## HOWE SEWING MACHINES.

FOR FAMILIES AND MANUFACTURERS.

## THE HOWELOCK STITLEH

THESE WORLD-RENOWNED SEWING MACHINES

Are celebrated for doing the best work, using a much smaller needle for the same thread than any other machine, and by the introduction of the most approved machinery, we are now able to supply the very best machines in the world. These machines are made under the immediate supervision of the President of the Company, ELIAS HOWE, Jr., the original inventor of the Swing, and to the use of Seamstressos, Dress-Makers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantilas, Clothing, Hats, Caps, Corsets, Boots, Shoes, Harness, Saddles, Linen Goods, etc. They work equally well upon silk, linen, woollen and cotton goods, with silk, cotton or linen thread. They will seam, quilt, gather, hem, fell, cord, braid, bind, and perform every species of sewing, making a beautiful and perfort stitch, alike on both sides of the articles sewed. On Shoe and Leather work it is admitted to have no equal.

THE QUALITIES WHICH RECOMMEND THEM ARE: 1. Beauty and Excellence of Stitch, alike on both sides of the fabric sewed. 2. Strength, Firmness and Durability of Seam that will not Rip or Ravel.

3. Economy of Thread. 4. Attachments and wide range of application to purposes and materials. The stitch invented by Mr. HOWE, and made on this Machine, is the most popular and durable, and all Saving Machines are subject to the principle invented by him.

A SMART WIFE. Sam Smart, who owned a snug little farm, was somewhat startled one fine day by an offer of more than twice the worth

of it in greenbacks. "Shall you sell the farm, Samuel? asked his wife. "Certainly I shall," said Sam if "the excited individuals don't prove to be a couple of escaped lunatics, as I have supposed them to be." And sell it he did. After the bargain was made and the money paid, one of the men took Sam and his wife to the back of the farm, where

"See what you've lost and we've gained!" said the excited individual, scooping up some of the water in an old tin cup and holding it up for their in-

SOUTH JERSEY. Only \$2.00 per Year

in Advance! Bridgeton, Jan. 18, 1867.

JAMES B. FERGUSON. Editor. SOUTH JERSEY INTERESTS.

Every year develops more and more the wealth and productive characteristics of South Jersey, indicating how immense are its agricultural resources. No part of the State is more productive, or contains soil more susceptible of producing various crops. Some portions of Cumberland, Cape May and Salem counties, and in fact we might say the same of all the counties composing the First Congressional District, contain lands which are capable of yielding every variety of vegetable and cereal productions, from sweet potatoes to that of the choicest fruits. In comparison with other sections of the State, when we take into consideration its area, there is more land under successful and profitable cultivation than in East Jersey, yielding ample returns for the labor expended. Corn. wheat, rye, and all the staple productions are grown in abundance - the lands are more easily cleared, and now that rail road communications are becoming accessible to our agriculturalists and other business men, they manifest a greater energy in all that pertains to the development of our resources. The West Jersey Rail Road Company deserve the thanks of the people of the whole district for the advantages they have conferred upon them, by the construction of their road and its several branches. Thus easy access has been furnished for the transportation of all their produce to a good and ready market, costing but a nominal sum in comparison to prices heretofore. Then the slow process of boating and wagoning were the only means of conveyance, and they were tedious and expensive, occupying days where only hours are now required.-This is an advantage which in time to come will stimulate the industrial interests of this section to such an extent that

Railroads are, therefore, the great arteries to returns with encouraging compensation, Phidias." increasing not only the wealth of the people, but also inspiring them to renewed energy. The West Jersey Railroad has done this for this part of the state. Uncultivated tracts of land heretofore considered of little value, because of the difficulty of reaching markets, have been converted into luxuriant fields by the application of marls and other fertilizers found in extensive beds in the vicinity of Glassboro' and elsewhere. Thus it is constantly increasing wealth, which, as railroad improvements advance, will be developed in an advantageous degree. Well may we and the entire people feel

GO TO SAYRE'S BOOTS AND SHOES.

TATENTED, SEPTEMBIGE 11TH, 1866.

THIS is the most successful Washing Machine ever invented, as it entirely overcomes all the objections heretofore made to them. It works quite easy, washes clean, and does not tear off the buttons or wear out the clothes. The manner of its construction is such that it cannot possibly get out of order, and it will do the washing of a faurily in a much shorter time than any machine ever before offered to the public using less soap and leaving the clothes perfectly white. Please by aside year prejudice until you have tested or seen it tested. Give it a chance and it will take the prejudice out of yourself, fand the and it will take the prejudice out of yourself, and the dirt out of your clothes. It can be seen at any time at my house, and if you have any dirty article tha you wish washed bring it along and we can soon con you wish washed of the reason of Paulsboro', and myself have purchased the light for the State of New

This is an article for wasting without rubbing, except in very dirty places, which will require a very slight rub, and unlike other preparations offered for a like purpose, with NOT ROT THE COTHES, but will leave them much whiter than ordinary methods without the usual wear and tear.

It removes grease spote as if by magic, and softenthe dirt by socking, so that rinsing will in ordinary cases entirely remove it. ases entirely remove it.

This powder is prepared in accordance with chemical science, and upon a process peculiar to itself, which is secured by Letters Patent. It has been in use for more than a year, and has proved itself an universal favorite wherever it has been used. Among the advantages elatified are the following, viz.—
It saves all the expense of soap usually used on otton and linen goods.
It saves most of the labor of rubbing, and wear and Also, for cleaning windows it is unsurpassed .-Also, for cleaning windows it is unsurpassed.—
With one quarter the time and labor usually required,
it imparts a beautiful gloss and lustre, much superior
to any other mode. No water required except to
moisten the rowder.
