When earthly joys have stole away my heart And charmed me with their vanity, I'll learn their meanness and from them will part, By looking at mount Calvary. Should worldly cares depress my weary soul,

I'll think of Him who hore the weary toil And never shrunk from Calvary. If sorrows sink me low in bitterness, And make me murmur fretfully: Pli think of Him, who suffered more distress,

Till I shall long to fly away;

But murmured not on Calvary. Should friends forsake and most ungrateful prove And leave me in despondency; 'll go to Him, who never fails to love, And proved his love on Calvary.

When sin grows strong and gains the mastery, And fills my soul with sore dismay, I'll cry to Him, who bore my sins away In his own blood, on Calvary. Well, if my day must be a weary strife, And I must watch incessantly: Then all the way to "everlasting life," I'll sing the love of Calvary.

> SEE TO II A Make haste. O man, to live, For thou so soon must die; Time hurries past thee like a breeze, How swift its moments fly. Make haste, O man, to live!

To breathe, and wake, and sleep; To smile, to sigh, to grieve; To niove in idleness througe earth, This, this is not to live ! Make haste, O man, to live! Make haste, O man, to do Whatever must be done:

Thy day will soon be gone. Make haste, O man, to live! Up, then, with speed, and work; Fling ease and self away; . . . . . This is no time for thee to sleep, Up, watch, and work, and pray!

Thou hast no sime to lose in sloth,

The useful, not the great; The thing that never dies; The silent toil that is not lost, Set these before thine eyes. Make haste, O man, to live! -

Make haste, O man, to live. Thy time is almost o'er; O sleep not, dream not, but arise, The Judge is at the door. Make haste, O man, to live! H. BONAR.

AN INCIDENT.

A touching case, says the New Orleans Delta, was presented the other day to the consideration and charity of one of the Good Samaritans who now take care of the sick, relieve the destitute, and feed the starving. A boy was discovered in the morning, lying in the grass of Claiborne Street, evidently bright and intelligent, but sick. A man who has the feelings of kindness strongly developed went to him, shook him by the shoulder, and asked him what he was doing there. "Waiting for God to come for me," said he. "What do you mean?" said the gentleman, touched by the pathetic tone of the answer, and the condition of the boy, in whose eye and flushed face he saw the evidences of fever. "God sent for mother, father, and little brother, said he, "and took them away to his home, up in the sky; and mother told me, when she was sick that God would take care of anything; and so I came out here, and have been looking so long up in the sky for God to come and take care of me, as mother said he would. He will come, won't he?— Mother never told me a lie." "Yes, my should have seen his eyes flash, and the one thousand dollars; and they have made smile of triumph break over his face as he said "Mother never told me a lie, sir; but additional profits by the sale of other "undul. you've been so long on the way!" ANTA OF NOOD PERO

TOBONTO, C. W. Oct. 7th, '58. MR. EDITOR:-No fuller exemplification of the fact that "peace hath her victories not less renowned than war" could be adduced than that just afforded by the conversion of the Garrison Reserve into a palatial site for the Provincial exhibition of the arts, manufactures, agriculture, and general products of Canada. Some twenty acres of land by a former generation set aside for military purposes, has became a busy hive of human industry filled with working bees, whose queen were alone wanting to complete the community. On this ground is the Palace of industry, a building finished with internal fitings to make it a receptacle in every way suitable for the productions of Upper Canada; and these, considering the high rank they occupied in the great exhibition of London and Paris, though competing with the industry of the world, are such as to do credit to the ingenuity, energy and enterprize of the people.

The building is situated on the west of Toronto, and is distant about a mile and a half from the centre of the city. . It occupies a high and commanding situation, baving an excellent view of the Harbor and Lake; and being adjacent to the several railways it is easily accessible. There are four grand entrances to the building, East, West, North and South. The east of which faces the scured glass, which also enters into the comthe source of its security and stability.

How important is the destiny of one soul, and how do all concerns which are merely temporal diminish before it! SMART

One of the smartest young lawyers we ever yet heard of was a sprig. of the Law who resided in Gotham, some years since;

His business was rather limited, to be sure, from two causes; first, he didn't love to work; and secondly, whenever he undertook a case, he proved a "werry slow coach" in making his returns, so that customers got tired of him, and he very soon found his clients, like angels' visits few and far be-

GOOD ADVICE.

The Portsmouth Gazette publishes a letter from Ex-Governor Baker, from which we make the following extract:

Let the thousands of men in this country who are unemployed, instead of waiting for a chance to work in some store, or factory, or shop, or some public work, turn their attention to the cultivation of the soil, as the safest investment with the most certain return for their labor. Instead of wasting their time and money in waiting for chances, let them will out of the ground that sure sup-port and probable confidency which always attends the industrial hand well directed offorts of the farmer. There is unsecupied land enough for all of them. Instead of "cooping" themselves up in stores and shope where they just "equeexe" enough to support their families, let them turn to the plow and spade, and in the open air stake a few breaths of independence.

When "panics" come, the operatives, the olork, the mechanic and others are thrown out of employment; but the farmer has enough to do and enough to eat. BRIDGETON Saturday Morning, Oct., 23,

The Pioneer has a LARGER Circulation than any weekly Paper in this State!

Only \$1 00 per Year!

JAMES B. FERGUSON,-EDITOR.

Harper's, Godey's, Graham's, Peterson's, and Emmerson's Magazines for November have been received, for which the publishers will please accept our thanks .-All of them are worthy a place in every household, and should be subscribed for by those who desire to keep posted up in the popular Magazine literature of the day. We have made arrangements with the publishers, by which any of the three dollar had for three dollars per year.

## The Musical Convention.

The Convention was organized in Shepcharge of Prof. G. F. Root, who has conducted previous musical entertainments with himself so exclusively to the improved method of drilling classes, as it was his intention, and the expectation of the managers that he would do. The Convention closed with a grand Concert on Thursday evening, in Dr. Jones' Church, before a large and appreciative audience, eliciting high encomiums upon the peculiarly artistic manner of execution, showing a practical knowledge of the principles of a fine musi-

The various Trios, Quartets, and Solos, were received with much enthusiastic interest and reflected great credit upon those who took part in them.

from a publisher, that he does not pay all bills contracted for advertising, and among the many who have purchased books from his establishment, none can say they have not got the worth of their money, with a gift, which in many cases we have heard of. has been of a valuable character. The last investment made by us, was a dollar for the "Public and Private History of Louis Napoleon:" a work lately published by Mr. Evans, with which we drew a splendid heavy gold bracelet.

Each one who purchases a book at his establishment is sure of receiving the worth of his money, including a valuable prize.

THE OLD DOMINION COFFEE POT This much talked of Coffee Pot, for which a patent has been issued, is being manufactured in immense quantities by Messrs, Arthur, Burnham & Gilroy, 117 and 119 South 10th Street, Philadelphia. Their advertisement which has appeared in the Pioneer for several weeks past gives a description of the new and superior article which has received more favorable notices from the press, and those who have used it, than anything of the kind ever brought before the public. In the hands of such enterprising men as compose the above firm, an article so superior to all others in use, must rapidly gain favor and be brought into general use by the pub-

In most of the northern states land is so cut up into small farms that it is highly probable that the cost of steam engines must operate against their being very generally used. Still with our movable fences the matter might very well be so arranged that one steam plough could do the breaking up for several contiguous farms.-And if the expense per acre is found to be much pelow that of horse power, it will undoubtedly be ultimately adopted. The fable of the lark and her young, that they were to help harvest it, is a good one. Still in this country where the utilitarian policy prevails, where labor is high and at some seasons of the year difficult to obtain, there must of necessity be a concentration of Both labor and capital, and an appropriate division of Magazines, including the Pioneer, may be the former. Ten men effectively organized, so as to combine their efforts when needed. will perform nearly or quite as much labor as twenty others working without system or common effort. # LATE PUBLICATIONS.

We have received from Messrs. T. B. Poterson & Brothers extensive publication and Matrimony.

The popularity of the Authors of these works is sufficient recommendation, to secure an immense sale of the works, which are spoken of in the highest terms by the press throughout the country.

Mrs. Southworth having already acquired world-wide reputation as a writer, and Mr. Morris being favorably known in this country for many years past as editor of the Pennsylvania Inquirer, and coming as the works do from one of the most extensive and popular Publication houses, in the country, cannot fail to secure for them an immense demand by the reading public.

We are also indebted to the same source for a handsome present of "Woodland Cream," which is kept for sale at Messra. Peterson & Brothers.

## An Interesting Incident.

On Saturday afternoon last, quite an interesting suit came off before one of our worthy Squires of this town. Our reporter being present furnished us with the following "facts in the case." It appears that about a month or two previous a trade in horse flesh had taken place between a gentleman of color from Gouldtown and two other gentlemen. the latter owning a horse in partnership which they traded to the colored gentleman safe from molestation in the wheat field so long | for a mag which he represented to be " sound as the farmer depended upon his neighbors and kind in double or single harness." Both horses being warranted, the parties separated, both chuckling in their sleeves that they had got a bargain. It was soon discovered, however, by the colored gentleman that his new horse was somewhat "ailing." After being put in the stable at night, a tremendous noise was heard in that direction which proved to be the dying grouns of the fiery nag. The blored folks thinking the animal was going mad, and fearing he would get out from the enclosure, commenced barmanifest that rails were of no use; the spirit ten or twelve acres of grass each. Let them had departed, and the only consulation left for the poor darkie, was to bring suit against the leading features of which are given and the result of the case, for the benefit of those who contemplate entering into the horse-flesh

Notwithstanding both horses were was ranted "everyway sound and kind," it wa proved by the testimony of several witnesse that both were subject to nearly all the ill that horse-flesh is heir to; the blacksmith who had occasion to shoe the horse which the darkie traded away, testifiying that the animal was so weak that he had to be proped up against a post or held up while he shod him, others testified that he had to be lifted into the horse-power threshing-machine, being too weak to get there without assistance. The case being argued at length, and all this comfortable lodging and such fare as they testimony against him, our young lawyer desire. ## ANOTHER COMET.

As the magnificent comet which has long adorned the firmament in the evening, s fast becoming invisible to us in the vast unfathomable fields of space, another coming into view in another quarter of the heavens. The new visitor is in the constellation Pegasus, which is now a little to the south east of us. The bright moonlight night prevents our seeing it just now. It has as vet no tail visible to us, which makes it difficult for the uninitiated to distinguish from the stars. It is however hardly probable that it will be as brilliant as the one about passing from view.

> tichlars, that would be new, if not so interesting to the mass of your readers, as it would be if you had a like institution at Stony Point, just below the well known port of Bridgeton. I suppose there never was so high-handed an outrage contrived and carried out, as the burning of this place, since our country came into existence; and God grant that it may never be my misfortune to behold the like again, on the soil of America for every true lover of his country, must look upon it as an outrage, against the laws of all enlightened nations, among which Americans are not backward to count their own; and while I bless God that I am born an American. I humbly pray that the angals of our country may be free from any more like demonstrations, where the masses are influenced by the wealthy and prompted to do their dirty work under the impression that they are advancing their own interests, when in fact they are taking the bread out of their own months for the benefit of the few who do not need the least assistance. The distinction was most complete: the mob first battered down the walls with a

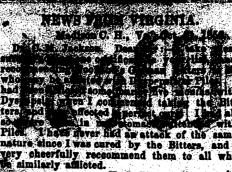

ram, and then in the most systematic manner possible, proceeded to smash in all the windows and as each one was provided with a bottle or can of Camphine, the work of des truction was must easily accomplished, as the burning fluid was plentifully poured on the floor and Straw beds which in haste had been forgotten or abandoned by frightened women, were soon touched off and with the addition of the inflamable articles which are always at hand in any inhabited house. the whole concern was in the short space of 20 minutes in a blaze, not an engine was allowed to play, and persons that were formerly supposed to be friendly to the concern were seen to look calculy on, refusing to do a thing unless it was to save personal property, but for all their kindness in that respect nearly every article that would admit of handling was stolen and carried off as thousands were now on the ground. Many persons may think that it was strange there was no little resistance shown, but had they been present I think they would have entertained a far different opinion, for the thing was so well arranged and they had made their calculations accordingly, nearly all of our people were in the city at the cable celebration and they had taken pains to learn that there was no armed men on the inside and as the hospitals had rested in security for so muny years we all thought they still might stand and it looked absurd to place an armed force around the grounds on account of a rumo which had been affout for a year or more.

But the land is not buroed up and Gover nor King has placed a wall of steel in the and the workman are now at work re-build ing and in a most substantial manner, although I hardly think the buildings will be so large and noble looking as the old ones vet they will be much more convenient and better adapted for the comfort and health of the poor invalid. The residences for the physicians will be far superior in every res pect to the old ones and all uniform and also fire proof, how long they may stand we cannot tell, after the troops re removed, but if the county is compelled to pay for both the old and new buildings I think they will be careful how they meddle with them again, for now-a days it seems that a man's life i not held as sacred as his pocket, and it was for the benefit of property holders and pocket interest that the miserable cry of yellow fover was raised, and not for fear of the pes tilence as they professed to be, but the ignor ant, miserable foreigners who had no landed property, the value of which would be increased by the removal of Quarantine, must be used, and they were made a cat's paw, through the influence of fear which was preached to them day by day; until frenzy was the result; and now the thing is done. and many of them have indirectly suffered they begin to view the thing in its proper light. Martial law is the order of the day and no person can preambulate certain lo calities known as public highways at certain times without the knowledge of a few words only known to those who belong to the initiated. We have had three regiments here alteady and still they come, thus far it looks pretty, and the right to most persons is one of novelty, as the bayonet except it be for mere show, is a thing that young people of the present day know but little about, and when a person has had its glittering point thrust directly at the seat of life, and by a person who knows nothing but "obey orders' it is rather touching I assure you, and the Staten Islanders feel the stigma that such a thing casts on their fair name most keenly. They do not seem the least afraid of your

Messrs. FARREL, HERRING & Co.,
PRILADELPHIA. Gentlemen—The close attention which our own affairs have required sipec the fire, has hitherto prevented us from writing you about the fait.

On occasion of the fire 19th July, by which we suffered a large loss, our store, with a number of other buildings, was consumed. The safe, of your manufacture, which we had in the store, was exposed to the most intense heat, as is well attested by the effects on its strong iron frame, which, from its fiaked and scaly appearance, looks as though it had been heated for a long time in a furnace.—The safe with heaps of molten glass and kegs of nails, fused into a mass, fell into the cellar, surrounded by burning materials, and there was suffered to remain, (as the contents had been removed before the fire reached us.) aing materials, and there was sungred to remain, tas the contents had been removed. Lefore the fire reached us,) until the second of August, 14 days anterwards.

The difficulty in coutting it open with the best tools that could be procured, convinced us of its power to resist that could be procured, convinced us of its power to resist that could be procured, and when it was opened, found the interior, to the astonishment of all, entirely uninjured oy fre.

This test has so fully convinced us of the capabilities of your safes, that we would non part with the one we have in use for a large sum, were we debarred the privilege o getting another.

THOMAS P. WILLIAMS, ELECTROPATHIC PHYSICIAN, . BRIDGETON, N. J.

Commerce Street, West of the Bridge. DR. HOOFLAND'S BALSAMIC CORDIAL FOR THE SPEEDY CURE OF

Coughs, Colds, Influenza, Croup, Hourseness, Bron-chitis, Pneumonia, Diseases of the Bowels arising from Cold, Incipien Consumption, and for the re-lief and (if at all possible) cure of Patients in ad-vanced stages of the latter disease.

This celebrated preparation, like the Bitters, may be confidentially relied on. It is designed for a class of diseases more general and more fatal than any other to which the people of this country are subject—those springing from a "slight cold." That emment authority, Dr. Bell, from a "slight cold." That eminent authority, says:

"I will not say that Colds are to our inhabitants what the Plague and Yellow Fever are to those of dther countries, but I can aver confidentially that they usher in disease of greater complicity and mertality than these latter. A further proof of the terriable fatality of diseases resulting from a "common cold" may be seen by a glance at the following statistics, taken from the records of the Board of Health of Philadelphia, confessedly one of the most healthy localities in the Union:

1852. Total deaths in Philadelphia,

10,201

Died of Consumption,

"all other diseases (250 in number).

1,912

1854. Total deaths, Died of Consumption, " " all other diseases, 2,178 9,636

From these figures, it will be seen that nearly one fourth of the total deaths in the country are caused by consumtion, to say nothing of the numerous other diseases springing from a "slight cold."

Do not trifle with your health; but if suffering from a cough, or cold on the lungs, buy a bottle of HOOFLAND'S BALSAMIC CORDIAL, And you may count on a cure. Thousands have done so, and have certified to its wonderful effects.

Coughs sometimes proceed from a disordered or dyspentic state of the stomach; in which case; the German Ritters should be used. In cases of weakness, or general debility of the system, resulting from a protracted cough, the German Bitters will be found of great benefit to those who use it.
