship its bounds. Thus while strictly speaking we jeet, with which it affords me pleasure to comcannot call it a virtue still it is more than a ply. and learning makes men valuable to society, their fellow men.

Avoid Rashness in Swimming .- In youth every person should learn to swim, as a part of his or her education, as in many emergencies it may be the means of saving life. But we must caution good swimmers against being too rash in exposing themselves to needless danger. Many excellent swimmers have she will starve till in better spirits. At times been drowned by overweening confidence in the hawks are so well supplied with fish, that their aquatic abilities, and not a season passes away without some instance of this kind taking place. An old sailor once told us, that in his experience he never saw a smart man who was fond of displaying feats of agility, and risking his life needlessly, but lost it foolishly. The case of Sam Patch is an instance of this kind. In cases of danger, it is a sublime sight to see a man risk his life to save that of another, but it is worse than vanity to see a man risking his life when no good object is to be subserved by doing so.

We have frequently been inquired of relative to the Bucks County Agricultural Exhibition, which will take place on Tuesday, Wednesday, Thursday and Friday of next week, at Doylestown, Pa. We say to inquirers, from present appearances, it will be a grand affair, well worthy a visit. You may go by the North Pennsylvania Railroad from Front and Willow Streets, Philadelphia, to Gwynedd, from which point there will be conveyances to Doylestown; or, you may take the Philadelphia, Trenton and Belvidere R. Road from Walnut Street, Philadelphia, to Lambertville or Point Pleasant, where will be Coaches to convey you to Doylestown .-There are also, several Stage Lines from the City-it is 24 miles, through a beautiful and fertile country.

We visited the place of Exhibition about three weeks since, things were progressing rapidly, at that time, to completion.

Finally, if you desire a comfortable and agreeable place to tarry, while in Doylestown, call at ex-sheriff MANN's Hotel, where if you can get a foot-hold, you will find a gentlemanly landlord and one of the best kind of land-lady's. We speak from experience.

It will be pleasant, and give you a good view of the country, to go one route and return the other.

While in Doylestown, do not forget to visit that new enterprise, for which Gen. W. T. Rogers, deserves the praise—the Doylestown Cemetery:

J. Rail Road Company. Mr. Speer, Editor of the New Brunswick Times, took occasion, a month or two since, to make complaint, in his columns, of the insufficient accommodations afforded by the Company, to the people of that City, in regard to trains, a depot, &c. The complaint was, without doubt, well founded, and Mr. Speer deserves great credit for his faithfulness in giving utterance to it. But, as the sequel has proved, he did it at a very great risk. The Company, "quick as the nitrous grain' took fire at his just strictures upon their parsimony, and at once withdrew their advertisements from his columns. But this was a Custom House Clerk, had been accustomed. like all others of the same cloth, to pass over their road free, and no doubt this privilege would have been continued to him till now, had he but maintained a strict silence regarding their meanness and continued to do their advertising for half price. But these conditions or at least the first, had been violated; so the Company promptly excluded the saucy Editor from the number of their fondled pets, made him pay his fare like any other sinner. and as before stated, ordered their advertisements discontinued. Mr. Speer, however, was rather slow in obeying the order, for we notice, that for several weeks past the time, tables of the Company have appeared as formerly, but with this interesting preface-The N. J. R. R. Company being too poor or too mean! to pay for advertising in our columns, we insert the following tables gratis," &c. Upon the whole, we opine that the Company will make but little by their oversensitiveness towards our cotemporary. The Sickness at Norfolk .- The last acounts from Norfolk, Va., represent the yelw fever as raging with unabated violence in that ill-fated city. The mortality, though not excessive in the aggregate, is still suffioiently alarming, when the number of inhabitants is considered and the fact that a very large portion of the population has fled from fected region. The disease is not confined to the lower classes in which it first asde its appearance, but already some of the est families have witnessed the fatal effects of its ravages. There appears to be no prosot of a speedy termination of the epidemic, nd it is probable that it will continue to deopulate the community at least until the v frosts. Considerable excitement preails in consequence of the refusal of the auof Norfolk to land there with their families. similar course is said to have been taken Magnolia Springs. Public safety in those localities may seem to demand such measures but it seems hard that those who are fleeing from the pestilence can find no city of refuge, ut must remain under the shadow of the and's wing, either to die themselves or to see heir loved ones snatched from their hearts and homes. God save the doomed city. This should be the prayer of every benevolent eart, and, while we gaze mournfully upon distress we cannot alleviate, our hearts auld swell with gratitude that health reigns assistant Teachers will be employed as the cirthin our borders, and that thus far this ason we have no unusual mortality to red. Dr. Morgridge's Family Medicines.

FILE success of the subscriber in the treatment of Diseases of the Bowels, on botanic principles, during the last twenty years, and especially in that of Cholera at Millville in 1849, where more than thirty cases were cured under his direction without a failure, has induced him to propare a set of medicines from induced him to propare a

ry. I have called personally on hundreds of those families to ascertain the success of my medicines, and have found that wherever they have been fairly tried they have given cative satisfaction. They seem to act as a specific in Dysentery well as in all the family of Bowel Complaints. my travels during the last two Summers, for the purpose of introducing and testing my incdicines I prescribed them in numerous cases of Dysentery with great success: many were cured, and I hav not heard of a single failure where my medicines alone were used and persevered in according to

directions. The articles principally relied on in the cure of Cholera, Cholera Morbus, Diarrhœa, Dysentery, Bowel Consumption, Cholera Infantum, and the Summer Complaints of Children, are Dr. Mororidae's Anti-Dyspeptic Mixture, Cholera Syrup. Cholera Pills and Anti-Bilious Pills for adults and his Bowel Corrector, Childrens Cordial and Aperient for Children. These will be sufficient in all ordinary cases, but there are some violent at tacks of disease, and some critical cases in which DR. MORGRIDGE'S Emetic Syrup and Carminative Tincture are employed. For further particulars on this subject see bill of directions accompanying

each set of the medicines.

For the cure of sundry other forms of disease are the following compounds, viz:—
Dr. Morgridge's Cough Syrup and Pectoral Elixir,
for Coughs, and all affections of the throat, breast and lungs. Dr. Morgridge's Liniment and Elixir, for Rhume

tism, Sprains, Tumors, &c.

Dr. Morgridge's Alterative Pills and Elixir, for affections of the heart, liver, kidneys, &c.

Dr. Morgridge's Anti-Dyspeptic Mixture and Pills, on Dreaming the series of the heart, liver, kidneys, &c. or Dyspepsia with all its distressing symptoms. Dr. Morgridge's Hyve Sgrup, for Croup, Asthma, Hooping-cough, &c., in children.

Dr. Morgridge's Carminative Tracture. This expels wind, cures pains, Colics, Cramps, &c.

Dr. Morgridge's Anti-Spasmodic or Emetic Sgrup, for all violent attacks and critical cases of disease.

These as well as my Bowel Medicines have been tested for years, and have won for themselves a reputation which will not easily be effaced.

For sale, wholesale and retail, at my office in Commerce Street, next door east of the Cumberland Bank, Bridgeton N. J. Price 25 cents per bottle or box.

A liberal discount will be given to wholesale dealers. Merchants would do well to lay in a stock of my Bowel Medicines early in the season, as in-

dividuals are already sending for their family supply for the Summer, from every direction where a knowledge of them has gone. All orders accompanying the cash will receive prompt attention

RECOMMENDATIONS: E the undersigned, having used Dr. Mon-gridge's "Family Medicines" more or less in our families within the last few years, have found them exceedingly efficacious in the cure of the different forms of disease for which they are recommended, and decidedly the best we have ever used. And believing as we do, that they are the best medicines now in use, and that their general use would prove a great blessing to the community, we cordially give the above testimonia for the benefit of our friends and the public. MEXICAN GUANO. THE attention of Farmers is requested to the following Analysis and statements of this valuable manure. It is the richest Mexican Guano that has been brought to this country in Phos-phates. Phosphoric Acid is the valuable element of all manures, and this Guano contains nearly 34 per cent., being much stronger than the Peruvian Juano. The peculiarities of this Guano, are: It is not injured by the sun, and is not washed out of the soil by the rains, in less than 30 years It will double the crop of Corn, if Phosphoric

Acid is deficient in the soil. It cheaper, more permanent, and more certain than Peruvian Guano. On land already surfeited by too frequent applications of ammonia in Peruvian Guano, the Mexican Guano, by its great abundance of Phosphates, will restore health and vigor. For sale by J. B. A. & S. Sep 30, 1854. MATCHES! MATCHES!

JOHN DONNELLY, Manufacturer and Inventor of Sufety Patent Square Upright Wood Box Matcher, No. 106 North Fourth St. (above Race), Philada. MATCHES having become an indispensable article in housekeeping, the subscriber, after a great sacrifice of time and money, is enabled to offer to the public an article at once combining Utility and Cheapness. The inventor knowing the danger apprehended on account of the flimsy manner in which Matches are generally packed in particular to the property of the per, has by the aid of new steam machinery of his per, has by the alu of new steam machinery of his own invention, succeeded in getting up a Safety Patent Square Upright Wood Box; this box is far preferrable, inasmuch that it occupies no more room than the old round wood box, and contains at least Two Hundred per cent more matches, which, to Shippers, is considerable advantage. It is entirely new, and secure against moisture and spontaneous combustion, and dispels all danger on transportation by means of railroad, steamboat or

any other mode of conveyance. These matches are packed so that one gress or more may be shipped to any part of the world with perfect safety. They are the most desirable article for home consumption, and the Southern and Western markets, that have ever been invented. Dealers and Shippers will do well to call and ex-

amine for themselves,

These Matches are WARRANTED to be superior to anything heretofore offered to the public.
