THE EAST END. Gentlemen and Ladies' Boot & Shoe Store

BENJAMIN THOMPSON. WOULD inform the citizens of Bridgeton and the surrounding country that he is still at the trad! that he commenced learning in this place the day after Bridgeton was illuminated for parce, (1815), and has taken of Mr. Samuel Recres his old established Boot 48 Shoe Stand, next door to Daniel Fithian's store. Being fartless cast on Contract estate of any in the trade, I name it the Least End Boot and Shoe Store,

and as the sun rises in the east to enlighten and advance the day, so will I endeavor to enlighten my fellow difficens where they can buy the cheapest and best Boots & Shoes uch as I made for many of you 27 years ago, while some f you were children, who are now heads of hundles & stran-ers to me; and feeling an interest in your welfare, I res-cetfully invite you to call and see me, that we may renew our acquaintance, and if you are in want of either Boots or Shoes, I would like to sell you, if I have the article on hand that will suit you, if not, I can measure and make to suit your fancy, at the can measure and make to suit your lancy, as the shortest notice. My stock on hand consists of men's fine calf skin Boots, good quality, and 20 per cent. cheaper than I could make for the money now; fine kip of the same stamp, and others at a less price, but not so cheap; men's French calf, patent leather, and drab cloth top Gaiters, and a general assortment of men and boy's pat-ent leather and calf skin gaiters. Prince Albert half Gaiters for men, and Queen Victoria for the ladies, and a fine assortment of children's Boots and Gaiters of different sizes and colors. Some of my work was made rather farther east than I am, and the brethren of the craft down there' understand how to make beth good work and poor work, and I understand how to discriminate & inform my customers which to buy. Having had forty-two years' experience, I know what good stock is & when & how it should be made in good Boots or shoes; to prove this try me, & if I should be mistaken, I will make all right.

N. B .- Being a little hard of hearing, you will have to speak louder if you ask for credit, but if cash is talked of, my hearing is better, which makes it more pleasant for both parties, therefore I have invariably made my terms Cosh on delivery of the goods, & I will put the price so as to make the inducement to pay the day taken.

P. S.—Mending and repairing of all kinds done at short notice and as cheap as the price of stock will admit of. May 9, 1857-3m.

The natives of the Sigtes involuntarily dis posed, will celebrate the birth of American Independence wherever they may be througout the world. In some parts of Canada, where many yankees are dispersed, they celebrate the Fourth of July in a quiet way without molestation or insult. But some will raise the Star-spangled Banner in the night upon the summits, or on some tree in. the village, where the emblem of freedom "surprises the natives" of the presence of the day, by waving its ample folds in the morning breeze. Some proceed so far as to announce in the ear of British subjects, the approach of this birthday of a Nation, by the impressive voice of cannon. These proceedings are annoying to the conservative population, and very obnexious to the English, and lead to altercation. But the vankee residenter claims the right here to raise on his own ground what he please. When he is denounced as disloyal, the yankee passes it over as a spat of fun, declaring he will join them hear; and hand in celebrating the 24th day of May as

the "Queen's Birthday." But I intended in this to give you my sentiments as they occurred on my frequent visits and views of Suspension Bridge. These sentiments, you may think, are quaint and expressed poguliarly as is characteristic of the

Niagara Kalls and Suspension Bridge are acknowledged by all to be the two great wonders of the world. L'Estrange, in his fables, tells us that a number of frolicksome boys were one day watching frogs at the side of a pond, and when any of them put their heads above was ter, the boys pelted them down with stones. The poor creatures, wearicd at length with such unmcrited treatment, resolved to remonstrate, and in doing so, made this striking ob. servation: "Children, you do not consider that though this may be sport to you, it is

The moral of this fable I believe is, that the most of the evils we suffer from the misconduct of others, arise from the want of con saleration on their part.

Hence, I infer that the wrongs inflicted on community by cattle running on the highways and contiguous out-lands, arises, noviso much from sheer covetousness of their owners, or a disposition to appropriate to themselves what does not belong to them, as from a want of proper consideration of what most certainly will be the consequences of allowing their stock such unwarrantable liberties. Only \$1 00 per Year! JAMES B. FERGUSON,-EDITOR.

We intended after returning from our tour through Cape May County, to give a sketch of the trip, or note some of the incidents which came under our notice, but as we we returned and in the greatest agony scribble off a column or two, which could not well be deferred, we hape to be able to write next week what we should have done this, had our health permitted. Those of our readers who receive their paper later this week than usual are reminded that sickness is the cause.

Through the politeness of our young friend G. F. Nixon, (a brother printer) who is visiting his relations in this neighborhood, and an "extra effort" by our steady force, we are enabled to present the Pioneer within a few hours of the usual time.

THE EXCURSION.

The excursion made to Cape Island by the Express, Capt. G. E. Wills, was decidedly the most pleasant of the season. Notwithstanding the weather was unfavorable, having rained about the time the boat was to leave the wharf, yet a company of nearly one hundred left Bridgeton about eight o'clock A. M. A more respectable and orderly comthing passed off in the most agreeable manner, the Express, her Captain and crew performed their part in the most satisfactory manner. Including those who landed along the creek there were upwards of one hundred who returned on the boat.

NEW SURF BOAT.

Of late years much has been said and written on the importance of having the coast better supplied with more serviceable mere apology for what they should be.

Twenty years since, the best surf boat on the coast was not much better than an orditime has not kept pace with other improvements and inventions of the age.

To supply the great demand by furnishing a boat every-way competent for the task of rescuing the lives of shipwrecked mariners from a watery grave, an individual the prime of whose life has been spent upon the Jersey coast in rescuing the lives and property of his fellow men, after impairing his health and deranging his system to such an extent as to prevent any more physical labor to be performed, has for some months past been exerting his fertile mind on the subject of life boats. which has resulted in the invention of a new self-righting and self-bailing surf boat.

That our readers may have some idea of the boat we will add, that she is 23 feet on deck. 19 feet keel, 6 feet 6 inches beam, coustructed of the best white oak and cedar, with 2,100 copper rivets and seven gross of brass screws. She has a chamber at each end filled with cork shavings, 54 bushels in both, a tank in the centre filled with water, which when taken into consideration that her bow and stern run un to a point, giving her the appearance of a Chinese vessel, it will be seen at once that she is calculated to perform all ting. LYNCH LAW.

Never within our recollection, have we seen so many accounts of a resort to lynch law. It really seems as if a spirit of lawlessness pervaded the entire community. A rebut imperfectly understood, and but seldom administered. If to day we read of the summary punishment of claim jumpers or horse thieves, by the people of Minnesota or Kansas, to-morrow its counterpart may be looked for in the telegraphic despatches of the older States. North, South, East and West, the same spirit seems to prevail. The natural impetuosity and haste which characterize our travel and business, seem to extend also to the punishment of crime. Criminals must not only be punished, but it must be done instantly before any tedious delay of law gives the popular excitement time to cool, and produce dispassionate and wise action. The only palliating feature observable in these procesdings, is the fact that these objects of popu" so that they must have had a pleasant time. lar vengeance, are mostly guilty and deserving of punishment; it also unfortunately happens that for some classes of offences, the law does not provide an adequate punishment. "CATTLE ON HIGHWAYS." MR. EDITOR :- Much has of late been said on this subject, and we think but very little argument used either in favor of against cuttle running in the roads.

We should say if a man is poor, and has s quiet cow which he cannot get pusture for at reasonable price, or at any price at all then let him turn her into the road; if she should trespass, let the owner be notified of the amount of damage done, and if he is a reasonable man he will pay the charge without obrighter. As the flews had not yet been in- measure, deprived of the benefits arising from jecting. If such were the case, but few if any objections would be made to his turning his cow into the road. It is seldom the poor man's cow that causes the annovance to farmers, but oftener those belonging to a class quent that hell hole, and spend my money of persons who own land, (we will not call them farmers - they do not desero the name.) nearly all the year, the whole of the teacher's These persons have from three to seven head of cattle, perhaps one or two of which may be mileh cows, the remainder heifers, steers gether of teachers, to give a new impetus to or calves-none, perhaps, of which ever se their imperfect attainments, and prevent their inside of their owner's field except through falling behind the rest of mankind in life's the road fence, although he may be the owner of thirty or forty acres of land. If a gate should be left open, or a bar down, these cattle are almost sure to get in. It causes a constant watch to be kept from year to year. and the owners of such cattle think it a duty you owe them to do so. If their cattle should get in and destroy your grain, or do any other damage, and you should tell them of it, or put their cattle in your barnyard, your character is at stake—so far, at least, as they can injure it. We will mention an instance of the kind which came under our notice. When Alfred Holmes lived on a rented farm, there was a man in the neighborhood who owned forty acres of land and five head of cattle. These cattle were always left to run in the road, except about three months in the year, when they were fed on salt hay and a few corn stalks-just enough to keep life in them -for persons who turn their cattle in the road don't have much feed. As soon as the ground in the spring fand the grass looked green at a distance, these were turned in the road to get their living as best they could for another nine months. They were a great annovance to the neighborhood. There were many who would willingly have shut them up, but they dare not do it-they were propose to hold next week, when we hope to afraid of offending the owner. One day these cattle got on Alfred Holmes' premises county present, and as many of the friends and done considerable damage. Mr. Holmes of the cause of Education as they can induce shut them up, and told the owner when he to come with them. WHICH is beyond all doubt the most powerful and valuable fertilizer ever offered to he public.

How long will Agricult wists submit to the Gu-How long will Agricult ists submit to the Guano Monopoly, whilst they have the above more potent and more valuable fertilizer, at thirty per cent. less cost? Read the annexed Certificates & then try it along side of the best Peruvian Guano. and let the result speak for itself. Certificate of Dr. Haves.

The specifications of Dr. Hare, and J. Odam, having been submitted to me, I have found the composition of matter on which they are founded to be highly nitrogenous and fermentable com-pound, containing the essentials of a fertilizer of the highest character, and also the food for sustaining crops to the time of their maturing. regard this enterprise of manufacturing a guano instead of importing it, a practical and important undertaking, favorably affecting the interests of our common country. Respectfully, A. A. HAYES, M. D.

Assayer to State of Massachusetts. Certificate of Professor Booth. Upon examining the composition of the best Peruvian Guanos, I can perceive no ground for assuming it to the best that can be made. On the contrary, there is always present more or less of the superfluous matter, sometimes in large quantity. The composition proposed by Odam & Hare's Patent, is, in my estimation, superior to that of the best Guanos, or to any other artificial manure of which I have heard, and I think myself the more entitled to give this positive opin ion, from the unlooked for results of the action of sulphuric acid on animal matter, which I oh tained in experiment, but which were anticipated by the Patent in question.

Respectfully yours. JAMES C. BOOTH.

Certificate of Professor Frazer. At the request of parties interested, I have no hesitation in stating my opinion, that the mode of preparing an artificial manure, by acting upon matters by sulphuric acid, as detailed in Dr. Hare's Patent, and mixing the resulting sub stance with animal, charcoal and phosphate of Lime, is correct in theory' and although I have had no opportunity of testing the manure thus formed practically. I have no doubt that a manure formed by the mixture of these ingredients in proper proportions, would be found at least to equal in its effects the best Guano. November 22, 1856. JOHN F. FR. 4ZER.
