For the West Jersey Pioneer "The Brightest still the Fleetest." BY GEORGE E. TOMLINSON.

Alone I walk the winding forest path Along the murmuring stream, whose music low The Past recalls, which like a landscape seems, Where hurrying shadows flit across the plain And far away the golden sunshine chase, The lolling bell sends forth its mournful tones Across the silent waters, like a knell Of cherished hopes now dim in endless night. The passing breeze comes sighing through the

It is apparent that the people of this great province enjoy as much liberty as the people of the United States, and there is no doubt in my mind, but that the people here reap rich fruits from the achievment of American Independence. My patriotism as a native Jerseyman tempts me to say, I think the refugee descendants here, are thriving and enjoying more than they deserve.

· Canada West is situated not only adjacent to the States, but in the very arms of our republic, so that the population become familiar with, and seem to appreciate the principles of our State institutions, Conscious of a degree of rightful independence belonging to American governments, they seem contented in the undisturbed possession of all that is enjoyed in any country. They cultivate and foster all the useful and ornamental arts. By inspecting the map it will be seen that Canada West is of peninsular form, thrust like a wedge into the heart of our own vast country. You, situated on the sea coast near the sunny South, may suppose this a savage little known land, far north, cold, unproductime and uninhabited. But not so. I find it all open with complete reads and postal communication. There are countles, villages and hanlets a vast country full of people ex-tending several hundred miles north where Railroads penetrate from Buffalo and Toronto Okies for resources and productions.

Notwithstanding the rapid strides we a making as a nation in learning, arts, and refinement, it is much to be feared that crime is gradually and steadily increasing. Riots, incendiarism are of weekly, almost daily occurrence. There appears to be a growing disinclination amongst the youth, to submit to the wholesome-restraints of domestic life,-Of the total amount of crime committed, the accounts would seem to indicate that much hood. This is a melancholy fact, clearly large cities are usually the fruitful fields of In Philadelphia, claimed to be the most morport of the Mayor, twenty-five thousand arrests for criminal offences were made during the last year. During the last month, over twenty-three hundred arrests were made. When we reflect that probably not more than twothirds of the violators of law are arrested, the

the larger part is committed by youthsmere children, under the legal age of mandemonstrating that stronger and more effectual remedies must be employed, if we succeed in checking the growth of vice. Our crime, where it is systematically pursued al city in the world, according to a recent re catalogue becomes truly appalling. In his charge to the Grand Jury of Philadelphia county, three months ago, Judge Thomnson morals Now our fair city seems filled with all manmer of crime. Scarcely a day passes that a murder is not added to the dark catalogue. Robberies, burglaries and arsins, are the daily food of those who read our newspapers, and a detirmined disregard of law seems once more the prevailing spirit of the day." It is scarcely possible that such a condition of things can prevail in the city, and not shed a demoralizing influence upon the surrounmust feel something of the infection. The daily perusal of crime has a tondonoy to familiarize the mind with it, and to render its perpetration more easy. Unless we can bring some strong counteracting influence to to increase. It is not sufficient that we build churches and school houses, and perform the external ceremonials and show of religion. Each one must perceive and acknowledge an individual duty to be performed. Each must endeavor to exert a wholesome influence over the youth, and early instil into their minds a spirit of subordination to law. The grand levers to accomplish this, or any other reform, are home instruction and home example .-If the parent is profane, can the child be expected to reverence, as he ought, the name of Jehovah, or the solemnities of his sanctuary? If parents are immoral, will their children be upright in their conduct? Nay more, If parents are even moral themselves, and regular in the outward performance of their church duties, and yet allow their children to follow. unrestrained, the foolish maxims and fullies of the world, they can have no moral right to expect them to become so firmly fixed in correct principles, as successfully to withstand at all times the allurements to vice. They should themselves be the examplers of what they would have their children be, and by a rigid enforcement of domestic restraint accustom them to the proper restraints of law. From their cradel should they be taught to respect and implicitly obey, both as a duty and pleasure, all the requirements of civil and moral law. With every lesson of the school room, in labor or in art, should the grand doctrine of subordination to law be taught, as the only means of securing distinction in the one, or the just rewards of the others. The condition of those countries where law is trampled under foot and disregarded, cannot be too frequently brought to view, nor can the lessons they afford, be dis-

regarded without endangering the prosperi

ty of our own. The opportunities in cities

for the commission of crime, and the tempta-

tions to it, should be carefully weighed by

every christian parent, before he allows his

child to leave the healthier atmosphere of the

country to be exposed to them. Unfortu-

nately the inducements to crime are not con-

fined to cities. Bad men and bad examples

are not wanting to shed their baneful influence

on society. Still more unfortunate is it, that

such men are enabled to occupy prominent

positions, by means of which, their evil influ-

ence becomes more widely extended. Offices

once thought honorable are no longer sought

by the best and most competent men, but are

too frequently filled by those who are entirely

and for a time unperceived, sap the very foundations of social happiness. Rivalling the serpent in subtlety, they fall upon the confiding heart of childhood, with fatal force, and ere the unsuspecting parent is aware, his child has been fed intellectually in "poisons, ill they become a nutriment." The production of an impure mind, whose soul is filled with an atmosphere of profanity, is no more fitting for the perusal of a household, than is the society of the wicked for that of the virtuous. The precocity of young America, and the tendency so manifest to rioting and lawlessness, are, we repeat again, the ligitimate results of a neglect of domestic restraint.

the question, "Is crim on the increase?" By T. Davis. this inquiry we wish to be understood in a more enlarged view than simply extending to our own Town, County or State. The history of the past few weeks is sufficient evidence that crime is oh the increase in this neigh borbood.

On Wednesday last there were no less than three commitments to our county isil. One an Englishman from Salem County, for rob bery. However, he was soon transported to

a lodgement in the "wilderness" of Salem. Another, a man living in this town, who ad a spree with his wife. We did not enquire into the particulars, and can only refer our readers to the man and his wife, who wili each undoubtedly give a version of their own to suit the occasion.

The third was that of a young man by the name of John Johnson, who was arrested in Commerce st., between 7 and 8 o'clock P.M. on his way to Millville, in a buggy, with a woman by the name of Sarah Joslin, with whom he has been boarding at that place. -They left home in the morning on a visit to her friends, took a circuit round the country in the neighborhood of Centreville, and was on their way home, when the young gentleman (?) determined not to go where she w shed him to, whereupon she took the lines, but was soon beaten in a brutal manner by the fiend, who was evidently intoxicated .-The lady (?) stated that she had hired the horse of John Hoover, in Millville: paid the expenses of the trip, and took the gentleman along, as she thought two looked better than one passing through the credit of the town that she will bring no more such gentlemen into it, or not entrust them with a \$5 bill, as

ADDRESS.

What emotions of deep and thrilling interthe new born earth, beheld a world fresh from the forming hands of the great Creator, on whose lovely surface the dark mantle of error had never cast its winding folds, and when all nature announced in triumphal tones the universal reign of truth

As they turned from the blissful present to the far and unknown future, joyous indeed must have been the golden anticipations which filled their minds, as they pictured to them selves, the world's prospect by successive generations of human beings, fashioned and formed by the Almighty, with God's own image upon them, and with each a mind it which no sin was e'er to find a resting place. But alas! the blessed auticipations of even augels were doomed to bitter disappointment The hydra headed monster, error, has crawled out of his deep, durk den, upon the lovely face of nature, and winding his serpant evils round the soul of man, infused his poisonous breath into the very lungs of the whole human race. Thus have truth and reason lost their supremacy, and sin entered the heart of man. Under the barbarous reign of error, nany of the blessed principles of virtue have been trampled under foot, while the bitter evils of intemperance, the blightening curse of human servitude, and the horrors and miseries of war greet us on every hand, as the blood stained trophies of a cruel despot-It is a glorious thought that the application of truth occurred all this discord in the moral world and again this hash the bless d principle of " peace on earth and go

IMPORTANT DISCOVERY

CONSUMPTION And all Diseases of the Lungs and Throat are positively Curable by Inhalation. Which conveys the remedies to the eavities in the lungs through the air passages, and coming in direct contact with the disease, neutralises the lubercular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts remewed vitality to the nervous system, giving that ione and energy so indispensable for the restoration of health. To be able to state confidently that Consumption is carable by inhaption, is confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleausre. It is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stages, and fifty per cent in the second; but in the hird stage it is impossible to save more than live per cent, or the Lungs are so cent up by the disease as to bid defines to medical skill. Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering at-tending this fearful sourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present pop-ulation of the earth, eighty millions are destined to fill the

Consumptive's graves.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither ago nor sex, but sweeps off allike the brave, the beautiful, the graceful, and the gitted. By the help of the Supreme Being, from whom conact every good and perfect gift, I am embled to offer to the afflicted a permanent and speedy care in Consumption. The first cause and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate of feet, produced by their deposition in the lungs, is to prevent the free admission of air into the air cells, which causes a weakened vitality through the entire system. Then surely it is more rational to expect greater good from medicines entering the enviries of the lungs than from those administered through the stomach: the patient will always find the lungs free and the breathing easy after inhaling remedies. True, inhalation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered by the stomah. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest paint inhaling the ordinary burning gas will destroy life in a few hours.

that a limb may be simplified without the slightest pain; inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of a ammonia will rouse the system when fainting or apparently dead. The odor of many of themedicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air. Is not this positive evidence that proper reflective, carefully prepared and judiciously administered through the lungs, should produce the most happy resulte. During eighteen years practice, many thorisands, suffering from diseases, of the lungs and throat, have been under my care, and I have effected many remarkable cures even after the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is original, and founded on long experience and thorough investigation. My perfect acquaintance with the nature of unbereless &c. enables me to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies arrely being mistaken even in a single cuse.—This familiarity in connection with certain pathological and microscopic discoveries, enables me to relieve the chest, purify the blood, impart to it relieve the chest, purify the blood, impart to it relieve the chest, purify the blood, impart to it relieved vitality, giving energy and tone to the entire system.

Medicines with full directions sent to any part of the United States and Canadas by patients communicating their symptoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give me an oppartunity to examine the lungs and enable me to prescribe with much greater certainty, a d then the cure could be effected without my sceing the patient again.

How long will Agriculturists submit to the Guano Monopoly, whilst they have the above more potent and more valuable fertilizer, at thirty per cent. less cost? Read the annexed Certificates & then try it along side of the best Peruvian Guano, and let the result speak for itself.

Certificate of Dr. Hayes.

The specifications of Dr. Hare, and J. Odam, having been submitted to me, I have found the composition of matter on which they are founded to be highly nitrogenous and fermentable compound, containing the essentials of a fertilizer of the highest character, and also the food for sustaining crops to the time of their maturing. regard this enterprise of manufacturing a guano instead of importing it, a practical and important undertaking, favorably affecting the interests of our common country. Respectfully,

A. A. HAYES, M. D. Assayer to State of Massachusetts. Certificate of Professor Booth.

Upon examining the composition of the best
Peruvian Guanos, I can perceive no ground for
assuming it to the best that can be made. On the contrary, there is always present more or less of the superfluous matter, sometimes in large quantity. The composition proposed by Odam & Hare's Patent, is, in my estimation, superior to that of the best Guanos, or to any other artificial manure of which I have heard, and I think myself the more entitled to give this positive opinion, from the unlooked for results of the action of sulphuric acid on animal matter, which I ob-

tained in experiment, but which were anticipated by the Patentin question.

Respectfully yours. JAMES C. BOOPH.

Certificate of Professor France.

At the request of parties interested. I have no At the request of parties interested, I have no hesitation in stating my opinion, that the mode of preparing an artificial manure, by acting upon animal matters by applicationally as detailed in Dr. Hare's Patent, and mixing the resulting into stance with animal charged and phosphate of Lime, is correct in theory, and although I have Lime, is correct in theory, and although I have had no opportunity of teeting the manure thus formed practically. I have not find the proper properties, would be found at least to equal in the fifth the best Guano.

CHEAPER GOODS CHEAPER GOODS

Having procured the services of a first rate set of hands, and made arrangements for manufacturing the most of the ready made clothing that I sell, I have now on hand a large and splendid stock of clothing, manufactured under my own supervision, of the most durable materials by the best workmen made equal to customer work, and warranted to give satisfaction to all that try them, and at the same time are enabled to sell cheaper than any other house in Bridgeton, as there is but one small profit on my goods, whilst those goods that are manufactured in the city must have two profits; the manufacturer must have a profit, and the retailer must have his so it must be obvious to all that I have the advantage over those who sell city-made work.—All I ask is a call before you purchase elsewhere, and if you are not satisfied that my goods are better made, and cheaper than you can buy elsewhere. I do not ask you to buy, nor do I consider it any trouble to show you my goods.

LOTTERIES.

THE Lotteries of Samuel Swam & Co., are chartered by the State of Georgia, and have sworn commissioners appointed to superined their drawings, and certify that everything connected with the same is done in a strictly honorable manner. They offer to the public a fair opportunity for investment, the interests of the parties at a distance being as well protected as though they were present. The Managers would respectfully call attention to the fact that all persons have a legal right to send orders for tickets to Georgia, as the lotteries of Samuel Swan & Co., are authorized by the Legislature of that State. A lottery will be drawn every Saturday throughout the year, all orders received being filled in the drawing next to take place after the same comes to hand. According to the scheme one ticket in every ten mustdraw a prize. Tickets are 10 dollars; halves, 5, quarters, 2,60. No ticket sent unless the money accompanies the order. The drawings are upon the principle of one number on each ticket and are 50 simple that mone can fail to understand them. There is no combination of numbers to mystify the buyer. Prizes vary from 40 to 50, thousand dollars; every prize being daawn, and result of drawing forwarded to all purchasers.

A list of the numbers that are drawn from the wheel, with the amount that each prize is entitled to, will be published after every drawing in the following papers:—New Orleans Delta, Mobile Register, Charleston Standord, Nashville Democrat Atlanta Intelligencer, and New York Weskly Day Book. BARBER'S NEW JERSEY COMBINED MOWING AND REAPING MACHINE!

For the Harvest of 1857. BARBER'S Machine has taken the premium in several of the County Fairs, and has been placed in competition with some of the most celeornted. It is simple, of light draught, less compliented, and not liable to get out of order, and will cut all kinds of Grain or Grass equally as well as any Combined Machine ever offered the public.

It is so constructed that all side draught (which is so great in most machines as to regality three, and some four horses to do the work of two) has been entirely overcome, and seldom, if ever, requiring but two horses in any kind of grain or

grass.

You can mow an acre per hour the whole day through with but two horses, and with the same ease for the team as plowing, and at a slower gatt than any other Machine ever in this region.

No Real is required in mowing any kind of grass. It has been fairly tested by a number of practical farmers, and quite sufficient to prove its complete adaptation to mowing as well as reaping. I have received many certifortes from waste. ing. I have received many certificrtes from practical farmers and competent judges, establishing its merits over any other machine ever used in this State. The following is the award of the Committee of

the Agricultural So. at the Reaping and Mowing Machine, at Bowentown, July 9, 1856, at which time and place were entered one of McCormick's with four horses, three of Manny's with two horses each, two Ketchum's with two horses each, and one of mine with two small Mules: "Your committee have came to the conclusion, after taking all the circumstances into considerntion, the clearness of the cut, and least clogging to the knife, that Rarber's Machine, worked by Samuel M. Sheppard, did the best work." The above machine will be made to cut any desired length of swath, from 4.41 to 5 feet, as may be ordered. An extra knife accompanies each machine. They are manufactured and for sale by the subscriber at Bridgeton, BOBERT BARBER.
