## "I WANT TO BE AN ANGEL."

I want to be an angel, And with the angels stand, A crown upon my forehead, A harp within my hand;

There, right before my Saviour, So glorious and so bright, I'd wake the sweetest music, And praise him day and night.

I never would be weary, Nor ever shed a tear, Nor ever know a sorrow, Nor ever feel a fear-

But, blessed, pure and holy, I'd dwell in Jesus sight, And with ten thousand thousand Praise him both day and night. I know I am weak and sinful,

But Jesus will forgive, For many little children Have gone to heaven to live, Dear Saviour, when I languish, And lay me down to die, To bear me to the sky.

Oh, there I'll be an angel, And with the angels stand, A crown upon my forehead, A harp within my hand; And there, before my Saviour, So glorious and so bright, I'll join the heavenly music, And praise him day and night.

They seem designed by nature to rescue, at least in part, that untold amount of fertilizing material which every river and brooklet is rolling into the sea. The wash of the alluvial soils, the floating re- tlemen Publishers, I thank you for these mufuse of the field and forest, and, above all, the wasted materials of great cities, are constantly bineg carried by the tidal currents out upon the Malakoff and Redan of ignorance, to sea. These, to a certain extent at least, go to nourish, directly or indirectly, submarine vegetable and animal life, which in turn goes to feed the birds whose excrements at our day are brought away by the ship-load from Chincha islands. The bird is a beautifully-arranged chemical laboratory, fitted up to perform a single operation, viz.—to take the fish as food, burn out the carbon by means of its respiratory functions, and deposit the remainder in the shape of an incomparable fertilizer. PUBLISHER'S FESTIVAL.

The long-anticipated Festival of the Publishers Association of New York; took place at the Crystal Palace, on Thursday evening. A large number of guests—all authors—were in attendance, and the Banquet was one of the first order. The President of the Association, Mr. Wm. H. Appleton, presided. Addresses were made by the President, Wm. C. Bryant, Rev. Mr. Osgood, Henry Ward Beecher, E. H. Chapin, the mayor of Boston, Peter Parley, and several others. The entertainment closed shortly after 11 o'clock.— We give an extract from Chapin's address: — " As the printing-press stands before us,

If there was out of inspired history a palpable symbol of crises, it is in that clumsy machine of Faust and Guttenburgh. That was a power portentous—the old rickety frame that came stalking among kings, priests, thrones, castles and other feudel respectabilities, that tore the chains from thoug t and let it free. That was a troublesome Democrat. It was a free prophet of bold and beautiful thought-the working creature that took the Word of God from the pillars of the Monasteries and scattered it abroad through the world and kindled a light to read it by. The previous sale, to which the Harpers contributed, reached 200, 000 dollars, their invoice alone amounting to 80,000. # "BEHIND TIME."

A railroad train was rushing along at almost lightning speed. A curve was just ahead, beyond which was a station at which the cars usually passed each other. The conductor was late, so late, that the period during which the down train was to wait had nearly clapsed; but he hoped yet to pass the curve in safety. Suddenly a locomotive dashed into sight right ahead. In an instant there was a collision. A shrick, a shock and fifty souls were in eternity; and all because an engineer had been be-

It is continually so in life. The best laid plens, the most important affairs, the fortunes of individuals, the weal of nations, honor, happiness itself are sacrificed because somebodv is "behind time." There are men who al ways fail whatever they undertake simply because they are "behind time." There are also others who put off reformation year by year till death seizes them, and they perish unrepentent, because forever "behind time." The Allies have lost nearly a year at Sebastopol because they delay a superfluous day after the battle of Alma, and came up to late for a coup de main just twenty-four hours "behind time." Five minutes in a crisis is worth years. It is but a little period, yet it has of ten saved a fortune or redeemed a people. ### GOOD HONEST SLEEP.

Baltimore Sun.

We believe it was the father of many wise sayings, Sancho Panza, who, with the gratiude of rich experience bubbling up from his heart, pronounced a fervenet bleesing on the man who invented sleep. Sancho was right. Sleep is a great "institution." It is a universal panacea—a remedy for all our ills.— It comes to human nature, toil worn and exhausted, folds it in its embrace, pillows it upon its bosom, smooths its wrinkeled brow. cools its throbbing temples, composes its aching limbs and re-awakens to its daily task with powers fresh and vigorous.

The man who is a good sleeper is a happy man. No matter what labors crush him to the earth, what responsibities press upon him, what perplexities distract him, if he can lie down at his accustomed hour and sleep soundly, he is proof against them all and can bear the fate of an empire on his shoulders. Worn out at night in body and mind, he rolls off all his cares, and rises in the morning concious of returning duties. But the man who cannot and drive repose from his couch, is consumed by an unquenchable fire and his system soon burns itself out. Such a man must seek quiet employments and avoid complex an exciting pursuits, if he expects either happiness or long

Doubtless good philosophic sleeping is much a matter of habit. If a person accustoms himself to forget all his cares as soon as his head touches the pillow, makes it a busia fixed habit with him, and he has little difficulty in pursuing it. On the other hand, the man who makes his pillow the countingroom in which to review the transactions of the pust and to devise expedients for the future, soon finds that sleep, like a frightened dove, files from his couch, and scarcely ventures to that ero one moon had waned he would rereturn and fold her wings till the morning turn.

The man who values his happiness, desires to increase his powers of endurance and prolong his life, should cultivate his capacity to bear me witness, not another moon shall pass sleep-not late in the morning, but promptly when he first reclines upon his bed. We have a notion that good, prompt, sound sleep is indicative of honesty. Rogues and rascals, can they sleep like a christian? We do not believe it. A feverish excitement, a

restless remorse consumes them. We close, as we began, in the language of honest Sancho, " blessed be the man who invented sleep,"-Albany Argus.

## THE FALL OF SEBASTOPOL.

The news of the fall of Sebastopol has caused the greatest rejoicing throughout Can-ida. At Teronto bonfires were lighted, guns fired, rockets set off, and the greatest excitement prevailed. ### EATING OYSTERS.

It was a few evenings ago, that I happened to be sitting at a side-table in W's. eating saloon, in this place, indulging in "a few fried" before going to bed. The oysters were particularly fine, and should have engrossed all my attention; but visions of doctors and dyspepsia would intrude themselves upon me. A correspondent of the Broome County Republican describes his jaunt over the Syracuse and Birmingham Railroad, from Cortland, in the following poetical strain:

So much I wrote in Cortland's boundsand would have finished there, had down train's whistle loud resounded through the air. So shaking Fair-child by the hand, who said come again, I bid farewell to every fear, and jumped upon the train. Rushing around the hill side, darting o'er the plain, over the rivers, under roads, Van Bergen drove his train. The moon threw bright effulgent rays on each small ripple's creat; the river seemed a ribband stretched across the meadow's breast; the evening wind came stealing through the car with gentle sigh, and brought a cinder from the engine, spang into my eye; few and short were the prayers I said, and I spoke not a word of sorrow, but I rubbed at my eye till I made it red; and knew 'twould be sore on down from his post came the engine man, and the fireman ceased his firing. # RATHER DID HIM.

A merchant in a town near Boston, had a customer, more dreaded than desired, who was always ready to taste early fruit, without buying any, eat raisins by the handful, dip in-to the sugar-barrel for lumps, and fill his shuffbox from the jar on the counter under pretene of taking a pinch. The game got to be insufferable. The merchant had a barrel of choice apple sauce in his store, a fact which our sponge discovered and scated himself upon it, and when the merchants eyes were turned he would dip into the barrel, scoop out a handful at a time and take it down at a gulp. The merchant had seen the whole by means of a looking glass which reflected the store, and he resolved upon a plan to fix him.

"John," said he to his young man, giving

him a wink, "why didn't you throw that apple:sauce away?" Without waiting for John's answer, the

sponge broke in with-Why, what's the matter with it? It's firstrate, I think." "Yes," said the merchant, "it was, but a cat and four kittens were drowned in it last

night." The victim looked pale and moved towards the door. He felt as if he was an injured man, and silently vowed not to patronize that store any more.

The Grand Jury of Burlington County and the Late Trajedy.

We learn by our exchanges that the Grand Jury of Burlington County have found a bill ngainst Adams, the engineer of the ill-fated train, for manslaughter. They also declined to bring any bill against the Company or ing to our necessities. ngainst Dr. Henniken, the driver of the carriage. One of the employees of the Company was charged with retaining treasure in his possession that would have led to the early identification of one of the bodies. A bill was finally brought against him at the earnest desire of the citizens of the town.

The action of the jury has given us a new interpretation of railroad law. It seems to imply that a citizen may drive across the railroad track at any rate of speed, at the very time when he knows that the cars are liable to pass, and no matter what loss of life may 10 miles an hour), that in a great measure not, If it was censurable in the engineer to run his train fifteen or twenty miles an hour across the track at the very time when he knew the cars if running according to their usual arrangement, must be in close proximity to it? Backing a train at the rate of fifteen or twenty miles an hour may or may not be too fast. Before the accident it is hardly probable that any person on that train thought they were going too fast. After the accident it was discovered that they went too fast, and the engineer must suffer accordingly; railroad trains must run slow enough for the doctor's fast horses to clear the track. Seriously, this looks to us too much like one-sided justice.-The calamity awful as it was, did not result from any ill feeling or premeditation on the part of either. On the other hand it is quite probable the engineer was aiming to please and accommodate the very ones who suffered

most by the accident. The bell ought to have been rung, and the engineer was to blame for not doing it. So the doctor ought to have driven more carefully, when approaching the track. Suitable care in either respect might have prevented

From the Philadelphia Merchant. The attention of the readers of the Phila-

delphia Merchant is respectfully directed to lation to the fall of Sebastopol, the leading the Saving Fund of the National Safety Company in Walsut street, south-west cor. of Third, which has been for a long time and continues to be, one of the most prosperous and successful institutions in Philadelphia, and we may add at the same time, one of the most useful. It was chartered in 1841 by the Legislature of Pennsylvania, and since its organization has steadily pursued the objects which it was incorporated. The unprecedented success which has attended its operations, affords illustration of what skill and perseverance rightly directed, can accomplish. depositors has gone on steadily increasing from year to year, until they now greatly exceed the amount received by any other institution of the same kind in this city. The people of Philadelphia are proud of it, and point to it as presenting an instance of successful enterprise, and at the same time affording the means of effecting a great public good by favoring the promotion of economy and industry amongst every class of her citi-

There is no sum too small, and no sum to large to be received there, and it is not surprising, therefore, that this Saving Fund has a great number of depositors, and has received a very large amount of money. People who call there find that the Secretary and his assistants are kept constantly employed from morning till night, and twice a week until a late hour in the evening, in receiving the mo- County. - National Standard. ney brought by people who are anxious to put t in for the double purpose of having it safely kept, and that they may be able at the same ime to get interest for it.

We are well acquainted with the operations of this Saving Fund. We have ourselves frequently deposited large sums in it-are in daily personal intercourse with its officers and directors. A great many of our friends also have put their moncy into it and add to it from time to time until the sums deposited, with the accumulated interest, shall enable them to purchase a house, or accomplish some other important and profitable object. We hear every one of them speak of it with the highest approbation on account of the careful manner in which its business is conducted, and they all refer to it a perfect model for all imilar institutions.

We have reason to believe that large sums of money are kept in private hands both in the city and country, where it proves a constant source of anxiety and of real danger to the owner. There is scarcely a day passes in which there is not some account in the public papers of money having been lost by fire, and still more frequently by robbery, often attendsion of both these crimes. These calamities are not confined to our cities, but in proportion to the population are even more frequent in the country. There is reason to believe that a great many fires which have occurred both in the city and country have been preceded by robbery, and the fire created for the purpose of concealing it. It is therefore a great public benefit to have an institution in which any sum of money, large or small, can be placed with interest while it remains, and from which the owner can get it back again

in gold at any moment he pleases to call for it. Precisely such an institution is the Saving Fund of the National Safety Company, and

while it remains there. People who have the largest sums lying in their own houses, of course feel the greatest anxiety, and would receive most benefit by placing it in this Institution. We have understood that many people who have large sums have come from a great distance to put their money in this Saving Fund, on account of the superior safety and convenience it affords, and consequently have been relieved from the care and anxiety inseparable from

keeping it in their own houses. It may be proper also to state that the money placed in this Saving Fund, is carefully invested in Mortgages, Ground Rents, and other first class securities, which prevents the possibility of loss, and further that by the rules of the Company, none of the Directors or Officers can directly or indirectly use or

Mr. Long ordered him to stop, which he failed to do, when his locomotion was impeded by a load of shot. Dr. Hunt, of Woodstown, dressed the wound, when he was brought to Salem, and lodged in jail. He has since been under the charge of Dr. Kirby. Such marauders as Johnson have been a sore annoy ance to the county. Their acts present a striking contrast with the conduct of their more peaceable and orderly brothren of color.

Dr. Morgridge's Family Medicines. THE success of the subscriber in the treatment of Disease of the Bawels, on botanic princi-ples, during the last twenty years, and especially that of Cholera at Millville in 1849, where more

in that of Cholera at Millville in 1849, where more than thirty cases were cored under his direction without a failure, has induced him to prepare a set of medicines from insocent vegetable substances, for the cure of this class of diseases.

These medicines have become exceedingly popular in every section of country where they have been introduced. Within the last two years they have been placed in the hands of hundreds of families for the purpose of having them thoroughly tested; and the result has been most satisfactory. I have called personally on hundreds of those families to ascertain the success of my medicines, and have found that wherever they have been fairly tried they have given entire satisfaction.

They seem to set as a specific in Dysentery as They seem to act as a specific in Dysentery as well as in all the family of Bowel Complaints. In my travels during the last two Summers, for the purpose of introducing and testing my medicines, I prescribed them in numerous cases of Dysentery with great success; many were cured, and I have

not heard of a single failure where my medicines alone were used and persevered in according to The articles principally relied on in the ears of Cholera, Cholera Morbus, Diarrhes, Dysentery, Bowel Consumption, Cholera Infantum, and the Summer Complaints of Children, are Dr. Moronipon's Anti-Dyspeptic Mixture, Cholers Syrap, Cholers Pills and Anti-Bilious Pills for adults, and his Bowel Corrector, Childrens Cordial and Aperient for Children. These will be sufficient in all ordinary cases, but there are some violent attacks of disease, and some critical cases in which DR. Monantone's Emetic Syrup and Communities Tincture are employed. For further particulars on this subject see bill of directions accompanying each set of the medicines. For the cure of sundry other forms of disease

are the following compounds, viz:—
Dr. Morgridge's Cough Syrup and Pactoral Elizir,
for Coughs, and all affections of the threat, breast and lungs.
Dr. Morgridge's Liniment and Elizir, for Khuma-

tism, Sprains, Tumors, &c.
Dr. Morgridge's Alterative Pills and Elizir, for affections of the heart, liver, kidneys, &c. Dr. Morgridge's Anti-Dyspeptic Mixture and Pills, for Dyspepsia with all its distressing symptoms. Dr. Morgridge's Hyve Sgrup, for Croup, Asthms, Hooping-cough, &c., in children.

Dr. Morgridge's Carminative Tincture. This expels wind, cures pains. Colies, Cramps, &c.

Dr. Morgridge's Anti-Spasmodic or Enetic Syrup, for all violent attacks and children cases of disease. for all violent attacks and critical cases of dis These as well as my Bowel Medicines have been tested for years, and have won for themselves a

reputation which will not easily be effaced.

For sale, wholesale and retail, at my office in Commerce Street, next door east of the Cumberland Bank, Bridgeton N. J. Price 25 cents per bottle or box. A liberal discount will be given to wholesale selers. Merchants would do well to lay in a stock of my Bowel Medicines carly in the season, as individuals are already sending for their family supply for the Summer, from every direction where a knowledge of them has gone.

All orders accompanying the cash will receive prompt attention RECOMMENDATIONS: W E the undersigned, having used Dr. Mon-enipor's "Family Medicines" more or less in our families within the last few years, have receive the most careful and undivided attention, found them exceedingly efficacious in the cure of the different forms of disease for which they are recommended, and decidedly the best we have ever used. And believing as we do; that they are the best medicines now in use, and that their gen-eral use would prove a great blessing to the community, we cordially give the above testimonial for the benefit of our friends and the public.

of 10th month (October) next, all that valuable Farm and Country Seat, belonging to the Estate of Samuel Leeds, deceased, situated in Chester Township, Burlington County, New Jersey, 8 miles from Camden. 3 from Moorestown, 2½ from the Riverton Station on the Camden and Amboy Railroad, and 3 from the Steamboat Landing at Riverton, and one mile from Westfield on the turnpike from Camden to Bridgeborough, adjoining lands of Edmund W. Lippincott, Thos. Warrington and others. Said Farm contains about 72 acres of arable land, most of which is under a high state of cultivation, and is well fenced with cedar rails. It is considered one of the most productive farms in the neighborhood, having sever al acres of Strawberries in prime bearing order, large Asparagus bed, together with an excellent orchard of apples, peaches, and other fruit trees. The improvements consist of a double TWO STORY DWELLING,

surrounded by large shade trees—large new barn withcellar, wagon house, and other out-buildings, with two never-failnew barn withcellar, wagon house, and other out-buildings, with two never-railing wells of excellent water at the house and barn.
Taking into view its beautiful and healthy locaductiveness, convenience to places of worship, schools, and its easy access to the city by railroad, steamboat or turnpike, make it one of the most desirable properties to be found in this section of country. A large portion of the purchase money can remain on the property if desired. Also, at the same time and place, will be sold, about five acres of Meadow at Fork Landing, on Pennshawkin creek, one mile from the above

SAMUEL L. FITHIAN,

AVING purchased the right of making, it using and selling, Cyrus Buler's patent paint nixture; would hereby offer it for sale to the citione of Bridgeton and vicinity, having used and experimented with the mixture, I feel perfectly afe in saying, that it is decidedly to the advan tage of any person having painting done to use it.
The mixture being a new article to the Public, I do not expect or ask them to use it at their own risk; but am willing in every instance (where it is used according to direction) to warrantit; and if at the end of two years after the paint is put on, the person using it is not satisfied. I will repaint at my own expense, with either Pure Lead or the best Zine, at their own option. Now the advantages, to a person using it are as follows. viz .- First, they save 83 per cent on the first

cost. Second, the paint mixture gives the paint a very beautiful gloss, consequently, they have a much handsomer job of work done by using it. Third, it will last from two to three years longer than painting done in the old way of mixing.— Fourthly and last they run very little or no risk.

All further necessary information will be given by calling at SAMUEL L. FITHIAN'S Drug & Chemical Store, sign of the Big Mortar, nearly opposite E. Manufacturer and Inventor of Safety Patent Square Upright Wood Box Matches, ATCHES having become an indispensable No. 106 North Fourth St. (above Race), Philada. nrticle in housekeeping, the subscriber, after a great sacrifice of time and money, is embled to offer to the public an article at once combining Utility and Cheapness. The inventor knowing the danger apprehended on account of the flimsy manner in which Matches are generally packed in paper, has by the aid of new steam machinery of his own invention, succeeded in getting up a Safety Patent Square Upright Wood Box; this box is fur preferrable, inasmuch that it occupies no more room than the old round wood box, and contains at least Two Hundred per cent more matches, which, to Shippers, is considerable advantage. It is entirely new, and secure against moisture and spon taneous combustion, and dispels all danger on

transportation by means of railroad, steamboat or any other mode of conveyance. These matches are packed so that one gress or more may be shipped to any part of the world with perfect safety. They are the most desirable ar-ticle for home consumption, and the Southern and Vestern markets, that have ever been invented. Dealers and Shippers will do well to call and ex
