PRINTERS IN LUCK. Notwithstanding the hard lot of a printer's life, there are now and then circumsaances calculated to cheer and comfort him. There are advantages, too, sometimes in living in a house which looks like your neighbors. Not long since the miller came to our house with a quarter of best wheat flour; the kitchen door being open, and no one about, the flour was put into the barrel in the closet, and the man about leaving, when our better-half came along and inquired if he had not made a mistake. The flour man looked around in astonishment, and exclaimed, "Well I'll be hanged if I ain't mistaken this time: I thought it was your neighbors; the houses, kitchens, closets, and the flour barrels are just alike." Our barrel happening to have some flour in at the time, it was difficult to rectify the mistake, and the miller has since concluded, (being as it was a printer) to let it pass without any cost to us, for which we are very thankful, and would inform the public who was so generous towards us, and also what superior flour they have; but everybody who uses flour from Ernest & Davis' knows that it "can't be beet."

Mr. C. Albertson, whose store may be found on Pearl St., below Commerce, left at our office a few days since a splendid watermelon, for which he has our thanks and best wishes.

We have also just received from our friend, Israel Miller, two of as handsome and delicious egg plants as we ever saw in this part of the country. May his crops always turn out abundantly, and may he never forget the printer.

We have no fear of coming to want as long as our friends are so mindful of us, and if their supply gives out, we have the most considerate and kind neighbors, who frequently send us in cold victuals, such as watermelon kept on ice, and other things not bad to take.

THE SECESSION JOURNALS. A report was current about town yesterday morning that the offices of The Daily News, Day-Book, and other Secespublication of the papers forbidden.— This is not a correct statement of the case. The facts are that the several journals in question received from Postmaster Taylor a notice that their circulation thro' the mails would not be permitted. This, together with the seizures of the bundles of papers sent by express to Southern customers, virtually amounts to a deathblow to these pestilent sheets. The no-tice from the Post Office, which we copy, was served upon The Journal of Commerce, Daily News, Day Book, Freeman's Journal, and Brooklyn Eagle. To the Postmaster New York City:

P. O. Department, Aug 22, 1861. Sir:—The Postmaster-General directs that from and after your receipt of this letter, none of the newspapers published in New York city which were lately presented by the Grand Jury as dangerous from their disloyalty, shall be forwarded in the mails.

The next Exhibition of the Cumb-Co. Agricultural Society will be held on Wednesday the 25th day of Sentember. The crops have been abundant this year, and our farmers will doubtless, as usual make such a display as will be creditable 40 the County.

A TRIP TO CAPE ISLAND.

left Bridgeton for the city of Cape Island. An hour and fifteen minutes drive brought us to the large and flourishing town of Millville; so well known since the completion of the Millville & Glassboro' Railroad as to need no comments from us at this time. Upon inquiring for the news of the day, we were informed by Mr. Isaac Sharpless that a large copper lined schooner of between three and four hundred tons burthen had been laying near Goal large trunks filled with ladics dresses, caused suspicion to rest upon the Captain and vessel, especially as he did not give a very plausible statement as to why he was there at that time. The vessel was boarded and investigated by the proper authorities, who could find nothing sufficient to warrant them in detaining her. She was nearly a week in that neighborhood, and

Passing through Port Elizabeth and West Creek, we arrived at East Creek in time to partake of a first rate, substantial dinner, such as they know how to prepare at Mr. Wilson's, who we found to be a man of no small amount of intelligence in reference to matters and things in general, and a good facility of communicating his thoughts to others.

On our way through Dennisville, we halted a few minutes at the sale of the property of Wm. S. Townsend of that place. The dwelling, out-buildings, and 6 acres of land, which is apparently worth not less than three thousand dollars, was bid in by Mrs. Townsend for one thousand. More than 50 other lots were sold at various prices per acre.

About the middle of the afternoon we arrived at Cape May Court House, the nice place it is in many respects. The Quarterly Conference of the M. E. We then proceeded to the Light House, about fifteen minutes drive from the Island. The keeper of the light appeared to be a manwell adapted for his position, and took especial pains to show us around. Much information was obtained from him, which we may at some future time weave into an article for the Pioneer.

About eleven o'clock being the regular bathing hour, we took another dip in the briny deep, which was most delightful.-In the afternoon, we bade adien to our attentive friends Adams, the Pastor of the sion newspapers in this city, were entered M. After spending a few hours in pleasant conversation here, we resumed our journey, and from Port Elizabeth to Millville the road reminded us of the old darkey who exclaimed "Jordan am a hard road to trabel." The importance of turnpikes was never more apparent, and we were glad when the Millville pike was in view. Our horse was pretty well exhausted when he got to the pike, but came over it "like a breeze," and seemed refreshed on arriving in Bridgeton.

The Teachers' Institute was in session at Cold Springs, Cape May Co., as we passed, and judging from the appearance of some of the school houses in that County, we should say "the school teacher was certainly abread." The crops, too, never to us looked so abundant, especially the Corn, which equalled and in the State, and perhaps any in the mion. The Wheat crop, of late years, has been won-

The True American, the Democratic organ of New Jersey, suspended this morning, and gives as a reason that the Government has virtually interdicted the publication of every paper that does not support the Government and Administration. The paper is one of the oldest in the State.

According to careful computation from the complete official reports, the St. Louis papers make the loss of Gen. COMMENDATIONS:

From Hon. Lewis D. Campbell, M. C., of Ohio.

My family and friends all concur in the opinion that the (Newell) Picture is more life like than any thing they ever saw. My likeness has been repeated, taken by different Artists in various ways, but I have never yet had one which presents so true to nature all the features and avareasion. ture, all the features and expressions of countenance From E. Joy Morris, late Minister to Italy. The exquisite fluish, beauty and softness of your portraits, conjoined with their durability of color and faithfuness as likenesses, cannot fail to commend them to the attention and patronage of all who appreciate true art.

reciate true art.
From Col. James Page. Having occasion for a portrait. I procured one from Mr. Robert Newell, of the city of Philadelphis, a ministure in Oil Colors, under the new process discovered by him, and take great pleasure in expressing the satisfaction grien me, not only by the accuracy of the likeness, but its artistic finish in all respects, and recommend him to the patronage of these disposed to encourage the beautiful art.

The late and lamented Dr. George M'Clellan, one of the most eminent practitioners that the Unit of States could ever beast of, always made it a standing rule when he was called upon to prescribe for a child to order the HAIR CUT,

from the fact that the majority of silments to which children are heir are occasioned by having too much weight on the head in the shape of hair. In conclusion mothers, only reflect for a moment—Is it reasonable to suppose that any child can enjoy good health, or even be confortable, with a long and thick head of hair, with the thermometer at 90 or 94 as is often the case. Encourage Home Industry, Ready- ((Clothing! I have now on hand, and am constantly making up, a good stock of ready-made clothing, which is made of good strong material, and manufactured in a superior manner. As the times are hard, and there are many persons out of work, I have concluded, in order to give employment to as many as possible, in our town, to buy no city made goods this season, but to have made up here all the gords I can sell; thereby retaining that much more money in our own town. As I pay particular attention to the manner in which these goods are made up, my customers may depend on getting good goods, and at less prices than city made goods of the same quality can be sold.

Bridgeton, Ap. 10. Prof. Chas. De Grath's 'ELECTRIC OIL.' I propose to cure almost, instantaneously, individuals afflicted with Headache, Neura-gia, Rheuma tusm, and dl Bronchial affections.

I propose to check and effectually dissipate more ache and pain, and to accomplish nearer and more perfect equilibrium of all the circulating fluids in the human system than can be effected by any other or all other methods of medical aid in the same space of time, the masses themselves being judges.

I do not propose to cure every disease, but all such as are curable by any combination of medical appliances. My Electric Oil operates on chemical and electric principles, and is, therefore, applicable to the cure or natural restoration of any organic derangement, arising from an improper circulation of Nervovital fluid.

HOME INDUSTRY.

WEST JERSEY WOOLEN FACTORIES. WEST JERSEY WOOLEN FACTORIES.

THE subscribers would direct the attention of farmers and others to their increased facilities for manufacturing superior WOOLEN GOODS, such as Satinetis, Cloths, Blankess, Horse Blankess, Flannels, Blocking and Carpet Yarn. We manufacture a durable article, of the best quality, and at low prices. We guarantee our goods not only to be equal to the imported in texture, but to stand hard wear much better. Mechanics and laboring men generally would find it to their advantage to purebase of us, instead of wearing foreign goods which will do them no adequate service.

We will pay the highest market prices for WOOL, which can be sent to our Factory at Bridgeton, or Allowaystown, and there manufactured to order, or cash paid. Also, all wool left with Daniel Bheppard, agent at Greenwich, will be promptly attended te.

We do not buy up this staple on speculation, and therefore, whilst paying fore, whilst paying Cash for Wool, at the highest rates, we insist that a preference should be freely extended to home manufacturers, and claim that, since no lose is incurred, we should have a priority among wool growers, or those who have wool to sell.

WITH FLEXIBLE FOLDING BAR.

THE unprecedented success of this Machine is a convicing proof of its excellence. It has never failed, wherever introduced, to take precedence were all other Mowers, and the important principles embraced in its construction, and covered by its patents, are now universally conceded to be indispensable to a Perfect Mower. This concession is in the strengest manner attested by the fact that so many Mowing Machine manufacturers, abandoning their own patterns, are now modelling after the Hughest in all points where they think it possible to evade its patents; the popularity of their machines is found to be in exact proportion to the extent of their imitations and infringements.

The farmer, who contemplates purchasing a Mower for the harvest of 1801, will, in selecting the flucture, secure the only Machine which combines all the requisites of a perfect Mower, including strength, simplicity, durability, lightness of draft, fresion, from side draft, portability, convenience, perfect adaptation to uneven surface, ease in backing, furning, safety to the driver, ease to the team, and capacity of doing good work on any description of land, and in any variety or condition of grass. Farmers wishing to avoid disappointment, must give their orders early in the season. WITH FLEXIBLE FOLDING BAR.

The Buckeye as a Reaper. The important advantages of the Burkeye as a Mower are retained in the Reaper. The two driving wheels and flexible bar make it the ONLY Reaper perfectly adapted to uneren ground.

The Plattorn is very readily adjusted to any required height of out.

The Real is attached with a FLEXIBLE FORT, which allows it to follow all the movements of the platform on uneven ground, and can be raised or lowered according to the height of the grain.

By removing the RELL, which can be done in a few memonts, the platform can be folded against the side of the Machine, to allow it to poss through bars or instruments. passages.

The grain is delivered at the B CK of the Machine, enely out of the way of the team on the next found. The outside wheel, which sustains the platform, is in a direct line with the driving wheels. This is a great advantage in turning corners, as the wheels all work together, obvisting all straining and cramping.
