MENTAL IMPROVEMENT. HAVING received a supply of G. F. Root's Book entitled the SABBATH BELL,

Also a few copies of Dr. E. K. Kane's second ARCTIC EXPLORING EXPEDITION, and a large assortment of Miscellaneous Reading and School Books, together with a great variety of Foolscap, Note, Post and fancy Paper; stee pens, Envelopes of nearly all sizes, qualities and colors. The subscriber having fer several years past largely increased his stock of books, and believing that in a population of over 5000 in Bridgeton and vicinity, a Book and stationery store would be patronized, would now carnestly invite all persons to give him a call.

Owing to want of room below stairs, we have to keep the largest amount of our books in a emall room on the second story floor, and all persons wishing to purchase, are invited to walk up and examine at their leisure and for themselves, at SAMUEL L. FITHIAN'S

HAIR DYE. ADIES and gentlemen wishing to have their hair or whiskers of a beautiful dark brown

or jet black, can do so by calling at Samuel L. Fithian's drug and chemical store, and purchasing his superior Hair Dye, at a cost of 25 cts. perbottle. The dye is warranted not to injure the hair, but rather to improve its growth, and to make an unchangeable and natural color with but very little trouble or expense. Try it, and if it does not give satisfaction, if used according to directions, you can have the money refunded.

WEST JERSEY ACADEMY. BRIDGETON, N. J.

DAVID THOMPSON, A. M., Principal and Instructor in the Classics. J. B. WOODARD, Instructor in Mathematics and the English Branches.

HENRY NEFF, Instructor in Music. THIS institution is located near the pleasant and healthy town of Bridgeton. It is believed that it possesses advantages enjoyed by few similar institutions in our country. Being in the outskirts of the town, it furnishes retirement to the student, and withdraws him from many temp-tations to which he would otherwise be exposed, yet is sufficiently near to allow a punctual attendance at church on the sabbath. The building is of recent construction, and has all the modern improvements designed to promote the health

And comfort of the pupils.

Pacilities will be furnished for acquiring a thorough English, mathematical and classical education, preparing the student either for college or for the more active duties of life. Students will find all the comforts of a home in the family of the principal, with whom they will be required to attend church on the sabbath, unless a wish to the contrary is expressed by their parents.

For board and tuition in the English and Classical branches, together with light and fuel, \$80

per session of 22 weeks. Washing \$5. The next session begins on Wednesday, May 6.

NEW MAP

Of Cumberland County, N. J. TIME undersigned respectfully informs the citigaged Mr. Thomas H. Paschal, civil engineer, of Philadelphia, to make a scientific survey of the County. He has already commenced, and if sufficient encouragement is offered, will continue to aurvey the whole County, for the purpose of constructing a complete Map of it. As this will necessarily be attended with heavy expense, an agent will call on the inhabitants for a substatial expression of their approbation of this great undertaking; and in as much as a good Map of the County, with the location and name of the occupant of each farm, is of great value to one and all, the publisher feels confident of a liberal patronage.

CIRCULATION 1500

Only 31 00 per Year! JAMES B. FERGUSON, -EDITOR.

GAS-WILL IT PAY, &c. the town of Bridgeton with gas, the books of phia. subscription to the stock, will be opened at the Hotel of E. Davis & Son, on Monday next. The books are in the bands of some of our most energetic and popular business men; men, who if they are sustained with one half the energy they ought to be, will put the matter through right. That the successful establishment of such an institution in our midst would benefit the town, by creating a new branch of industry, and enhancing the value of property, is a result that no intelligent man will be liable to doubt. But will it pay the stockholders? "Aye, there is the rub." If, as Patrick Henry tells us, "there is no way of judging the future but by the past," we should unhesitatingly say that it will pay. The best standard for estimating the results to be obtained from any business, is the amount of success obtained from similar enterprises elsewhere. The establishment of gas companies is no untried experiment; for nearly a quarter of a century it has been the main illuminating medium of most of the large cities in the Union, and for several years past appears to have been successfully used in towns much smaller than this. Even amid times of commercial difficulty, when stocks are much depressed and various incorporated pursuits brought down to bankruptcy and ruin, we hear of no breaking or suspension of gas companies. Light is an article that must be had whatever the monitary phases of the times may be. The necessary steadiness of the consumption create a steady and certain demand, that must be comparitively but little affected by other business pursuits. We possess here, or can cheaply obtain, all the ingredients for an economical manufacture of it. Our navigation is unsubscriptions to the capital stock of this com- before its close. pany. We are very much mistaken if it will not pay better and more satisfactorily than

the number of consumers. Having thus, we think, inferentially shown will pay the consumers. It will hardly be not yet given. questioned that it possesses the merit of giving a clearer and more brilliant light, than either camphine, burning fluid, oil or tallow. While the weekly catalogue of accidents causing deformity, suffering, and even death, resulting from the careless use of the two first, affords an unmistakable evidence that it is much safer. The dirt, grease, and unpleasant odor inseparable from the use of the latter, we need not tell our readers, especially the ladies, render them the aversion of every tidy housewife. We reccollect amongst the earliest of our evening performances, upset ting a stand upon which an oil lamp was burning, among a number of ladies who were scated around in their best-bib and tucker, and enjoying an evening's social companionship. The reccollection is still vivid of several genuine ciled silks being the result of the performance. We never have been able to abide oil lamps since. We regret that we have not procured statistics for showing its superior cheapness for domestic use. Citizens of Philadelphia have repeatedly assured us that they had found it much the cheapest artificial light yet used. An evidence of the correctness of this assumption is found in the fact that instances are not known of individuals or communities, voluntarily going back to the use of fluid or camphine, which would be likely to be the result of an increased cest of consumption. The ease with which it can be regulated to various shades of brightness, thus adapting it to a compass of any size, is another strong recommendation in its favor. For Churches, public buildings, street lamps, stores, offices, shops, &c., it is conceded to be so vastly superior, that it would undoubtedly as a matter of economy and beauty, be introduced into them all, thereby saving much of posals were received from Jersey City, Trenthe labor and drudgery incident to keeping ton and Hoboken, besides New Brunswick. the present race of lamps in working order. TRENTON N. J., April 17, 1857. MR. EDITOR:-The New Jersey Conference of the M. E. Church closed its annual session in this city on Thursday night the 16th inst. Never in the entire history of this large body has an annual meeting of its members been fraught with such thrilling interest. One circumstance which contributed to this interest, was the fact that in May last, the General Conference divided the body into two annual conferences with permission, however, to meet once more in joint session. That session has now been held. Hereafter the New Old Corn, Jersey and the Newark Conferences will meet | New Corn, as two distinct bodies. A remembrance of Oats, this fact seemed to be constantly present to the minds of numerous brethren in attendance and all seemed to be affected by the thought so often expressed, " This is our last session." Greater harmony in a body of two hundred than was witnessed among the members of the late New Jersey Conference.

Bishop Scott in his closing remarks made a touching allusion to this fact. "I do not reccollect," he said, " having heard a single unkind word uttered by any brother during interrupted for the greater part of the year, our whole proceedings." CREATEST DISCOVERY OF THE PRESent century for

Delecting Cointerfeit Bank Notes.

Describing every genuine bill in existence, and exhibiting at a glance, every counterfeit in circulation! Arranged so admirably that reference is easy, and detection instantaneous.

No Index to examine! No pages to hunt up! that a first roy be annurated without the slightest pain inhaling the ordinary barning gas will destroy life in a few inerts.

The inhalation of a ammonia will rouse the system when fainting or an arrently dead. The olor of many of the medicines is perceptible in the skin a few minutes after being inhalad, and may be immediately detected in the blood. A contineing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air. Is not this positive evidence that proper refusalities, carefully prepared and judiciously administered through the lungs, should produce the most happy result? During eighteen years practice, many thousands, suffering for in discases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferent had been pronounced in the last stages, which tally satisfies me that consumption is no longer a fatal discase. My treatment of consumption is orginal, and familial in long experience and thorough investigation. My perfect acquaintance with the nature of tubercles &c. candles me to distinguish, readily, the various forms of discase that simulate consumption, and apply the proper remedies raisely being mistaken even in a single cast—This familiarity in connection with certain pathological and microscopic discoveries, canables me to relieve the lights.

This familiarity being mistaken even in a single case,—and nitroscopic discoveries, enables me to relieve the lung from the effects of contracted chests; to enlarge the class, purity the blood impart to it renewed virality, giving one gy and tone to the entire system. Fox 55, Post Dijke.
