For the West Jersey Pioneer. Young Men's Christian Association. The Fifth Annual Meeting of the Young Men's Christian Association was held at their room on Monday evening. Jan. 18th, 1864. President James J. Reeves in the chair. Meeting opened with reading of Scripture and prayer by Mr. H. J. Mulford. Minutes of last meeting and also of the Board of Managers were read and approved. After hearing the reports of the different committees, the following were elected members of the Association:

Thomas H. Reading and Benj. White as active, and Tyler Thayer, M. D. associate members.

The President then read his Annual Report, which was adopted and ordered to be published:-

ANNUAL REPORT.

Another year is now numbered with the past, and it becomes my duty to present to you the Fifth Annual Report of the doings and progress of our Association. There is a special propriety in rendering a report at this time, not merely because it is enjoined by our Constitution, but because comparatively few of the enrolled members of our Association know anything more, concerning our progress, than that "we still live."-While our roll of membership shows an increas of nine over the preceding year it is with regret I am compelled to report that there has not been that zeal and interest manifested in the proceedings of our Association that has marked our history in years gone by. This may be owing, in part, to the distracted condition of our National affairs, in which we all have a heart-felt interest; and yet, why

Should it not, in the contrary, incite us to greater diligence in this good work of laboring for the welfare of the souls of many of the young men of our community who have gone forth at our country's call to imperil their lives upon the field of battte, wholly unprepared against the day of account-not having on "the helmet of salvation or the breast-plate of righteousness."

In glancing over the minutes of our proceedings during the past year, I find but little that calls for especial notice.

LIBRARY. The number of volumes in the Library at the present time, including the valuable Congressional Library donated to the Association by the late Hon. James G. Hampton, is about one thousand, few additions having been made within a year or two past, because of a want of funds, and would suggest that if an effort were made by members to solicit contributions to our shelves, there are many among the triends of the cause who would cheerfully give on the asking. The Library is a very important adjunct of the Association and it is necessary that it should be kept | not, be cordially invited to attend. up to its high standard The number of miscellaneous books published annually in the United States, as shown by Allibone's Critical Dictionary of Authors, is sufficient to fill a Library as large as our own, and though many of them are not worth their reading, not a few are of another year rolls around we shall be able well-selected list.

Our present financial prosperity is owing, in great measure, to their liberality, and we rejoice that we shall soon be able to say that we "owe no man anything but love."

DEATH OF AN OFFICER. Since our last annual meeting we have been called to mourn the loss of one of our most exemplary members and efficient officer, Frederick A. Ginenback .-Mr. Ginenback was one of the constituent members of our body, a constant attenpunctuality with which he attended upon precarious that he could attend upon and earnest piety-the self-sacrificing zeal, and the meek and cheerful christian temper that characterized him in his intercourse with his fellow members. We feel that in his death we have sustained a loss that will be deeply felt. May this sorrowful dispensation of Divine Providence remind us all of the truth, that lead us to follow the example of our deour departure is at hand, "we shall have and maker is God."

The Treasurer's report was then made and approved. The report, owing to the liberality of two of our members, shows the finances of the Association in a much better condition than last year.

The receipts for the year has been to about \$17.

Great indignation existed at Santiago at the priests who had charge of the church, first because they had filled the building to repletion with inflammable decorations, which conspired to produce the tremendous tradegy, and again because they closed up the avenue of escape through the chapel, in order to save the furniture and property of the church, while they permitted 2,000 women and children to burn to death. They do not appear to have exerted themselves to save a solitary life -- the extent of their efforts being to secure a few old settles, chairs, sofas, bureaus, candelbras, images, chances, chests, brooms and dusters The popular excitement had resulted in a meeting which demanded the demolition of the walls and foundation of the church, and it was promised by the kept up on the city. President: but at the last accounts the greatest bitterness existed between the people and the priests - the former accusing the latter of being the authors of the calamity and demanding the demolition of the church, and the priests denouncing the people as caluminous and impious, and refusing to accede to the clamor for the razing of the walls and foundations of the

fatal edifice. Among these whose heroic exertions were conspicuous, were the American Minister, Thomas H. Nelson and his Secretary Mr. Rand, Samuel Haviland and Henry Meigs, of New York, and Mr Silvey, the United States Consul at Valparaiso .-These saved a number of lives, and in a correspondence which ensued between our Minister and the Chilian Secretary of Foreign Affairs, the generous and active efforts of the Minister and the order American citizens was referred to in terms of grateful emotion.

From a correspondent at Valparaiso, we have the following further details of this unparalled tragedy:

VALPARAISO, Dec. 18, 1863. One of the saddest, most horrible calam Santiago, the beautiful capital of Chili.-Words fail to express the despair of the unhappy and burning victims, or the intensified horror of the too unwilling wit be remembered night.

The Church of the "Compania," whose history reports it to have been built nearly

fate known - that of death by fire.

When the fire first broke out the first feeling of the people within was that of horror for the loss of the adornments of the church and of the image of the Virgin Mary, the priests asserting that the fire would be put out. Their lamentations were soon changed to shrieks of despair when their condition became apparent, and all avenues of escape were cut off The looks of anguish, the shricks of horror, the calls for help to those who vainly endeavored to aid them, all took place in a very short time and then all was still!

The flame over their heads lit up their features, distorted in the agony of death, which ever varied, and finally exhausting tself for want of material, went out leaving nothing but a charred heap of blackened forms, that but a short time before were exultant in the beauty and vigor of life There were the young, the mature, the wenerable mothers with their daughters, whole families in many instances, had all met here at this grand illumination neversto return. From Charleston.

By the steamer Arago which arrived at New York yesterday, we have advices from Charleston to the 15th. Gen. Gillmore is about to remove his headquarters to Hilton Read, where he will quietly await the spring to commence enew his operations. The rebel rams at Charleston threaten our naval forces with a raid, which Admiral Pahlgren is preparing for. The rebels continue to fortily the ruins of Sumter, and have erected new bombproofs or Martello towers within the works large enough to cover guns of small calibre, such as could be used against a storming column. Our troops have not fired on Sumter for some weeks past, but a desultory fire is

WASHINGTON, Jan. 19.—The following despatches have been received at the headquarters of the Army in this city:

NASHVILLE, Jan. 17, 1864. - Major-General Hallack, Commander-in-Chief: On the 14th inst., General Vance made a raid towards Tenisville, and captured a train of twenty-three wagons. He was promptly pursued by Colonel Palmer, who recaptured the wagons and took one ambulance loaded with medicines, one hundred and fifty saddle horses and one hundred stand of arms.

General Vance, his Assistant Adjutant-General and his Inspector-General are mong the prisoners captured. U. S. GRANT, Major-General.

SHODDY. BY THE BARD OF TOWER HALL.

Shoddy, thou once wast named with scorn, At best with but a smile, And even now, by fame upborne, Thou art a substance vile.

Yet many a rich robe that twines The proudest form we see, Many a gem that sun-like shines, The wearer owes to thee. And many a palatial pile

That proudly stands apart, And seems so solid, knows the white That thou its keystone art.

Some folks, the precious cash to save. Lo by their acts declare. That, for our warlike legions brave, Shoddy's the only wear.

But lives not the eccentric elf. Who would not soon refuse, As winter clothing for himself. A shoddy suit to choose

Then, ye who dread, (with cause enough,) Such fate may you befall, Who seek for honest work and stuff, Fly quick to TOWER HALL.

SLATE ROOFING

IN ALL ITS BRANCHES. PROPERTY OWNERS-Your careful attention is respectfully invited to the many benefits realized by having that covering on your new or old buildings, in preference to chest.

It is cheaper at first cost, even though not generally known.

Its ddrability for ages and its neatness is undentaie. It is painted by nature's own hand, and needs no brish.

It is worked on lath, saving you two cents per foot on an extra outlay for boards to prepare for tin or gravel roofing; mark that!

It will neither contract, expand. corrode, wash off, or ignite by a spark, as other roofs do.

It is thoroughly impervious to the elements, when element one. rightly done.

It may be removed at any remote period, [if so needed,] and will re-cover nearly the same space, and the as good as new.

The rain falling off it is the best for domestic use. The rain falling off it is the best for domestic use, as it is not impregnated by paint or decomposed in sects, and has no offensive taste or smell.

It is more cool in animal raights, as it quickly relaxes the heat; and warm in winter, as it absorbs no damp, and effectually resists the ingress of snow. All other roofs combined impart none of those advantages. Numerous references.

A WORD ABOUT AMERICAN WATCHES

AFTER A THOROUGH TRIAL OF MORE THAN TEN YEARS, the time-pieces manufactured by the American Watch Co., of Waltham, Mass., have gained a firm hold upon the tayor of the public, and now, no less than 75,000 of them are speaking for themselves in the pockets of the people. From a very insignificant beginning the business has increased until we are justified in stating that WE MAKE MORE THAN ONE HALF of all the watches sold in the United States. Repeated enlargement of our factory buildings, and the labor of 500 operatives, still find us undended to supply the constantly increasing demand—and we may here observe that notwithstanding the high price of labor and materials, we actually sell our products at less prices than those current five years sage.

We refer to these facts only for the purpose of properly introducing another subject relative to our manufacture of watches. Hitherto our chief object has been to make GOOD watches for the million at the lowest possible price—something to take the place of the make-believe watches called "Ancres," "I.epines," "English Patent Levers," &c., annually thrown upon this market in countless numbers, by Guropean workshops—watches which are the refuse of their factories, unsaleable at home, and perfectly worthless everywhere. worthless everywhere.
This object we have accomplished, and now have to announce, that we have commenced the manufacture of watches of the very HIGHEST GRADE KNOWN TO CHRONOMETRY unequalled by anything hitherto made by ourselves and unsurpass of by anything made in the world.—For this we have the amplest facilities. We have erected an addition to our main buildings expressly for this by anch of our business, and have filled it with the best workmen in our service. Profiting by our long experience, we have remodelled the form of our watches, introducing such improvements as have been suggested and proved to be good from time to time and have instituted new and severe tests of isociaronism, acquisiment and compensation. New machines and appliances have been constructed, which perform their work with consumate delicacy and exacttude, and the choicest and most approved materials only cre used. Nothing in fact is wanting either in mechanical principles, Material or workmanship to ensure perfection in the result.

We continue to manufacture our, other well known qualities under the following names.

"APPLETON, TRACY & Co." HIGHEST GRADE KNOWN TO CHRONOMETRY

qualities under the tonorms
"APPLETON, TRACY & Co."
P. S. BARTLETT,"
And the "Soldier's Watch."
"WM. ELLERY." The latter, the lowest priced watch we make, is a aubstantial, reliable time-piece, cased in sterling silver—hunting pattern, and is not liable to get out of order either in marching, riding, or fighting. All the above described watches, including the #Mest, which is named "AMERICAN WATCH COMPANY," are sold by a coch dealers generally throughout the country.

JAMES McLAEN. IONA VINES AND SEEDLINGS.

IONA VINES AND SEEDLINGS,

MY stock comprises a full assortment of all the valuable varieties of hardy vines, which have been propagated with the atmost care, to develop all of the qualities that constitute them valuable for hardness and productiveness in garden and vineyard.

By care and attention, with appliances greatly surprising those of any oth restablishment, I have, for a series of years, been able each year to make some improvement on the productions of the preceding, and the preceding and the past season has afforded as gratifying a degree of improvement as any or those which has gone before. My stock is, therefore, the largest and best that I have ever offered, and the prices are lower than the actual cost would be to produce which has e been provided at lona Island.

The very Great superiority possessed by the Iona vines over all others is clearly proved by the most abunnoant testimony from all Quarters, from years of tiple in gardens and Vineyards throughout the country.

Eve full particulars, including also directions for

country.
For full particulars, including also directions for planting, see Descriptive Catalogue, which will be sent for a two cent stainp.
The illustrated Catalogue, seventh extensively revised edition, which comprises full directions for sil that perisins to the preparation of the ground and management of the vine in garden and vineyard with many explanatory entrativings, accurately drawn with many explanatory engravings, accurately drawn to a scale from living vines, will be sent for three 3 cent stamps. It is the most comprehensive practical treaties of the vine that has been published in this country. More than twenty new engravings are added to this edition.

IONA SEEDLINGS.

I aso offer two new vines, which originated from send with me, and have been thoroughly tested during the past six seasons in bearing.
One, named IONA bears a large bunch, with large berries; is of a very peculiar wine color, with few any very small seeds, and is of uniform consistence throughout its flesh, from outside to center, and more nearly resembles the Red Frontingnan in appearance and quality than any other grape. It is transparent, fleshy, and tender, I ke the Frontignan, and is even more sprited and vinos in its flavor, and makes more sprited raisins. It does not decay, but may be bept all Winier on the shelves in the fruit-room, adnering firmly to the bunch, and drying readily to raisins.

rusins.
It is an early and profuse bearer, never having failed to ripen a full crop, and has never been affected with the rot or any unhealthiness. It bore and thoroughly ripened a great number of bunches the third soawon from the seed.

The habit of the vine is the very best, and I would not know in what respect to ask to have it altered to make it more valuable.

Season of ripening fully two weeks before the Isabella. By flowering late it avoids canger from Spring frosts. The ISRAELLA is a large black grape, that ripens one week before the lone, and, like it, is a very late keeper, holding firmly to the bunch, and, when fully ripe, becoming sweet quite to the center. It is very rich, sugary, and vinous, with a very excellent and pacultar flavor.

The vine is very healthy in its foliage, hardy, and productive and hears early. Plants but one year old are now ripening from four to six large bunches

II F. HOOVER respectfully informs his friends
II. and the public generally of West and South
Jersey, in want of FURNITURE, that they will find it
greatly to their advantage to purchase at his Warehouse, where they will find a large stock of the modern styles to select from.

The subscriber begs to say that his facilities for
manufacturing, and buying his materials for cash—
having no apprentices, but employing the best workmon—enables him to offer great inducements to
those in want of really good Furniture at low prices,
as he much prefers the "mimble slxpence" to the
"slow shilling."

All goods bought at his Warehouse will be warranted, and if intended for the country will be packed
with care and dispatched. H. F. HOOVER,
No. 230 S. Second St., below dock, west side,
