Bridgeton, Sept. 7, '61. TWO-HORSE LEVER POWER. WOULD call the attention of Farmers and others to my TWO-HORSE LEVER POWER, which has been throughly tested and proven to be, I think, a power that must supersede all Endless Chain power or the old Lever. It is of very Light Draught, and can be moved from place to place readily, it being fixed on wheels with toungs &c., complete, and can be placed in position for work in less time than any other kind of power. The exceeding cheapness of the machine is its greatest recommendation.

the press ever hints at. HOW WE EAT.

There is an officer called the "Commissary of Substateries," who keeps a sort of store, some times in a wagon, sometimes in a big tent, add has charge of all the bread and meat, and what we have to eat. Every five days we get our rations from him. Sometimes we get nothing but coffee, sugar, salt meat, and bard bread for two or three weeks at a time. Some days we get for each man two spoonfuls of sugar, three spoonfuls of ground coffee, a spoonful of salt, two spoonfuls of rice, or three of beans, three or four little potatoes, a little loaf of bread, a pound of fresh beef, and now and then a little pepper, and once in a long time about a quarter of a pint of molasses; vinegar whenever we want it, which is seldom, as we have nothing to eat it with. Sometimes we get a little bit of descreted vegetables, which is a mixture of cabbage, potatoes, turnips, onions, carrots and red peppers, rice and string beans, ground up together and dried, and is used for making soup; but very few of us like it, and we do not care much about it. We hardly ever get half of these things during a mouth and never get them all at once. We cook for ourselves, and when we are on a march-and some marches last for .two or three weeks-we cannot cook anything but coffee, rice and meat, as we only have one quart tin apiece, and very often they get lost or broken before the march is over We cook our beef on a stick, and generally eat our pork raw as it is so fat that it would all melt away if we tried to cook it before the fire; and when we are very tired and hungry we think it very good, and I have known men to wish for raw pork when they had fresh beef. When we are in camp we have big tin kettles, called camp kettles, and fry-

ing puns, and manage to get along first rate, though we sometimes have to cook three or four different dishes in one cup or skillet, and let the rest stand around the fire until we are done. The Exchange of Prisoners. By an arrival of six hundred of our officers and men, late prisoners at Richmond, we are apprised that after a long interruption the exchange of prisoners has been resumed again, although the details of the principle upon which it is conducted are not given. A PLEA FOR UNITY. After a full experience of the advanta ges, derived from our existing form of Government, and the value of our Federal Union: after having witnessed, since the adoption of our Constitution, the unprecedented increase in population, from 3,929,827, in 1790, to 31,448,322, in 1860; the increase of commerce, manu factures, agriculture and wealth-we are now called upon to decide whether this form of Government, this Union, and this Constitution, shall be continued. Our ancestors, after a severe struggle, adopted the present form of Government, and the Constitution, under which we live .-With them it was an experiment; the wisest could no more than prophesy its favorable results. If they turned to the past, to fortify and justify their opinions, they everywhere beheld the ruins of Republics. They looked only to the future, which was bright to them, because they had faith in God and the intelligence of the people of America. We have witnessed more than their highest anticipations. The onward march of our prosperity, guided and sustained by a people eminently intellectual and ingenuous, has

surprised even ourselves. And, now, after deriving so many and such uncommon benefits, from the Union and the Constitution, we might, naturally, suppose he must be a mad-man, who would attempt, or wish, to destroy either the one or the other. And, yet, such has been the unhappy issue of events, that we are called upon to to defend, with our lives and our wealth-not only the Union and the Constitution, which forms the ark, but our liberties, its sacred freight, from those, who, if mad, have method in their madness.

. We wish we could arouse our people to the full import of the struggle, in which we are engaged. That parties, and platforms, and party leaders are not involved, and only men, so far as they happen, for the moment, to be the agents of the people; that, in this day and hour, the great struggle is taking place, between despotism and liberty, on this continent; that man's self-ruling ability is here being tested; that it would have been better there should never have been a revolution in '76, a Contitution and Union of 87-than that we should fail-for, without the first, there was no hope in the future-but failure now leaves no hope, only the blackness of despair .-It is useless to anticipate two, or more happy and peaceful republics, on this continent, within the territory of the now United States. Look at the map. -See the necessity, which nature has or ganized, for unity. Look at the past, and learn that there may, and can be, one flourishing Republic-but all sub-divisions, must be, sooner or later, military

The question now is, simply and only liberty or despotism - and the people must now decide. The subject speaks its own importance; comprehending, in its consequences, nothing less than all that we can hold dear on earth-our personal security and liberty, and that of those to come after us. No pen can describe the ignominy, reproach and contumely, that will be cast upon us, should we shrink from our duty. Every consideration of philanthropy and patriotism, prompts us to sustain our Government. Many things have been done, by those in power, which many could not approve; for some of us, they have moved too slow-for some, too fast. But, before we cavil over much, would it not be well to ask ourselves the question, could we have suggested or done better? In the slow and in the fast, we begin to behold, as time unfolds the future, the hand of Him who doth all things well, and with whom there is no shadow of turning.

But, let us adjorn all questions, which beget discord, until the close of the struggle; now, there must be unity of will, and unity of action, or all is lost. We would wish absolute unity, and happy would it be for us, if such could exist; but there are those, who, not directed by a judicious estimate of their true interest, and influenced by considerations, foreign to public good, will refuse to join with us Every man, who is for his country now and forever, is our political brother, be he Democrat or Republican, and every man who is against it, is our enemy.-But while we recognise in its fullest force, the position of some among us, who hope for the downfall of our Government; we look upon such, more in pity than in anger. They have never realized they had a country to love, whose honor was dear their protection. The blessing and pres. perity, which they have received and enjoyed, have been so calmly bestowed, that they could not discover the hand of the dispenser and protector. They are the ones who can only realize there is a Gov-

ernment, when it lays its strong hand

upon them. But we are satisfied, the

great mass of people are for their coun-

try; many, there may be, who think the

war might have been averted, but who

There are those who do not stand with us in this unconditional support, and to whom we would concede that same honesty of purpose, that we demand from them. To such, we would plead the superior claims of the country to any mere political theory, that by factious opposition to the constituted authorities of the land, they are, indirectly and inadvertantly, helping their enemies. We would plead, with all, the necessity of a united moral support of the Government, for no victory can be organized and permanent success comman-

#### AMERICA'S FUTURE.

The genius of our country is a fruitful theme for thought. Its past, present, and future are each worthy of candid investigation. A confirmed bachelor says the reason woman so seldom stammer is because they talk so fast-a stammer has no chance to get in. People stutter because they hesitate. But who ever knew a woman to hesitate about anything?

Wheat, in Ohio, will be a stinted crop this year. Wherever the snow was blown off the fields, by the bitter winds of January, the seed was frozen and the young sprout killed. In places, where it is evident there were heavy drifts of snow, the crops look bright and promising. A few days of warm weather will develop the extent of the injury.

A lady friend of ours was in Chicago, he other day, and was asked by her cousin how she liked the Balmoral stocking. "O. very well," was the reply. "Well, I don't said the cousin, "nor will I wear them either; I'll be hanged, if Ill make a barber's pole of my leg for the sake of being fashionable ?

#### DIED.

At Port Elizabeth, March 12th, 1864, DAVID . GILLAND, in the 26th year of his age.

A wife and child, together with a large circle of friends, are left to mourn his loss; we trust that their loss is his infinite gain. He was an affectionate son and a kind and beloved father and husband. Some time before his death, he was known to be making reparations for that hour. Although he was seized with an epidemic, which has been so fatal in that neigh orbood, he was enabled, during his severe affic to trust in the Lord, and feel the assurance that his aviour was with him. Although his body was racked with pain, he exclaimed, to his friends, that were stand ing around him, "the Lord is there, and I know it!" Embracing his mother in his arms, he exclaimed :glory! glory! glory!" The lastwords he was hear o say, were: "praise the Lord!"

"Jesus, I my cross have taken,
All to leave and follow thee;
Naked, poor, despused, formicen—
Thou, from hence, my all shalt be;
Parish, every fond ambition,
All I've sought, or hop's, or known;
Tet how rich is my condition,
God and heaven are still my own."

MAGIC TIME OBSERVERS. Being a Hunting or Open Face or Lady's or Get tle-man's Watch combined, with Patent Self-Wind-ing Improvement, a most Pleasing Novelty.

ONE OF THE PRETTIEST, MOST CONVENIH NT, and decidedly the best and cheapent time user

One of the prettiest, Most convenie not and decidedly the best and cheapest time piece for general and reliable use ever offered. It has within it and connected with its machinery, its own winding attachment, rendering a key entirely unnecessaty. The cases of this watch are composed of two me tals, the outer one being fine 16 carat gold. It has the improved ruby action lever movement, and is warratted an accurate time-piece. Price, superbly engraved, per case of half dozen, \$204. Sample Watches, in near morrooco boxes. \$35. SILVER WATCHES!

of movement, reauty of material, and above all, cheapness in price, these watches must insure universal approbation.

An imitation so faulttess that it can hardly e detected by the most experienced judges .-The material being of two metals, the outer time first quality Sterling Silver, while the inner e ne is German Silver, it cannot be recognized by cutting or heavy engraving, making it, not e nly in appearance, but in durability, the best resemblance of SOLID STERLING SILVER in existence.

The Sale of these Watches in the Army is a sorce of enormous profit, retailing as they very readily do, at \$25 and upwards. Many budred dollars can be made in a single pay day by any one of ordinary business tact.

AT WHOLESALE ONLY! In heavy

hunting cases, beautifully engraved, white enamel dial, and fancy out hands, in good running order, by the half dozen, \$66. Sold only by the case of six! Upon receipt of two dollars, as guarante e of good faith, we will send watches by express to

any part of the loyal States, collecting bal ance of bill on delivery. This ensures buyers against fraud, giving them their watches before payment is required.

Soldiers in the disloyal states must remit cash

in advance, as the express companies peremto-rily refuse making collections in such dangerous localities. Remember, Cash in advance from within the army lines in rebel states!— We guarantee the safe delivery of all Watches, whether they are sent by mail or express.

It is worked on lath, saving you two cents per foot on an extra outlay for boards to prepare for tin or gravel roofing; mark that!

It will neither contract, expand, corrode, wash off, or ignite by a spark, as other roofs do.

It is thoroughly impervious to the elements, when in the dane. rightly done. It may be removed at any remote period, [if so needed,] and will re-cover nearly the same space, and

needed,] and will re-cover nearly the same space, and be as good as new.

The rain falling off it is the best for domestic use, as it is not impregnated by paint or decomposed insects, and has no offensive taste or smell.

It is more cool in summer nights, as it quickly relaxes the heat; and warm in winter, as it absorbs no damp, and effectually resists the ingress of snow.

All other roofs combined impart none of those advantages. Numerous references.

This valuable fertilizer is composed of night-soil and the fertilizing ek ments of the urine chemically obtained, and combined chemically and mechanically with other valuable fertilizing agents and absorbents. It is reduced to a dry, pulverulent condition, ready for immediate use, and without loss of its highly nitrogenous fertilizing properties.

Its universal applicability to all crops and soils, and its durability and active qualities, are well known to be all that Agricultulists can desire. Price \$3 per Barrel, or \$25 per Ton.

CHEMICAL-COMPOST. This Fertilizer is largely composed of animal matter, such as meat, bone, fish, leather and hair, together with chemicals and inorganic fertilizers, which decompose the mass and retain the nitrogenous elements. It is thoroughy impregnated with the urine and the thinner portions of nightsoil.

It is a very valuable fertilizer for field crops, generally, and especially for potatoes, and for garden purposes. ooses. Its excellent qualities; strength and cheapness, have nade it very popular with all who have used it.

Price \$25 per Ton. TREE AND FRUIT FF It is a highly phosphate fertilize ly adapted for the cultivation of Trees, Frank Lawns any Flowers. A WORD ABOUT AMERICAN WATCHES

AFTER A THOROUGH TRIAL OF MORE THAN
TEN YEARS, the time-pieces manufactured by the
American Watch Co., of Waltham, Mass., have gained
a firm hold upon the favor of the public, and now, no
less chan 75,000 of them are speaking for themselves
in the pockets of the people. From a very insignificant beginning the business has increased until we
are justified in stating that WE MAKE MORE THAN
ONE HALF of all the watches sold in the United
States. Repeated enlargement of our factory buildings, and the labor of 500 operatives, still find us undings, and the labor of 500 operatives, still find us ur equal to supply the constantly increasing demand.— And we may here observe that notwithstanding the high price of labor and materials, we actually sell our products at less prices than those current five years We refer to these facts only for the purpose of pro

We refer to these facts only for the purpose of properly introducing another subject relative to our manufacture of watches. Hitherto our chief object has been to make GOOD watches for the million at the lowest possible price—something to take the place of the make-believe watches called "Ancres," "Lepines," "English Patent Levers," &c., annually thrown upon this market in countless numbers, by European workshops—watches which are the refuse of their factories, unsaleable at home, and perfectly worthless everywhere.

This object we have accomplished, and now we have to announce, that we have commenced the manufacture of watches of the very
HIGHEST GRADE KNOWN TO CHRONOMETRY unequalled by anything hitherto made by ourselves HIGHEST GRADE KNOWN TO CHRONOMETRY unequalled by anything hitherto made by ourselves and unsurpass d by anything made in the world.—For this we have the amplest facilities. We have erected an addition to our main buildings expressly for this branch of our business, and have filled it with the best workmen in our service. Profiting by our long experience, we have remodelled the form of our watches, introducing such improvements as have been suggested and proved to be good from time to timeand have instituted new and severe tests of isochronism, adjustment and compensation. New machines and appliances have been constructed, which perform their work with consumate delicacy and exactitude, and the choicest and most approved materials only are used. Nothing in fact is wanting either in mechanical principles, Material or workmanship to ensure perfection in the result.

We continue to manufacture our other well known qualities under the following names
"APPLETON, TRACY & CO."

The latter, the lowest priced watch we make, is a substantial, reliable time-piece, cased in sterling silver—hunting pattern, and is not liable to get out of order either in marching, riding, or fighting. All the above described watches, including the finest, which is named "AMERICAN WATCH COMPAN," are sold by watch dealers generally throghout the country.

A PROCLAMATION BY THE GOVERNOR.

The quota of New Jersey, under the late call of the President for 500,000 men, is 16,759.— Upon this quota will be credited and deducted all volunteers from this state, who have been mustered into the United States service since the first day of June, 1863, and also all who shall be so mustered, prior to the 1st day of March, 1864. More than ten thousand (10,000) men have been already recruited on account of this quota.

The sub districts that have raised the quotas

assigned them in the General Oorders issued from the office of the Adjutant General of this State, under my Proclamation of 27th July, 1863, and 22d October, 1863, are not liable to the draft ordered to be made on the 10th day of March next.

By referring to previous publications of quo tas, the deficiency of the various sub-districts not yet exempt will be very nearly ascertained. The Adjutant General will announce the exact deficiency as soon as possible.

The Government bounty of \$300 for new re-

after the expiration of the present month. I HARNES! earnestly call upon the people of those town-ships and wards, where deficiencies exist. to devote all their energies to filling their respe tive quotas, before the large Government bout ties now offered are withdrawn. Believing that the people of New Jersey de-

sired to avoid a draft, I have labored to give them the opportunity to furnish volunteers — The greater part of the State is already exempt. There is yet time for each township and ward to fill its entire quo a if the peeple will be earnest in the effort. The advantage of such, especially to the laboring classes, have been more than once presented. I can add but little to the appeals already made. I leave the subject with the people, in confidence that their responce will be such as will gladden the heart of every Jerseyman. Given under my hand and privy seal, at

Trenton, this tenth day of Febuary, A. D. one thousand eight hundred and sixty four. JOEL PARKER.

H. F. HOOVER respectfully informs his friends
and the public generally of West and South
Jersey, in want of FURNITURE, that they will find it
greatly to their advantage to purchase at his Warehouse, where they will find a large stock of the modern styles to select frem.

The subscriber begs to say that his facilities for
manufacturing, and buying his materials for cash—
having no apprectices, but employing the best workmen—enables him to offer great inducements to
those in want of really good Furniture at low prices,
as he much prefers the "mimble sixpence" to the
"slow shiling."

All goods bought at his Warehouse will be warranted, and if intended tor the country will be packed
with care and dispatched.
