Vegetable Sicilian Hair Renewer

Has stood the test of seven years before the public; and no preparation for the hair has yet been discovered that will produce the same beneficial results. It is an entirely new scientific discovery, combining many of the most powerful and restorative agents in the VEGETABLE CINCDOM. It restores GRAY HAIR TO ITS CRIGINAL YOUTHFUL COLOR. It makes the scalp white and clean: cures dandruff and hamors, and falling out of the law; and will make it grow upon bald heads, except in very aged persons, as it furfishes the nutritive principle by which the hair is nourished and supported. It makes the hair moist, soft, and glossy, and is unsarpassed as a HAIR DRESSING. It is the cheapest preparation ever offered to the pubnew scientific discovery, combining preparation ever offered to the pub-ic, as one bottle will accomplish more and last longer than three bollos of any other preparation.
It is recommended and used by the First Medical Authority.

The wonderful results produced by our Sicilian Hair Renewer have induced many to manufacture preparations for the Hair, under rious names; and, in order to induce the trade and the public to purchase their compounds, they have resorted to falsehood, by claiming they were former partwers, or had some connection with our Mr. Hall, and their preparation was similar to ours. Do not be deceived by them. Purchase the original: it has never yet been equalled. Our Treatise on the Hair, with certificates, sent free by mail. See that each bottle has our private Revenue Stamp over the top of the bottle. All others are imitations.

PHOSPHATE

Made Upon Strictly Scien-

tific Principles.

This article is entirely different from any other ever offered to the public. Its composition will vary, and contain such ingredients only as the tree, fruit, plant or crop for which it is intended requires, thereby enabling the buyer to avoid purchasing a large quantity of Whai he really does not want, in order to get a small quantity of which the state of the property F. Dare would call the attention of hisfriends he really does not want, in order to get a small quantity of what he really does want, which I know, from experience, is true with many, it not all of the phosphat s that are in the market. No fertilezer can be good and cheap at the same price, for two crops whose constituents are entirely different; it may be good for both, but must be dear for one or the other. For example, if a phosphate should contain ingredients that would be cheap for wheat, at any given price, it is absurd to think that the same phosphate would be equally cheap, at the same price, for another crop, whose constituents are entirely different. It cannot contain ingredients for two articles of an entirely different nature in such proportions as to be equally cheap, for one as the other. I am confident that there is a great deal of money thrown away for phosphates of different kinds, from the fact that they did not contain what the desired crop needed; and in many cases the crop would have been better without it at all, while if the same article had been used for other crops, of a different nature, it would have and in many cases the crop would have been better without at all, while if the same article had been used for other crops, of a different nature, it would have doubly paid for its cost. I have been carefully experimenting for several years, and any one who will take the trouble to visit my farm, near Ellisburg, N. J., five miles frem Camden, where I am constantly experimenting, may see where I produce a growth adon Peach and Pear trees of SIX FEET SIX INCHES in one season, and Irait upon the same, usually large and fine while trees right alongside equally good in every respect, not having the phosphate on them, did not grow one foot in the same time, and produced no fruit at all. I will be prepared to furnish, at short notice, a phosphate for any kind of fruit, vine or tree fruit, and all ordinary plants or erops that are grown in this country, such as wheat, rye, corn, grass, and all kinds of vegetables.

The reader will please bear in mind that in sending orders, the article for which it is intended to be used must be mentioned, and kind of soil also, if you wish the worth of your money. As I have said before, two articles of an entirely different nature must not be furnished with the same kind of food: the article I prepare for grains, would be dear at half its cest, for fruit, and yice versa.

The citizens had determined to evince their appreciation of their deceased Senator by spontaneous expressions, and a number of carriages, more than sufficient to convey all persons present to Mr. Ludlam's offering of the people. At the house brief funeral services were performed by Rev. Mr. Stuart preached an able and eloquent discourse, a fitting tribute both to Christianity and to the character of Mr. Ludlam, which will be found entire in another part of our columns, and which will be perused with interest by the people. At the close of the services. Mr. E. Sayre, the undertaker, opened the coffin, and the assembly filed past the boby to obtain one last glance at the well known features, upon which they should look no more in this world. Death had made but little change in his appearance. As there had been no wasting disease, the face was as full as it was in the fullest health, there was none of the ghastly pallor upon the countenance so universally attendant upon dissolution, and the smile which habitually lighted his countenance in life had left its lingering impress, kindly as ever even in death, and as he lay in the apparel he had worn in life, it was difficult to believe that he was not sleeping in the peace_ ful rest of earth, instead of that of the grave. When the people had all gazed upon the inanimate remains, the coffin was closed and they proceeded to the burying ground of the First deposited. If he were not, why could not any one at the Executive Office denounce it? If he cr they had any such power, from whence did it come? If from the Constitution, in what section? If it were true that the President had not this right, it followed that he had used his high office to thrust bethem the opinion of Andrew Johnson who was no more than any other man they meet in the street. Was not this a breach of the high privileges of Congress? He was convinced that this called for reprehension, and they could not, in view of their high office, pass by this denunciation in State papers read over the whole Union. PROOFS OF THE SUPERIORITY OF THE AMERICAN WALTHAM WATCHES.

This country has reason to be proud of this splended specimen of American operative genius and enterprise. That it sill work a revolution in the watch manufacturing of the world no one can doubt, who examines the operations of the waltham establishment, for it turns out watch movements at just about one-half the cost of imported movements—beside the amform reliability of the machine-made watches must give them a great advantage over all others, wherever known. A poor time piece of the machine make, will be as rare in the future, as a good one, of hand make, has been heretofore, for machinery is arbitrary in its performance, and can make a perfect article just as easy as one that is wor hiese. It will be a cause of congratulation if time highly useful American Enterprise shall have the effect of driving out of market the thousands of trachy foreign articles, miscalled timekeepers, by furnishing so excellent and economical a substitute."—N.
