I LOVE EVERY FLOWER.

BY MINNIE MARY LEE.

I love every flower that springs from the sod: For each beautifully bears its impress of God! Each has its bright eye turned meekly to ours Claiming from us, 'love, love for the flowers!'

The violet blue, that is blooming alone By the river's cool brink or the moss-grown stone, Fills my heart with love and my eyes with a tear,

'Tis a lowly flower that I hold most dear! The lily so pale tells of hope and of trust, Of a beautiful home so pure and just, The lilac is blended with visions of home,

And memories dear all bright with it come. The rose I've loved from childhood's sweet hours; And numberless more of these fairy flowers I love like to these and have loved them long;

Their simplest names are a music and song! Though no audible tones, no voices of love, Thrilling low in the breeze like notes from above Have the flowers for us, yet they silently tell, A sweet sad story we remember full well.

"We are dying-are dying"-they mournfully

Our life-'tis from dawning to closing of day! So early we fade! As fair but as brief As the foam on the wave, is our sunniest leaf.

We are levely things for the silken hair, Of the maiden young in her radiance rare, As she twines us among her tresses long, Carolling blithly some snatch of a song.

Little she's heeding the lesson we give, Little she's dreaming like as she doth live! She goes from the hall a happy young bride,

A tall form is near her-her love and her pride. She lives her brief day, her few blissful hours Then he she has loved lays her down with the

flowers. Our lovliest ones he doth place on the brow

Of his fondly-loved bride who is voiceless now! We hear his low moan as he weeneth by. And we bend low our forms with him grievingly; And we, frail things, we then cover her o'er.

Fearfully-swiftly ye all pass away! As our life is but an hour so is yours but a day! Then love one another, not long may ye stay, O! love one another, ye are passing away! Sauk Rapids, Min. Ter.

With blossoms that she can love nevermore!

> From the Farmer and Planter. EXHAUSTION OF SOILS. BY S. DUDLEY.

Mr. Editor:- Every farmer is well aware decline in productiveness, and ultimately become "worn out" or exhausted. Some soils require but few years, and othes require state when the cultivaton commenced, else here may have been a deficency in the mate. One of those sultry summer days in June, rials applied for the growth of the plants; the latter may have been in a productive state at plant constituents.

The farmer is frequently surprised that his intended crops fail when he exercised particular attention in the application of all his manures. But experience teaches us that the majority of failures in farming may be traced the holding of the State Agriculturial Fair in scene which, go where they will in after life, to the imperfect understanding of the judicious management of fertilizers. Hence the stranger boys, older than himself, who per- of the memory. It is well known that many people are leaving the Atlantic States "for the West," because the soil in said States is so unproductproductions. It is also true that the West nust suffer a decline in fertility eventually, if the people pursue the present ruinous mode of culture which is practiced to a great extent throughout the country.

from Liebig's recent work: "The mineral substances found in the ashes of plants, were originally ingredients of the soil. In the dients of the soil which have become ingredisoil." Now it is evident that we must return to the soil the same quantity and quality of continue the soil in a fertile condition. As this has not been done with most farmers, it

is obvious why soils decline or become entirely unfit for the productions of cultivation. There has been a general disposition to borrow of the soil, without a knowledge of the mode of repaying; but this repaying is important with honest men, and, again, the soil -the lovely view of wide spreading fields of will certainly tell if you do not repay. Here applied to the soil when a crop is removed? As a full answer would be too extended for this article, a partial one must suffice.

In the ashes of the cereal grains, phosphoric acid and potash predominate; in tobacco, lime is most abundant; and in cotton, phosphoric acid and lime are the principal constituents.

Besides these, there are seven inorganic elements which aid in the constitution of the find much time for reading and subjects of ash, all of which must be present in the soil wonder, inquiry and admiration daily present in the proper condition and quantity for the assimilation of plants.

This it can do by giving the quantity, quality and condition of the elements, which the soil holds for plants, and also, by showing the precise fertilizer which it requires. Is not this reasonable? It is true that long and watchful experiments have been of great avail to the farmer, and he owes his success to them principally: yet there is abundant room for science to make improvements with the co-operation of art. The one is dependent upon the other, and they should be constantly in company upon every farm without a disposition to mention their respective merits in a manner of superiority -for they are equal, and he who regards

WOMAN'S RIGHTS AND DUTIES.

"The family is a natural institution, in which the true man and woman each has a manifest duty to perform—the woman to rear a healthy intelligent offspring and make her home a little paradise—the man to guard and defend it, to provide for its comfort and safety, and discharge those arduous and stern ever pay attention to, much less fulfill." Chronicle, Oct. 27 '55.

The above extract, which we clip from our cotemporary's last issue, is so old fogyish an idea and so at variance with the usually progressive views of the gallant editor, that we have been tempted to make it the subject of a in these inestimable rights. Not ask for explicit in its expression, that if hereafter he birth to their first child!! Indeed! what more pany. city for guiding or controlling them, so much as the result of the mistaken ideas, in which she has been educated, and which like those quoted from the Chronicle, are calculated to work mischief in the domestic circle. There is no reason, why woman should not be eduduties of life. Thousands of examples are the State Superintendent, Mr. J. H. Phelps. before us, where from siekness or death she is compelled to attend to them, often to such knowledge, as for her property eventually to in Bridgeton. be rent from her by the unserupulous and designing. It would not detract from the value of a wife or mother, if to her feminine acquirements were added a knowledge of the best methods of farming, gardening, book keeping, managing business or buying the needful articles for the household. With a knowledge of any or all of these branches, she would make a better and we trust no less ac ceptable wife to our cotemporary; and if a 'true wife," would not fail to "pay attention to, and even fulfill" a portion of his arduous out of doors duties whenever the occasion might require it.

If our brother has been somewhat severe on the married ladies, what are we to think of his remarks on the single ones. Hear him, "They refuse to obey the first command, and the first, the greatest and all important law of nature, 'Go forth, multiply, and replenish the earth,' yet they ask for rights which were purchased with life and blood, and to defend which if need be, life and blood, must be again sacrificed-rights to support which, they have not given birth to the first child, to grow up and call them blessed, and bleed for his country."

Naughty girls! how dare you while so delinquent presume to ask for more of our blood bought rights. You now have the privilege of toiling out your life's blood in an effort to secure the bare necessaries of life, -you can make shilling shirts, till incessant toil has brought the hectic flush to your cheek-with. confiding and affectionate natures you can trust in man's promises till betrayed and falout-of-doors duties which no true wife can len, a life of temporal and eternal damnation is open before you, -you can have your fortunes snatched from your hands by the wicked and the profligate, without a hope of redress to save you from beggary and want .-What more can you ask? We sacrificed "life and blood" by which you have been secured and moral duties of life. Duties which call for the kindliest emotions of his head and heart. While woman's hand can soften the pathies can soothe the couch of suffering .- while a mother's love and a mother's prayer can check the erring steps of youth and direct them heavenward-while her intellect can dictate

Our numerous readers in that neighborhood and those living more distant will be well repayed for their efforts by attending on Monday evening next. The Speaker's thorough acquaintance with the practice of medicine does not detract from his knowledge of Agriculture either practically or theoretically, and we do attempt to make the subject both interesting and instructive to all who feel interested in the cultivation of the soil and the advance-

ment of Agricultural Science. We are pleased to learn that this long established Association of Farmers, who have done so much in the past towards the progress of Agriculture in this County, are still in a flourishing condition. Meetings are held regularly and the experience of the many intelligent and thrifty farmers that meet there is available to any one who will comply with the liberal regulations of the Association.

The public are invited to attend on Monday evening next.

BE CAREFUL .- A young man a resident of Newport, desiring a little recreation, thought he would gratify his desire by shooting a few birds, which he did on Monday last. Effects of the Late Gale.

We learn from our exchanges from different parts of the country, that the gale on Sunday last was very severe. In cities blowing off roofs, tearing down awnings, wrenching doors and window shutters from their hinges erated by the accidental discharge of a gun, and making a general breaking up of things. Much disturbance was occasioned among the shipping at New York on the North and East Rivers, the wind blowing from the west caused the tide to recede much lower than would otherwise have been the case. It has not been so low for several years. During the afternoon most of the vessels on the North River side were aground, and some inconvenience was caused to passengers crossing over to Brooklyn by the ferry boats getting aground in ferry slips on the East River. Club. at the School House in Bowentown, on Salem Streets-Gas.-We observe the overseers are at work with scrapers upon the streets of our town, taking off the hills and filling up the hollows. A special town meeting was held last week with the view of making an appropriation to put up gas lights at the corners of and along the streets, that a ray of light might be shed upon the path of those who from necessity were compelled to travel them at night; but it was found there was no not hesitate to say, that he will not fail in the law to warrant such an appropriation. Here is another argument for a city charter. If Salem was incorporated, the "city council" would issue the order, and the work would be done, while now we will have to patiently endure dark nights, muddy streets, and the "attendant evils," until the assembling of the wise men of the State, at Trenton, before a law can be obtained allowing the citizens of Salem to light the town with gas. The lantern party will be continued at least through the coming winter. - Standard.

> Stop Them Horses! - Charles S. Humphries of this city has just finished one of the most splended paintings for Col. Sanderson of Somerville. The painting is a most superb likeness of the Col's, splended span of black horset, "Topsy and Dandy." The view of them was taken while they were being exexhibited to the judges; the horses and Col. Sanders on all look as natural as life, while the back ground represents nearly all the fast horses that was on trial during the State Fair. You can as readily pick out Coopers' "Jerry Brown" closely pursued by Andrews' "Kate ' White Cloud'' "John Young" "Toronto" &c., and last though not least Bockius' span "Bill Morell" and "John Morgan" leading all the double teams, as you can the main horses on the painting; then again you may see our young friend Wm. Bettle bringing up the rear ground with his fine span of road-sters. All the horses on the back ground are ess than an inch in length, and all good likenesses Mr. H. has won himself laurels by this painting. Many judges say that thay L. Dr. Morgridge's Family Medicines

THE success of the subscriber in the treatment of Diseases of the Bowels, on botanic principles, during the last twenty years, and especially in that of Cholera at Millville in 1849, where more

in that of Cholers at Millville in 1849, where more than thirty cases were cured under his direction without a failure, has induced him to prepare a set of medicines from innocent vegetable substances, for the cure of this class of diseases.

These medicines have become exceedingly popular in every section of country where they have been introduced. Within the last two years they have been placed in the hands of hundreds of families for the nurpose of having them thorough. families for the purpose of having them thoroughly tested; and the result has been most satisfactofamilies to ascertain the success of my medicines, and have found that wherever they have been fairly tried they have given entire satisfaction. They seem to act as a specific in Dysentery as well as in all the family of Bowel Complaints. In my travels during the last two Summers, for the purpose of introducing and testing my medicines, I prescribed them in numerous cases of Dysentery with great success; many were cured, and I have

not heard of a single failure where my medicines alone were used and persevered in according to directions. The articles principally relied on in the cure of Cholera, Cholera Morbus, Diarrhea, Dysentery, Bowel Consumption, Cholera Infantum, and the Summer Complaints of Children, are Dr. Mor-GRIDGE'S Anti-Dyspeptic Mixture, Cholera Syrup, Cholera Pills and Anti-Bilious Pills for adu tacks of disease, and some critical cases in which invite the strictest investigation of our claims to Dr. Morghingly's Emelic, Syrup and Carminative Tincture are employed. For turther particulars on this subject see bill of directions accompanying

each set of the medicines. For the cure of sundry other forms of disease are the following compounds, viz:

Dr. Margridge's Cough Syrup and Pectoral Elizir, for Coughs, and all affections of the throat, breast

and lungs.
Dr. Morgridge's Liniment and Elizir, for Rhumatism, Sprains, Tumors, &c. Dr. Morgridge's Alterative Pills and Elizir, for affections of the heart, liver, kidneys, &c.
Dr. Morgridge's Anti-Dyspeptic Mixture and Pills,
for Dyspepsia with all its distressing symptoms.
Dr. Morgridge's Hyve Sgrup, for Croup, Asthms,
Hooping-cough, &c., in children.
Dr. Morgridge's Carminative Tincture. This expels wind, cures pains, Colics, Cramps, &c.

Dr. Morgridge's Anti-Spasmodie or Emetic Syrup; for all violent attacks and critical cases of disease. These as well as my Bowel Medicines have been tested for years, and have won for themselves a reputation which will not easily be effaced. For sale, wholesale and retail, at my office in Commerce Street, next door east of the Cumberland Bank, Bridgeton N. J.

Price 25 cents per bottle or box. A liberal discount will be given to wholesale dealers. Merchants would do well to lay in a stock of my Bowel Medicines early in the season, as individuals are already sending for their family supply for the Summer, from every direction where a knowledge of them has gone. All orders accompanying the cash will receive prompt attention RECOMMENDATIONS:

recommended, and decidedly the best we have ever used. And believing as we do, that they are the hest medicines now in use, and that their general use would prove a great blessing to the community, we cordially give the above testimonial for the benefit of our friends and the public. Hat & Cap Store In Millville, is now exhibiting to the people there and all the country around, the largest; handsomest, cheapest and best assortment of goods ever before offered in that place; premiums are er, Poudrette and bone dust, all of which will be awarded to the best purchasers.

Having just returned from the city of Philadelphia. I have purchased a large and beautiful assortment of goods of all the latest styles and pat-terns, and I will just say to the young men if they want to shine among the ladies as they go through the Jersey sand, just come along with their dough to the cheap hat store and purchase one of my Shanghai hats and they will put you right thro -a few more left of the same sort-and I will also say to my Bridgeton friends, that the turnpike is nearly done and if they will just gear up some of those 2-40 mags that they have there and come down to our place we will sell you hats that will do you good as long as you wear them. I have silk hats from \$1 25 to \$4 00; caps from 12 ets, to \$1 50; wool hats 62 cts. to \$1 37; fur hats from \$1 12\frac{1}{2} to \$2 75; childrens' fancy hats from \$1 12 to \$2 50; also all other kinds of hats accordingly cheap, together with a good assortment of trunks, valises, carpet bags, umbrellas, &c., all of which I will sell 5 per cent. off for cash. So come along all Jersey folks but don't come all together and I will sell you hats that will do you good in very stormy weather. N. B. Hats of my own manufacture, repaired free of charge.

JOHN DONNELLY. Manufacturer and Inventor of Safety Patent Square Upright Wood Box Matches, No. 106 North Fourth St. (above Race), Philada. ATATCHES having become an indispensable article in housekeeping, the subscriber, after a great sacrifice of time and money, is enabled to offer to the public an article at once combining Utility and Cheapness. The inventor knowing the danger apprehended on account of the flimsy manner in which Matches are generally packed in paper, has by the aid of new steam machinery of his own invention, succeeded in getting up a Safety Patent Square Upright Wood Box; this box is far preferrable, inasmuch that it occupies no more room than the old round wood box, and contains at least Two Hundred per cent more matches, which, to Shippers, is considerable advantage. It is en tirely new, and secure against moisture and spontaneous combustion, and dispels all danger on

transportation by means of railroad, steamboat or any other mode of conveyance. These matches are packed so that one gross or more may be shipped to any part of the world with perfect safety. They are the most desirable article for home consumption, and the Southern and Western markets, that have ever been invented. Dealers and Shippers will do well to call and ex amine for themselves. These Matches are WARRANTED to be

superior to anything heretofore offered to the public.
