SOMETHING NEW.

Since man by sin has lost his God. He seeks creation through; And vainly strives for solid bliss, In trying Something New.

The new possessed like fading flowers, Soon loses its gay hue; The bubble now no longer charms, The mind wants Something New. Could we but call all Europe ours,

California and Peru: The mind would feel an aching void. And still want Something New. But when the Saviour's love we feel,

All good in him we view; The mind forsakes its vain delights. In Christ finds Something New.

The jays the dear Redeemer gives Will bear a strict review, Nor need we ever change again, For Christ is Always New.

Cheerful we'll walk the road to bliss, Joined with a happy few; And when we reach our journey's end, Find beaven Forever New.

MR. EDITOR :- If I give you another col umn on Niagara and its vicinity, it cannot be said that this is much about nothing; yet in may be thought that I dwell a great while on one thing, about which it is thought, all had been said that could be said, and upon which so many have written that the world itself cannot contain it. As in making books, so in writing and printing about these falls, there is no end, nor should there be; neither is there reason to suppose that the intellects in Bridgeton (and the country extending all round to the sea) cannot contain all that may be written.

If we notice the different writings we find the scenery at the Falls calls forth different ideas and produc s different feelings in the minds of spectators, according to their turn of mind or occupation. Some, so constituted, feel the highest emotion of sublimity or are filled with profound awe and devotion. Oth ers are chamoured with such charming beauty as is ever there. Another, without refined sensibility, has such contracted views that he sees no use, form or comeliness to be desired aside from his own gross, seifish interests.-Such was the tailor who noticed only the fit ness of the place to sponge cloth, and the Dutch Farmer, who could see nothing higher to admire than a glorious place to wash sheep, while the boosy wag sees all in foam, fermentation and flowing of beer! I have seen persons here gazing upon the falls, who came from distant lands, and I have found others who live in sound of their perpetual roar, who see the clouds of vapor roll up and rest out of their way to view them.

In conclusion, this place looks to me like whole course of this short river which from the high Towers appears like a silvery thread connecting the two great lakes. See first at Buffalo the placid waters of the lake, then the seething river, the large chasm at the Falls, the confusion, the whirlpools the seeming retrogression yet substantial progress, until the whole subsides again into the recovered calmness of the broad expanse below. A fanciful man may see in it all the stream of time unrolled and connecting the eternity of the past and that of the future. Roll on thou ever flowing tide, exhaustless wave, fis type of the love of thy great author. All nay come and contemplate but cannot exhaust thee. As a pioneer in the work, I have volunteered my services, in the foud hope that by fair and honorable means, the chief obstacle to the rapid advancement of our County and State, in the beauty and

utility of it, improvements will be removed. That the cattle &c., will be withdrawn from the highways and out lands : that those clumsy and hateful rail fences that meet the eye everywhere, will be removed, and give place to something more tasteful and ornamental, or be dispensed with entirely, and that we may all live together in peace and harmony. Seeing I am drawing this paper to an improper length, I must defer the re mainder of what I intended to include under this head, for the next number, in which I propose to point out some of the most important and interesting changes and improve ments that have been effacted in this County within the last 30 or 40 years, and from thence deduce arguments in favor of the reformation desired. 3d. That religious prejudice and sectarian bigotry had nothing to do with the correctoins made by the Trustees, and it is doubt ful if they existed anywhere in richer profusion than in the mind of "Voice of Many and "A Parent."

I have heard the opinion expressed by our best citizens, that if "Miss H. had been a member of his church, the corrections would not have been deemed necessary." It is really laughable. Hoping, hereafter, that if "Voice of Many," or "A Parent" has any more abusive lang to publish, they will do it over their own signatures, I remain yours, &c.

I think Mr. Sleeper would find it a more difficult task to find "abusive slang" in either of those articles, than to "damn with faint "Voice of Many" that she cried over it, and praise." The great error of politicians, and the fatal mistake of statesmen, consist in regarding pecuniary prosperity as a nation's security. But all experience proves the contrary. nation becomes wealthy, the people divide into classes of extremely rich and very poor. The sons and daughters of the former are brought up in idleness, contempt of productive industry, and their necessary consequences, dissipation. The children of the latter are reared in the purlieus of ignorance, vice, and crime. And when the idle and the vicious of the rising generation constitute a maiority, a nation's doom is scaled. A few generations at most will end its independence. Crufty despots will become the dispensers of power and patronage; and to maintain themselves in power, they will administer to the depraved propensities of the people, and pander to their prevailing vices. And then will come long centuries of degradation; the nation will sink to semi-civilizaion, or barbarism, or perhaps savageism.

"How is it, Americans, with you? Are the children and youth of this glorious land steadily improving in the graces of true manhood and womanhood, in the virtues of good citizens and sound patriots? Alas! on this point the testimony is dreadful, fearful.-Does not the press, with one accord, proclaim that crime is rapidly on the increase? like a destroying angel? Already are the marks of a stunted growth, a demoralized nature, a sickly existence, and a premature decay stamped widely on the young men and young women of our country. Are not 'rowdy boys' and 'worthless girls' the everyday theme of your newspapers?

"Philanthropists! rail not so much at vice and crime. Expend less of your strength in denouncing the ignorant and the vicious .-Work less at the branches of the tree of evil, but endeavor to extripate its roots. Seek out the causes of wrong-doing, and cut off at once the fountains of pollution and ruin. Educate in knowledge and morality every child of the Republic. Provide every outcast one with education and occupation. Fashion your institutions more on the principle of preventing crime, and less on theory of its punishment. Do this, and you pile of resplendent beauty and grandeur shall be the promise of a progressive humanity, so long as the oceans rour, Mississippi flows, Niagara thunders, or the everlasting hills remain

A TOUR THROUGH SOUTH JERSEY. In compliance with promise, we will give our readers a hasty sketch of our late tour through Atlantic and Cape May Counties.

It is customary with some who are in the employ of others to ask permission when they wish to be off of duty for a week or two, but as we had important business to attend to, we were rather on extra duty, but left those fully competent to fill the position of editor and publisher, in our absence. We took the privilege of leaving without asking leave or license of our patrons, and on Monday morning the 10th inst., left Bridgeton on our annual trip. The first ten miles ride was over the turnpike between this place and Millville, this | where quite a number have been attracted to being one of the best roads in the State, we were witness the novel sight. but a short time in getting over it, our horse seeming to take delight in traveling over such a road with a light load. On arriving at Millville, we put up for the day at Brandriff's Hotel, where we fared as well as any one could desire, Mr. B. beour travels during the day, we noticed that quite a number of improvements had taken place in that town within a short time past, and among those now in progress is the new bank building, which is rapidly advancing, and when completed will be an ornament to the town, as well as a great benefit and convenience to those doing business in that neighborhood. The officers appointed, from the President down, are just the men qualified to fill their positions, and we doubt not the institution will flourish under their supervision. In the afternoon, having some business to transact with hair. Isaac B. Mulford, we called at his residence and found him on hand as usual, and as polite and agreeable as ever. A long that on matters and things in general, in which he is posted, brought us in the neighborhood of tea time, and we were about starting for the hotel where we had fared so well previously, but it was "no go," Mr. M. and his lady would not hear to our leaving, so we submitted to our fate, which was a more sub stantial supper than any we had the pleasure of discussing the merits of until we left Cape Island, which is saying considerable, as we fared high on our way to, and at the Island. In the morning we started for May's Landing, the county town of Atlantic County; spent the day in that neighborhood, and found the place to be one in Lower Jersey. A beautiful grove in the neighborhood of the county buildings is quite an orna-part of the day, beneath the shade of those tall oaks. As we were over on the shore about that time, among the fish and oysters, and did not return till morning, we had not the pleasure of sceet town, is the establishment of quite an extensive boot, shoe and gaiter manufactory, by Mr. Alfred Clarke. We shall give a more extensive

notice of this establishment in a few weeks. Wednesday afternoon we started for Tuckahoe. On our way, we had a sudden and severe attack of Cramp Cholic, which for an hour or two "set us thinking" about the probability of getting home in a hurry, or in other words, leaving this earthly state. After taking a few doses of pretty powerful medicine, which we procured on the year; and as the committee had a perfect road, we "made out" to get as far as the Tucka- | right to disagree, (as men cannot always think | hoe Hotel, kept by Wm. Having arrived after the regular hour for tea, we were soon provided with a to reply to the minority report, in a style of supper, prepared in such a delectable manner, that sick as we were, and surfeited on high living, it was relished with unusual zest.

The next morning, having business to transact with many at Tuckahoe, we found most of them at home, and will add, that a more clever and agreeable people than they, we never met with.

We congratulate Mr. Royal in having been successful in purchasing the Hotel property in that petitors started, they were shown the regulaplace. It is known as the best stand in that part of the country, and although a very old building they do not tell us, but one of them, and that and much out of repair, it is now undergoing a thorough renovation and enlarging, which when completed will be a valuable addition to the place. Mr. R. is also providing a suitable room for the post office department, which heretofore was altogether unfitted for that purpose. A more popular man for keeping a public house than Wm. J. ROYAL, cannot be found in South Jersey, he is polite, accommodating, and thoroughly competent, and a more clever fellow cannot be produced. If hotel keepers were elected to their office by the voice of the people, Mr. R. would certainly outrun any one that could be put on the course. He is favorably known by almost every man in this the owner has said he would put in competipart of the State. There is one thing however, tion with any other team for draught; or of which we almost overlooked in speaking of the the condition of that team when the half unbounded popularity of Mr. ROYAL, as a hotel keeper, and that is the fact that almost invariably a good landlady deserves an equal share of credit for performing her part well. In this respect the say it would have taken four small mules of hotel at Tuckahoe speaks very plainly in favor of the size of those two that worked our machine a good landlady and good assistants.

In the afternoon we left for Seaville, arriving | They say nothing about the machine best at our old friend Buck's quitelate in the evening, adapted to the wants of the farmer. Are all we were reminded however, before we arrived there, that the Cape May Co. people have plenty of good sized cakes for tea. We felt perfectly safe in our feeble state of health, while under the medical treatment of our friends at that place.

Friday morning we crossed over to Dennisville. a distance of about four miles, from there we went to Goshen, stopped awhile at Mr. Dalbey's hotel in that place, who by the way, keeps a very respectable hotel there and in the course of a few years will have larger shade trees in front, which will greatly add to the appearance of the house and the comfort of horses standing there in the heat of the day. About one o'clock we arrived at the hotel of J. Farrow, Cape May Court lived high, enjoyed the debates which came off each evening at the hotel, on the subjects of fish,

Gas in Operation.

We noticed on Wednesday evening last that Messrs. Bowen & Phillips, had been fitting up the burners in the store of J. M. Maul, and actually furnished the Gas, in advance of all others in town. It must have been generated in the cellar, and may be seen burning in Mr. Maul's window each evening,

MOWING MATCH. MR. EDITOR:—As the committee have had some difficulty in agreeing as to who should have the premium on mowing this confined to them, I for one should not have all. That may be all so; but last year, when written a word, although I considered they had done Manny's Machine gross injustice. thought they were not so honorable, and came But when Mr. Barber takes it upon himself misrepresentation as to the real facts, I think when that very committee allowed you to it time some one had corrected some of those statements, and also looked into the majority report, and see how they came to give Barber's Machine the first premium. In what did its superiority consist? The committee tell us in their report, that before the comtions governing the match. What they were was that the length of the cutting bar, and not the time, was to govern their decision .-They now pass over, in their report, all the mowing; say not a word about Barber's machine stopping two or three times in cutting the first swath; not a word about Barber's Machine being owned and driven by one of the Committee; not a word of how much team, or what kind of team was to the different machines; not a word of Barber's machine having two large team horses, which acre was cut over, on account of the enormous draught of Barber's Machine. I should to have pulled it through for a half acre.-

CONSUMPTION And all Diseases of the Lungs and Throat are positively Curable by Inhalation, which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleausre. It is as much unfler the control of medical treatment as any other formidable disease minety out of every hundred cases can be cured in the first stages, and fifty per cent in the second; but in the third stage it is impossible to save more than five per cent. for the Lungs are so cat up by the disease as to bid definance to modical skill. Even, however, in the last stages, inhalation affords extraordinary relief to the suffering attending this leartiff security, which annually destroys interview thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptives graves.

Truly the outer of death has no arrow so fatal as Conthation of the earth, eighty immons are assumptive's graves.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave, the beautinh, the graceful and the gifted. By the help of the Supreme Being, from whom comethevery good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause manent and speedy cure in Consumption. and perfect gift. I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The lirst cause of tubercles is from impure blood, and the immediate effect, produced by their deposition in the lungs, is to prevent the free admission of air into the air colls, which causes a weakened vitality through the entire system. Theresurely it is more amount to expect greater good from medicines entering the cavities of the large than from those administrict dirough the stomach, the patient will always time the large free and the breast free constitutionally, and with inore power and certainty than remedies alministered by the stomath. To prove the powerful and direct influence of this mode of administration chlorofran inhalted will entirely destroy sensibility in a few himmers, paralyzing the entire nervous system, so that a finth may be ampulated without the slightest, pain hims.

How long will Agriculturists submit to the Guano Monopoly, whilst they have the above more potent and more valuable fertilizer, at thirty per cent. less cost? Read the annexed Certificates & then try it along side of the best Peruvian Guano,

and let the result speak for itself.

Certificate of Dr. Hayes.

The specifications of Dr. Hare, and J. Odam, having been submitted to me, I have found the composition of matter on which they are founded to be highly nitrogenous and fermentable compound, containing the essentials of a fertilizer of the highest character, and also the food for sustaining crops to the time of their maturing. 1 regard this enterprise of manufacturing a guano instead of importing it, a practical and important indertaking, favorably affecting the interests of cur common country. Respectfully.

A. A. HAYES, M. D.

Assayer to State of Massachusetts. Certificate of Professor Booth.
Upon examining the composition of the best Peruvian Guanos, I can perceive no ground for assuming it to the best that can be made. On the there is always present more or less of the superfluous matter, sometimes in large quantity. The composition proposed by Odam & Hare's Patent, is, in my estimation, superior to that of the best Guanos, or to any other artificial manure of which I have heard, and I think myself the more entitled to give this positive opinion, from the unlooked for results of the action of sulphuric acid on animal matter, which I of tained in experiment, but which were anticipate by the Patent in question.

Respectfully yours. JAMES C. BOOTH. Certificate of Professor Frazer. At the request of parties interested, I have no hesitation in stating my opinion, that the mode of preparing an artificial manure, by acting upon animal matters by sulphuric acid, as detailed Dr. Hare's Patent, and mixing the resulting sub-stance with animal, charcoal and phosphate of Lime, is correct in theory and although I have had no opportunity of testing the manure thus formed practically. I have no doubt that a ma-nure formed by the mixture of these ingredients in proper proportions, would be found at least to equal in its effects the best Guano.
