GOT A GOING AND COULDN'T STOP.

This is the way a great many boys get into difficulty, "they get a-going and can't stop." The boy that tells lies began first to stretch the truth a little-to tell a large story, or relate an anecdote with a very little variation, till he got a-going, and couldn't stop-till he come out a full

But he got a-going, and couldn't stop. He has used up his wages, and wants more money. He cannot resist the temptation drawer. He has got a-going-he will stop in the prison!

Some young men were, some years ago in the habit of meeting together, in a room at a public house, to "enjoy themnext door to Dare's Drug Store, a new and selves" One of them as he was going splendid stock of SUMMER MILLINERY, to there one evening, began to think there might be danger in the way. He stoopped and considered a moment, and then said to himself, "Right about face!" He turned on his heel, and went back to his room, and was never seen at the public house again. He has become rich. Six of the young men followed his example. The rest got a-going, and could not stop till they landed, most of them, in the drunkard's grave. Beware then, boys, how you get a-going. A Dish of Strawberries.

A few days since, Peter Danzenbaker of Hopewell township, presented us with a dish of Strawberries. We have heard of "large dishes of Strawberries," but never saw any equal to the one Mr. D. left for us. It contained several quarts of the handsomest and best Strawberries we ever tasted. They were of the Albany Seedling and Lady Finger varieties, very large and delicious. Mr. D. has our thanks for such a magnificent treat.

Selling Hay.

The American Institute of the Farmers club composed of distinguished agriculturist, are discussing the propriety of selling hay and buying manure. They seem by the published report to be about evenly divided. Some of the members maintain that a man had better feed his hay on his farm than to sell it even at twenty dollars per tou. City kept horses. could they have a voice in the discussion, would give a united nay against the proposition to feed all the hay on the farms. Whatever disadvantage results to the soil from sellup by a more liberal use of grass seed and by ploughing under green crops. That the hay should be returned to it again is true. So does wheat, corn, or any other grain or vegetable, and the same line of argument would go to prove that they should not be sold from when the agriculturists left off the work in the salt marsh and applied other fertilizers, their land increased in value and productiveness. Then, and not till then, they had upland hay to sell. As far as our observation goes, more farmers are injured by keeping too much than too little stock throughout the season. There is nothing injures land much worse than pacturing it too bare during the heat of Summer. ter and a small one in Summer. To the Juvenile Patrons of No. 3 Grosseup's Building:

My young friends, no doubt you have began to think that I had gone out of existence, from the fact that I have not notified you before this of the importance of being prepared for the warm weather. The reason for my delay is, briefly, this I did not think it right for you to have your hair cut while the weather was so unsettled, and therefore have waited until it has become more favorable. It is now the first week in June, with every indication of warm weather; therefore, young ladies and gentlemen, do not hesitate any longer, but call and have your work done in my usual happy style, and you will go home with the pleasing reflection that two parties have been benefitted; your selves and Waters.
